Subject index for Volume 78
(January through December 2000, Suppl. 3, and online symposia)[1,2]

A

α-1-Antitrypsin
Transgenic protein production: Achievements using microinjection technology and the promise of nuclear transfer, 8A
α-Ketoglutaric Acid
Ornithine alpha-ketoglutarate and creatine effects on growth and plasma metabolites of nursery pigs, 1022
α-Lactalbumin
Transgenic protein production: Achievements using microinjection technology and the promise of nuclear transfer, 8A
Abattoir Byproducts
Feeding value of an enzymatically digested protein for early-weaned pigs, 318
Aberdeen-Angus
Evaluation of crossbred calf and cow types for the coastal plain of North Carolina, 2253
Abomasum
Influence of abomasal infusion of high levels of lysine or methionine, or both, on ruminal fermentation, eating behavior, and performance of lactating dairy cows, 1067
The effect of the plasma glucose level on the abomasal function in dairy cows, 1930
Absorption
Absorption of 2-hydroxy-4-(methylthio)butanoic acid by isolated sheep ruminal and omasal epithelia, 1078
Amino acid flux in ruminal and gastric veins of sheep: Effects of ruminal and omasal injections of free amino acids and carnosine, 158
Effect and absorption of histamine in sheep rumen: Significance of acidotic epithelial damage, 464
Free and peptide amino acid net flux across the rumen and the mesenteric- and portal-drained viscera of sheep, 1960
Net portal appearance of volatile fatty acids in sheep intraruminally infused with mixtures of acetate, propionate, isobutyrate, butyrate, and valerate, 1372
Accessory Spermatozoa
The effect of time of artificial insemination on fertilization status and embryo quality in superovulated cows, 2081
Accuracy
Variability among sources and laboratories in analyses of wheat middlings, 2652
Acetyl-CoA Carboxylase
Acetyl-CoA carboxylase and fatty acid synthase activity and immunodetectable protein in adipose tissues of ruminants: Effect of temperature and feeding level, 2383
Acidosis
Effect and absorption of histamine in sheep rumen: Significance of acidotic epithelial damage, 464
Evaluation of models of acute and subacute acidosis on dry matter intake, ruminal fermentation, blood chemistry, and endocrine profiles of beef steers, 3155
Acrosome
A sperm's perspective of fertilization, E17
ACTH
The effects of mutated skeletal ryanodine receptors on hypothalamic-pituitary-adrenal axis function in boars, 1319
Actin
Rapid Communication: Nucleotide sequence of red seabream, *Pagrus major*, β-actin cDNA, 2990
Acyl-CoA Oxidase
Expression of porcine transcription factors and genes related to fatty acid metabolism in different tissues and genetic populations, 2127
Additives
Designing supplementation programs for beef cattle fed forage-based diets, E12
Adipocytes
Culture of porcine stromal-vascular cells in serum-free medium: Differential action of various hormonal agents on adipose conversion, 885
Effect of feed restriction on adipose tissue transcript concentrations in genetically lean and obese pigs, 934
Expression of porcine transcription factors and genes related to fatty acid metabolism in different tissues and genetic populations, 2127
Modulation of porcine adipocyte β-adrenergic receptors by a β-adrenergic agonist, 919
The influence of dexamethasone and insulin on expression of CCAAT/enhancer binding protein isoforms during preadipocyte differentiation in porcine stromal-vascular cell cultures: Evidence for very early expression of C/EBPα, 1227
Adipose Tissues
Insulin regulation of leptin expression in streptozotocin diabetic pigs, 1497
Modulation of porcine adipocyte β-adrenergic receptors by hormones and butyrate, 927
Ovine adipose tissue monounsaturated fat content is correlated to depot-specific expression of the stearoyl-CoA desaturase gene, 62
Somatotropin and adipose tissue metabolism: Substrate and temporal effects, 1236
Using serial ultrasound measures to generate models of marbling and backfat thickness changes in feedlot cattle, 2055
Adrenal Glands
Administration of ACTH to restrained, pregnant sows alters their pigs' hypothalamic-pituitary-adrenal (HPA) axis, 2399
Investigation of the primary cause of hypoadrenocorticism in South African Angora goats (*Capra aegagrus*): A comparison with Boer goats (*Capra hircus*) and Merino sheep (*Ovis aries*), 371
Adrenergic Receptors
Effects of temperature and plane of nutrition on beta-adrenergic receptors in heart, kidney, and liver of lambs, 1907
Age
A review of the impact of feedlot management and nutrition on carcass measurements of feedlot cattle, E30
Palatability of wethers fed an 80% barley diet processed at different ages and of yearling wethers grazed on native range, 1779
The influence of recombinant bovine somatotropin on dietary energy level-related growth of Holstein-Friesian bull calves, 621
Age at Weaning
Age of calf at weaning of spring-calving beef cows and the effect on cow and calf performance and production economics, 1403
Aggression
Social effects and boar taint: Significance for production of slaughter boars (*Sus scrofa*), 296
Aging
Effects of rate of pH fall, time of deboning, aging period, and their interaction on veal quality characteristics, 1845
Agouti
Rapid communication: Linkage mapping of the porcine *Agouti* gene, 1396
Agricultural Education
The importance of comprehensive agricultural education in land-grant institutions: A historical perspective, 1684
Agricultural Sciences
The importance of comprehensive agricultural education in land-grant institutions: A historical perspective, 1684
Agriculture
Success and failure of decision support systems: Learning as we go, E27

[1]Page numbers followed by A refer to the *Fourth International Workshop on the Biology of Lactation in Farm Animals*, J. Anim. Sci. 78(Suppl. 3).

[2]Article titles followed by E1, E2, etc., refer to online-only Symposium papers.

Alfalfa
Feasibility of using lignin isolated from forages by solubilization in acetyl bromide as a standard for lignin analyses, 3135
Grazing methods and stocking rates for direct-seeded alfalfa pastures: III. Economics of alternative stocking rates for alfalfa pastures, 2209
Grazing methods and stocking rates for direct-seeded alfalfa pastures: II. Pasture quality and diet selection, 2202
Grazing methods and stocking rates for direct-seeded alfalfa pastures: I. Plant productivity and animal performance, 2192
Amides
Site of administration and duration of feeding oleamide to cattle on feed intake and ruminal fatty acid concentrations, 2745
Amino Acid Metabolism
Cellular uptake of valine by lactating porcine mammary tissue, 2927
Amino Acids
Amino acid flux in ruminal and gastric veins of sheep: Effects of ruminal and omasal injections of free amino acids and carnosine, 158
Cellular uptake of valine by lactating porcine mammary tissue, 2927
Determination of the methionine requirement of growing double-muscled Belgian Blue bulls with a three-step method, 233
Effect of dietary concentration of metabolizable lysine on finishing cattle performance, 1060
Free and peptide amino acid net flux across the rumen and the mesenteric- and portal-drained viscera of sheep, 1960
Limiting amino acids for growing Holstein steers limit-fed soybean hull-based diets, 1997
Lysine uptake by mammary gland tissue from lactating sows, 391
Metabolizable methionine and lysine requirements of growing cattle, 199
Postnatal changes of plasma amino acids in suckling pigs, 2369
Research paradigms behind amino acid requirements of the lactating sow: Theory and future application, 48A
Response of nitrogen metabolism in preparturient dairy cows to methionine supplementation, 742
Subclinical infection with the nematode *Trichostrongylus colubriformis* increases gastrointestinal tract leucine metabolism and reduces availability of leucine for other tissues, 380
The effect of feed intake level on splanchnic metabolism in growing beef steers, 1084
Amino Acid Sequences
Rapid communication: Nucleotide sequences of the bovine, caprine, and ovine *β_3-adrenergic receptor* genes, 1398
Ammonia
Effects of dietary carbohydrates and buffering capacity on nutrient digestibility and manure characteristics in finishing pigs, 3096
Nitrogen metabolism and fertility in cattle: I. Adaptive changes in intake and metabolism to diets differing in their rate of energy and nitrogen release in the rumen, 2659
Nitrogen metabolism and fertility in cattle: II. Development of oocytes recovered from heifers offered diets differing in their rate of nitrogen release in the rumen, 2670
Postnatal changes of plasma amino acids in suckling pigs, 2369
Practical aspects of urea and ammonia metabolism in ruminants, E21
Amyloid
Rapid communication: Cloning of bovine serum amyloid A3 cDNA, 2756
Anabolic Steroids
Growth-Promoting systems for heifer calves and yearlings finished in the feedlot, 2485
Androgens
Effects of muscle type, castration, age, and compensatory growth rate on androgen receptor mRNA expression in bovine skeletal muscle, 629
Androstenone
Social effects and boar taint: Significance for production of slaughter boars (*Sus scrofa*), 296
Anestrus
Duration of the seasonal anestrus in sheep selected for fertility in a fall-lambing system, 1149
Synchronizing estrus and(or) ovulation in beef cows after combinations of GnRH, norgestomet, and prostaglandin $F_{2\alpha}$ with or without timed insemination, 1747
Angora
Adrenal function in Angora goats: A comparative study of adrenal steroidogenesis in Angora goats, Boer goats, and Merino sheep, 1036
Carcass traits and retail display-life of chops from different goat breed types, 1262
Investigation of the primary cause of hypoadrenocorticism in South African Angora goats (*Capra aegagrus*): A comparison with Boer goats (*Capra hircus*) and Merino sheep (*Ovis aries*), 371
Single daily intramuscular injections of low quantities of recombinant ovine interferon-τ extends luteal life-span in Angora goats, 2966
Animal Behavior
Relationships between human-animal interactions and productivity of commercial dairy cows, 2821
Animal Breeding
Definition of animal breeding goals for sustainable production systems, 570
Animal Fat
Prediction of crude fat content of longissimus muscle of beef using the ratio of fat area calculated from computer image analysis: Comparison of regression equations for prediction using different input devices at different stations, 799
Animal Feeding
Feeder location did not affect performance of weanling pigs in large groups, 2784
Hand-feeding and gentling influence early-weaned lambs' attachment responses to their stockperson, 879
Animal Species
A generalized Michaelis-Menten equation for the analysis of growth, 1816
Animal Wastes
High dietary copper improves odor characteristics of swine waste, 859
Animal Welfare
Few differences found between early- and late-weaned pigs raised in the same environment, 38
Antibacterial Agents
Growth-promoting efficacy in young pigs of two sources of zinc oxide having either a high or a low bioavailability of zinc, 2896
Antibiotics
Consumer reactions, popular fancies, and scientific facts related to the healthfulness of meat products, E10
Effects of preshipping vs arrival medication with tilmicosin phosphate and feeding chlortetracycline on health and performance of newly received beef cattle, 267
Apoptosis
Factors regulating apoptosis during folliculogenesis in pigs, E24
Arginine
Postnatal changes of plasma amino acids in suckling pigs, 2369
ARPP-16
ARPP-16 mRNA is up-regulated in the longissimus muscle of pigs possessing an elevated growth rate, 1475
ARPP-19
ARPP-16 mRNA is up-regulated in the longissimus muscle of pigs possessing an elevated growth rate, 1475
Artificial Insemination
Artificial insemination outcomes in beef females using bovine sperm with a detectable fertility-associated antigen, 795
Development of an estrus synchronization protocol for beef cattle with short-term feeding of melengestrol acetate: 7-11 synch, 2186
Effect of day of the estrous cycle at the initiation of a timed artificial insemination protocol on reproductive responses in dairy heifers, 1568
Management and financial considerations affecting the decision to synchronize estrus in beef females, E37
The effect of time of artificial insemination on fertilization status and embryo quality in superovulated cows, 2081
The importance of seminal plasma on the fertility of subsequent artificial inseminations in swine, 443
ATP
Effect of dietary selenium and vitamin E on the ultrastructure and ATP concentration of boar spermatozoa, and the efficacy of added sodium selenite in extended semen on sperm motility, 1544
Attachment Behavior
Hand-feeding and gentling influence early-weaned lambs' attachment responses to their stockperson, 879

B

β-Adrenergic Agonists
Differential effects of dexamethasone and clenbuterol on rat growth and on β_2-adrenoceptors in lung and skeletal muscle, 604
Response of C_2C_{12} mouse and turkey skeletal muscle cells to the β-adrenergic agonist ractopamine, 699
β-Adrenergic Receptors
Expression of the porcine β_2-adrenergic receptor in Chinese hamster ovary cells, 2329
Rapid communication: Nucleotide sequences of the bovine, caprine, and ovine *β_3-adrenergic receptor* genes, 1398
β-Carotene
β-Carotene uptake and changes in ovarian steroids and uterine proteins during the estrous cycle in the canine, 1284
Backfat
Using serial ultrasound measures to generate models of marbling and backfat thickness changes in feedlot cattle, 2055
Bacterial Protein
Effects of protozoa on bacterial nitrogen recycling in the rumen, 2431
Balance Studies
Effects of dietary carbohydrates and buffering capacity on nutrient digestibility and manure characteristics in finishing pigs, 3096
Barley
Effects of graded levels of potato by-products in barley- and corn-based beef feedlot diets: I. Feedlot performance, carcass traits, meat composition, and appearance, 1829
Effects of graded levels of potato by-products in barley- and corn-based beef feedlot diets: II. Palatability, 1837
Beef
Biosynthesis of conjugated linoleic acid in ruminants, E28
Economic value of characteristics in heifer development: Repro-Sim software, E4
Effect of a trainer cow on health, behavior, and performance of newly weaned beef calves, 1716
Effects of a unique application of electrical stimulation on tenderness, color, and quality attributes of the beef longissimus muscle, 1504
Effects of graded levels of potato by-products in barley- and corn-based beef feedlot diets: II. Palatability, 1837
Evaluation of calpastatin activity measures in ante- and postmortem muscle from half-sib bulls and steers, 804
How can the beef industry recapture lost consumer demand?, E40
Identification of optimal ranges in ribeye area for portion cutting of beef steaks, 966
Implant strategies during feeding: Impact on carcass grades and consumer acceptability, 1867
Injection of beef strip loins with solutions containing sodium tripolyphosphate, sodium lactate, and sodium chloride to enhance palatability, 952
National Beef Tenderness Survey–1998, 1852
New approaches for improving tenderness, quality, and consistency of beef, E38
Quantitative trait loci affecting growth and carcass composition of cattle segregating alternate forms of myostatin, 560
Relationship of beef longissimus tenderness classes to tenderness of gluteus medius, semimembranosus, and biceps femoris, 2856
The influence of recombinant bovine somatotropin on dietary energy level-related growth of Holstein-Friesian bull calves, 621
The use of vitamin D_3 to improve beef tenderness, 2615
Using live estimates and ultrasound measurements to predict beef carcass cutability, 1255
Using measurements of muscle color, pH, and electrical impedance to augment the current USDA beef quality grading standards and improve the accuracy and precision of sorting carcasses into palatability groups, 2595
Beef Appearance
Effects of graded levels of potato by-products in barley- and corn-based beef feedlot diets: I. Feedlot performance, carcass traits, meat composition, and appearance, 1829
Beef Breeds
Effects of dietary fat and sire breed on puberty, weight, and reproductive traits of F_1 beef heifers, 2244
Beef Cattle
Additive genetic parameter estimates for heifer pregnancy and subsequent reproduction in Angus females, 2091
A two-sample method for assessing growth hormone response to growth hormone-releasing hormone challenge: Use as a predictor of gain in beef bulls, 1954
Brown midrib-3 corn silage improves digestion but not performance of growing beef steers, 2957
Comparison of models for genetic evaluation of scrotal circumference in crossbred bulls, 275
Designing and conducting experiments for range beef cows, E42
Designing mineral supplementation of forage programs for beef cattle, E13
Digesta kinetics, energy intake, grazing behavior, and body temperature of grazing beef cattle differing in adaptation to heat, 1608
Effects of backgrounding and growing programs on beef carcass quality and yield, E31
Effect of dietary concentration of metabolizable lysine on finishing cattle performance, 1060
Effects of preshipping vs arrival medication with tilmicosin phosphate and feeding chlortetracycline on health and performance of newly received beef cattle, 267
Effects of supplemental degradable intake protein on utilization of medium- to low-quality forages, 224
Effects of weaning age and diet on growth and carcass characteristics in steers, 1759
Evaluation of feather meal as a source of sulfur amino acids for growing steers, 207
Forage systems for production of stocker steers in the upper south, 1973
Genetic analyses of live-animal ultrasound and abattoir carcass traits in Australian Angus and Hereford cattle, 1786
Genetic aspects of replacement heifers in current and future production systems, E3
Genetic and environmental parameters for traits derived from the Brody growth curve and their relationships with weaning weight in Angus cattle, 1436
Genetic parameter estimates for serum insulin-like growth factor-I concentration and carcass traits in Angus beef cattle, 2305
Genetic parameters for direct and maternal calving ability over parities in Piedmontese cattle, 2532
Genotype × environment interactions in Angus, Brahman, and reciprocal-cross cows and their calves grazing common bermudagrass, endophyte-infected tall fescue pastures, or both forages, 546
Investigation of genotype × environment interactions for weaning weight for Herefords in three countries, 2121
Maternal birth weight breeding value as an additional factor to predict calf birth weight in beef cattle, 21
Metabolizable methionine and lysine requirements of growing cattle, 199
Parameter estimates for direct and maternal genetic effects on yearling, eighteen-month, and slaughter weights of Korean native cattle, 1414
Parameter estimates for genetic effects on carcass traits of Korean Native Cattle, 1181
Performance and carcass merit of growing beef steers with chlortetracycline-modified sensitivity to pituitary releasing hormones and fed two dietary protein levels, 2765
Performance and meat quality of beef steers fed corn-based or bread by-product-based diets, 784
Predicting growth in Angus bulls: The use of GHRH challenge, insulin-like growth factor-I, and insulin-like growth factor binding proteins, 2913
Procedures that support reproductive management of replacement beef heifers, E5
Relationship between a bull's parental genetic merit difference and subsequent progeny trait variability in Angus, Gelbvieh, and Limousin cattle, 2540
Simple example illustrating adjustment for merit of mates in a national cattle evaluation program, 2475
Simulation of cow-calf production systems in a range environment: II. Model evaluation, 1170
Simulation of cow-calf production systems in a range environment: I. Model development, 1159
Synchronizing estrus and(or) ovulation in beef cows after combinations of GnRH, norgestomet, and prostaglandin $F_{2\alpha}$ with or without timed insemination, 1747
Technical note: Covariance adjustment in beef cattle research, 2282
The effects of corn milling coproducts on growth performance and diet digestibility by beef cattle, 1

Variance and covariance components for weaning weight for Herefords in three countries, 33
Beef Cows
Development of an estrus synchronization protocol for beef cattle with short-term feeding of melengestrol acetate: 7-11 synch, 2186
Effect of crambe meal on performance, reproduction, and thyroid hormone levels in gestating and lactating beef cows, 2269
Effect of dietary energy on milk production and metabolic hormones in thin, primiparous beef heifers, 530
Effects of intramammary infection and parity on calf weaning weight and milk quality in beef cows, 2508
Energy metabolism in lactating beef heifers, 2696
Management and financial considerations affecting the decision to cynchronize estrus in beef females, E37
Ovarian and endocrine characteristics during an estrous cycle in Angus, Brahman, and Senepol cows in a subtropical environment, 1291
Plasma fatty acids, prostaglandin $F_{2\alpha}$ metabolite, and reproductive response in postpartum heifers fed rumen bypass fat, 139
Preweaning growth curves in Brown Swiss and Pirenaica calves with emphasis on individual variability, 1132
The effect of progesterone alone or in combination with estradiol on follicular dynamics, gonadotropin profiles, and estrus in beef cows following calf isolation and restricted suckling, 1917
Undegraded intake protein supplementation: I. Effects on forage utilization and performance of periparturient beef cows fed low-quality hay, 449
Beef Production
Lactation and calf weight traits of mature crossbred cows fed varying daily levels of metabolizable energy, 7
Beef Steers
Net absorption and hepatic metabolism of glucose, L-lactate, and volatile fatty acids by steers fed diets containing sorghum grain processed as dry-rolled or steam-flaked at different densities, 1364
Splanchnic nitrogen metabolism by growing beef steers fed diets containing sorghum grain flaked at different densities, 1355
Behavior
Administration of ACTH to restrained, pregnant sows alters their pigs' hypothalamic-pituitary-adrenal (HPA) axis, 2399
Behavioral reactivity of cattle toward novel food: Effects of testing time and food type of neighbors, 2323
Effect of sensory stimuli on huddling behavior of pigs, 592
Effects of eating space and availability of water in feeders on productivity and eating behavior of grower/finisher pigs, 865
Few differences found between early- and late-weaned pigs raised in the same environment, 38
Reducing veal calves' reactivity to people by providing additional human contact, 1213
The effect of thermal environment and age on neonatal pig behavior, 583
The impact of gentle contacts on ease of handling, welfare, and growth of calves and on quality of veal meat, 1219
Use of trainer animals to improve performance and health of newly arrived feedlot calves, 539
Benzoic Acid
Effect of dietary glycine and benzoate level on benzoate metabolism in mink (*Mustela vison*), blue fox (*Alopex lagopus*), and raccoon dog (*Nyctereutes procyonoides*), 976
Beta-casein
Rapid communication: nucleotide sequence of the river buffalo beta-casein cDNA, 1390
Beta-lactoglobulin
Rapid communication: polymorphism in the goat *β-lactoglobulin* proximal promoter region, 1101
Bile Acids
Developmental changes in cholesterol 7α- and 27-hydroxylases in the piglet, 943
Binding Proteins
Local regulation of pubertal mammary growth in heifers, 36A
Ovarian and endocrine characteristics during an estrous cycle in Angus, Brahman, and Senepol cows in a subtropical environment, 1291
Predicting growth in Angus bulls: The use of GHRH challenge, insulin-like growth factor-I, and insulin-like growth factor binding proteins, 2913
Rapid Communication: Mapping of the *Mannose-Binding Lectin 2* (*MBL2*) gene to pig chromosome 14, 2992
Serum concentrations of IGF-I, estradiol-17β, testosterone, and relative amounts of IGF binding proteins (IGFBP) in growing boars, barrows, and gilts, 2581
Bioavailability
Chemical characteristics and relative bioavailability of supplemental organic zinc sources for poultry and ruminants, 2039
Zinc bioavailability in soybean meal, 1017
Biochemical Receptors
Decreased growth in Angus steers with a short TG-microsatellite allele in the P1 promoter of the growth hormone receptor gene, 2099
Biogenic Amines
Effect and absorption of histamine in sheep rumen: Significance of acidotic epithelial damage, 464
Biopsy
Technical note: A technique for multiple liver biopsies in neonatal calves, 2459
Bioreactors
Progress in transgenic production of human plasma proteins in mammary bioreactors, 1A
Biosolids
Effects of pasture applied biosolids on performance and mineral status of grazing beef heifers, 1331
Birth
Identification of quantitative trait loci affecting birth characters and accumulation of backfat and weight in a Meishan-White Composite resource population, 2547
Birth Weight
Effect of tropically adapted sire breeds on preweaning growth of F_1 Angus calves and reproductive performance of their Angus dams, 1111
Effects of birth weight and postnatal nutrition on neonatal sheep: II. Skeletal muscle growth and development, 50
Maternal birth weight breeding value as an additional factor to predict calf birth weight in beef cattle, 21
Bison
Riboflavin and niacin concentrations of bison cuts, 1267
Blastocyst
Reduced oxygen tension and EDTA improve bovine zygote development in a chemically defined medium, 152
Blood Chemistry
Administration of recombinant bovine tumor necrosis factor-α affects intermediary metabolism and insulin and growth hormone secretion in dairy heifers, 2164
Blood Plasma
Effects of a whey protein product and spray-dried animal plasma on growth performance of weanling pigs, 647
Response of nitrogen metabolism in preparturient dairy cows to methionine supplementation, 742
Blood Protein
Dehydration, stress, and water consumption of horses during long-distance commercial transport, 2568
Boar Taint
Social effects and boar taint: Significance for production of slaughter boars (*Sus scrofa*), 296
Boars
Effect of dietary selenium and vitamin E on spermatogenic development in boars, 1537
Effects of boar contact and housing conditions on estrus expression in weaned sows, 871
Responsiveness to boar stimuli and change in vulvar reddening in relation to ovulation in weaned sows, 3019
Serum concentrations of luteinizing hormone, growth hormone, testosterone, estradiol, and leptin in boars treated with n-methyl-D,L-aspartate, 365
Body Composition
Effect of starter feeding program on growth performance and gains of body components from weaning to market weight in swine, 2885
Body Protein
Effect of starter feeding program on growth performance and gains of body components from weaning to market weight in swine, 2885
Body Water
Changes in postprandial plasma and extracellular and ruminal fluid volumes in wethers fed or unfed for 72 hours, 216
Body Weight
Breed and sex differences in growth curves for two breeds of dog guides, 27

Genetic parameters and relationships between hip height and weight in Brahman cattle, 3045
Response to 13 generations of selection for increased 8-week body weight in lines of mice carrying a sheep growth hormone-based transgene, 832
Boer
Effects of dietary protein concentration on postweaning growth of Boer crossbred and Spanish goat wethers, 2275
Bone Marrow
Suppressor activity of bone marrow cells and localization of fluorescent-labeled bone marrow cells within ovine endometrial tissue, 709
Bos indicus
Influence of *Bos indicus* crossbreeding and cattle age on apparent utilization of a high-grain diet, 1641
Bovidae
Administration of recombinant bovine tumor necrosis factor-α affects intermediary metabolism and insulin and growth hormone secretion in dairy heifers, 2164
Effect of ovarian phase and follicle quality on morphology and developmental capacity of the bovine cumulus-oocyte complex, 1277
Effects of triglyceride accumulation on induction of urea synthesis by glucagon and dexamethasone in monolayer cultures of bovine hepatocytes, 1659
Production of insulin-like growth factor-I by granulosa cells but not thecal cells is hormonally responsive in cattle, 2919
Rapid communication: Cloning of bovine serum amyloid A3 cDNA, 2756
Rapid communication: Localization of POU1F1 to bovine, ovine, and caprine 1q21-22, 242
Rapid communication: Single nucleotide polymorphisms detected in exon 10 of the bovine *growth hormone receptor* gene, 2230
The activity of transcription factor Stat5 responds to prolactin, growth hormone, and IGF-I in rat and bovine mammary explant culture, 3114
The effect of the plasma glucose level on the abomasal function in dairy cows, 1930
Timing of realimentation of mature cows that were feed-restricted during pregnancy influences calf birth weights and growth rates, 2790
Bovine
Bovine placental protease specificity toward muscle connective tissue proteins, 1861
Evaluation of numbers of microscopic and macroscopic follicles in cattle selected for twinning, 1564
Rapid communication: Nucleotide sequences of the bovine, caprine, and ovine *β3-adrenergic receptor* genes, 1398
Brahman
Genetic parameters and relationships between hip height and weight in Brahman cattle, 3045
Brain
The effects of mutated skeletal ryanodine receptors on hypothalamic-pituitary-adrenal axis function in boars, 1319
Branched Chain Amino Acids
Methionine imbalance and toxicity in calves, 2722
The effects of branched-chain amino acids on sow and litter performance, 658
Brangus
Evaluation of crossbred calf and cow types for the coastal plain of North Carolina, 2253
Breed Differences
Energy metabolism in lactating beef heifers, 2696
Growth- and breed-related changes of muscle fiber characteristics in cattle, 1485
Breeding
Forage systems for production of stocker steers in the upper south, 1973
Breeding Objectives
Definition of animal breeding goals for sustainable production systems, 570
Evaluation of Egyptian sheep production systems: II. Breeding objectives for purebred and composite breeds, 288
Breeds
Digesta kinetics, energy intake, grazing behavior, and body temperature of grazing beef cattle differing in adaptation to heat, 1608
Evaluation of Egyptian sheep production systems: I. Breed crosses and management systems, 283
Evaluation of Egyptian sheep production systems: II. Breeding objectives for purebred and composite breeds, 288
Preweaning growth curves in Brown Swiss and Pirenaica calves with emphasis on individual variability, 1132
Broilers
Heritabilities of and genetic relationships between salmonella resistance traits in broilers, 2287
Bromocriptine
Inhibition of prolactin in the last trimester of gestation decreases mammary gland development in gilts, 1303
Potential for Hair Sheep in the United States, E8
Buffalo
Rapid communication: nucleotide sequence of the river buffalo beta-casein cDNA, 1390
Rapid communication: nucleotide sequence of the river buffalo kappa-casein cDNA, 1389
Buffering Capacity
Effects of dietary carbohydrates and buffering capacity on nutrient digestibility and manure characteristics in finishing pigs, 3096
The effects of calcium benzoate in diets with or without organic acids on dietary buffering capacity, apparent digestibility, retention of nutrients, and manure characteristics in swine, 2622
Buffers
Effects of feed physical form and buffering solutes on water disappearance and proximal stomach pH in swine, 2344
Bulls
The effects of active immunization against GnRH on testicular development, feedlot performance, and carcass characteristics of beef bulls, 2778
Butyrates
Modulation of porcine adipocyte β-adrenergic receptors by hormones and butyrate, 927
By-products
Review of new information on the use of wet and dry milling feed by-products in feedlot diets, E19

C

Calcium
Effects of dietary calcium:phosphorus ratios on apparent absorption of calcium and phosphorus in the small intestine, cecum, and colon of pigs, 106
The use of vitamin D_3 to improve beef tenderness, 2615
Calf Production
Age of calf at weaning of spring-calving beef cows and the effect on cow and calf performance and production economics, 1403
Calpain
Ionic strength-induced inactivation of μ-calpain in postmortem muscle, 2336
Calpastatin
Evaluation of calpastatin activity measures in ante- and postmortem muscle from half-sib bulls and steers, 804
Protein kinetics in callipyge lambs, 78
Calves
Influence of *Bos indicus* crossbreeding and cattle age on apparent utilization of a high-grain diet, 1641
Methionine imbalance and toxicity in calves, 2722
Reducing veal calves' reactivity to people by providing additional human contact, 1213
Technical note: A technique for multiple liver biopsies in neonatal calves, 2459
The impact of gentle contacts on ease of handling, welfare, and growth of calves and on quality of veal meat, 1219
Use of trainer animals to improve performance and health of newly arrived feedlot calves, 539
Calving Season
Preweaning growth curves in Brown Swiss and Pirenaica calves with emphasis on individual variability, 1132
Cancer
Conjugated linoleic acid (CLA): A ruminant fatty acid with beneficial effects on human health, E29
Does selenium accumulation in meat confer health benefits to consumers?, E11
Caprine
Rapid communication: Nucleotide sequences of the bovine, caprine, and ovine *β3-adrenergic receptor* genes, 1398
Carbohydrate Digestion

Genetic, nutritional and endocrine support of milk synthesis in dairy cows, 59A
Carbohydrate Metabolism
Net absorption and hepatic metabolism of glucose, L-lactate, and volatile fatty acids by steers fed diets containing sorghum grain processed as dry-rolled or steam-flaked at different densities, 1364
Carbohydrates
Effects of dietary carbohydrates and buffering capacity on nutrient digestibility and manure characteristics in finishing pigs, 3096
Carcass Characteristics
Effects of graded levels of potato by-products in barley- and corn-based beef feedlot diets: I. Feedlot performance, carcass traits, meat composition, and appearance, 1829
Carcass Composition
Effect of magnesium mica on performance and carcass quality of growing-finishing swine, 2135
Effects of modified tall oil and creatine monohydrate on growth performance, carcass characteristics, and meat quality of growing-finishing pigs, 2376
Using live estimates and ultrasound measurements to predict beef carcass cutability, 1255
Carcass Grading
Relationship of beef longissimus tenderness classes to tenderness of gluteus medius, semimembranosus, and biceps femoris, 2856
Using serial ultrasound measures to generate models of marbling and backfat thickness changes in feedlot cattle, 2055
Carcass Quality
A review of the impact of feedlot management and nutrition on carcass measurements of feedlot cattle, E30
Effects of backgrounding and growing programs on beef carcass quality and yield, E31
Differences among Wagyu sires for USDA carcass traits and palatability attributes of cooked ribeye steaks, 1710
Effects of supplemental zinc concentration and source on performance, carcass characteristics, and serum values in finishing beef steers, 2801
Genetic parameter estimates for serum insulin-like growth factor-I concentration and carcass traits in Angus beef cattle, 2305
Implant strategies during feeding: Impact on carcass grades and consumer acceptability, 1867
Performance and carcass merit of growing beef steers with chlortetracycline-modified sensitivity to pituitary releasing hormones and fed two dietary protein levels, 2765
Technical note: Covariance adjustment in beef cattle research2282
The effect of the Halothane and Rendement Napole genes on carcass and meat quality characteristics of pigs, 2862
Using receiver operating characteristic analysis to evaluate the accuracy in predicting future quality grade from ultrasound marbling estimates on beef calves, 2263
Carcass Traits
Effect of dietary formates on growth performance, carcass traits, sensory quality, intestinal microflora, and stomach alterations in growing-finishing pigs, 1875
Carcasses
Effect of consumption of potato chip scraps on the performance of pigs, 2021
Effects of modified tall oil versus a commercial source of conjugated linoleic acid and increasing levels of modified tall oil on growth performance and carcass characteristics of growing-finishing pigs, 2359
Effects of on-farm diets for organic pig production on performance and carcass quality, 1199
Effects of ruminally protected choline and dietary fat on performance and blood metabolites of finishing heifers, 2497
Genetic analyses of live-animal ultrasound and abattoir carcass traits in Australian Angus and Hereford cattle, 1786
Prediction of crude fat content of longissimus muscle of beef using the ratio of fat area calculated from computer image analysis: Comparison of regression equations for prediction using different input devices at different stations, 799
Quantitative trait loci affecting growth and carcass composition of cattle segregating alternate forms of myostatin, 560
The effects of active immunization against GnRH on testicular development, feedlot performance, and carcass characteristics of beef bulls, 2778
Cardiovascular System
Physiological responses of Brahman and Hereford steers to an acute ergotamine challenge, 124
Carobs
Polyethylene glycol as a means for reducing the impact of condensed tannins in carob pulp: Effects on lamb growth performance and meat quality, 810
Carrots
Behavioral reactivity of cattle toward novel food: Effects of testing time and food type of neighbors, 2323
Cashmere
Effects of mimosine on fiber shedding, follicle activity, and fiber regrowth in Spanish goats, 1551
Castration
Effects of muscle type, castration, age, and compensatory growth rate on androgen receptor mRNA expression in bovine skeletal muscle, 629
Gonadal function, sexual behavior, feedlot performance, and carcass traits of ram lambs actively immunized against GnRH, 2237
Influence of castration and estrogen replacement on sexual behavior of female-oriented, male-oriented, and asexual rams, 1947
The effects of active immunization against GnRH on testicular development, feedlot performance, and carcass characteristics of beef bulls, 2778
Catecholamines
Assessment of hypothalamic-pituitary-adrenal axis and sympathetic nervous system activity in pregnant sows through the measurement of glucocorticoids and catecholamines in urine, 420
Dietary copper effects on lipid metabolism and circulating catecholamine concentrations in finishing steers, 2737
Cattle
Ability of induced corpora lutea to maintain pregnancy in beef cows, 2942
Assessment of trace mineral status of ruminants: A review, E20
Behavioral reactivity of cattle toward novel food: Effects of testing time and food type of neighbors, 2323
Compartmental modeling with nitrogen-15 to determine effects of degree of fat saturation on intraruminal N recycling, 2421
Decreased growth in Angus steers with a short TG-microsatellite allele in the P1 promoter of the growth hormone receptor gene, 2099
Designing supplementation programs for beef cattle fed forage-based diets, E12
Dietary copper effects on lipid metabolism and circulating catecholamine concentrations in finishing steers, 2737
Dietary fats as reproductive nutraceuticals in beef cattle, E14
Digestibility of prairie hay diets supplemented with different levels of magnesium-mica by beef heifers, 718
Effect of dietary chromium-L-methionine on glucose metabolism of beef steers, 3177
Effect of the previously gravid uterine horn and postpartum interval on follicular diameter and conception rate in beef cows treated with estradiol benzoate and progesterone, 2172
Effects of degree of fat saturation on fiber digestion and microbial protein synthesis when diets are fed twelve times daily, 2412
Effects of injection position and transponder size on the performances of passive injectable transponders used for the electronic identification of cattle, 3001
Effects of muscle type, castration, age, and compensatory growth rate on androgen receptor mRNA expression in bovine skeletal muscle, 629
Effects of pasture applied biosolids on performance and mineral status of grazing beef heifers, 1331
Effects of ruminally protected choline and dietary fat on performance and blood metabolites of finishing heifers, 2497
Effects of supplemental protein type on productivity of primiparous beef cows, 3027
Effects of supplemental zinc and manganese on ruminal fermentation, forage intake, and digestion by cattle fed prairie hay and urea, 2972
Effects of supplementing prairie hay with corn and soybean meal on intake, digestion, and ruminal measurements by beef steers, 3144
Endocrinology of increased ovarian folliculogenesis in cattle selected for twin births, E26
Ergotamine alters plasma concentrations of glucagon, insulin, cortisol, and triiodothyronine in cows, 690
Evaluation of models of acute and subacute acidosis on dry matter intake, ruminal fermentation, blood chemistry, and endocrine profiles of beef steers, 3155

Growth- and breed-related changes of muscle fiber characteristics in cattle, 1485
Health and environmental implications of using composted household and yard waste bedding in a cattle feedlot, 495
Influence of bovine growth hormone and growth hormone-releasing factor on messenger RNA abundance of lipoprotein lipase and stearoyl-CoA desaturase in the bovine mammary gland and adipose tissue, 412
Influence of consumption of endophyte-infested tall fescue hay on performance of heifers and lambs, 358
Influence of feed intake fluctuation and frequency of feeding on nutrient digestion, digesta kinetics, and ruminal fermentation profiles in limit-fed steers, 2215
Influence of ruminal biohydrogenation on the feeding value of fat in finishing diets for feedlot cattle, 1738
Initial results of genomic scans for ovulation rate in a cattle population selected for increased twinning rate, 3053
Interaction of dietary magnesium level on the feeding value of supplemental fat in finishing diets for feedlot steers, 2072
Intraruminal supplementation with increasing levels of exogenous polysaccharide-degrading enzymes: Effects on nutrient digestion in cattle fed a barley grain diet, 477
Linkage mapping of the Mahogany (attractin) locus in cattle and pigs, 2480
Nitrogen metabolism and fertility in cattle: I. Adaptive changes in intake and metabolism to diets differing in their rate of energy and nitrogen release in the rumen, 2659
Nitrogen metabolism and fertility in cattle: II. Development of oocytes recovered from heifers offered diets differing in their rate of nitrogen release in the rumen, 2670
Pretanned leather shavings in a supplement mixture for steers: I. In situ and in vitro disappearance, ruminal fermentation, and organic matter, nitrogen, and fiber digestion, 726
Pretanned leather shavings in a supplement mixture for steers: II. Digesta kinetics, ruminal fermentation, and grazing behavior in steers grazing dormant wheatgrass pasture, 735
Reduced oxygen tension and EDTA improve bovine zygote development in a chemically defined medium, 152
Response of nitrogen metabolism in preparturient dairy cows to methionine supplementation, 742
Review of new information on the use of wet and dry milling feed by-products in feedlot diets, E19
Site of administration and duration of feeding oleamide to cattle on feed intake and ruminal fatty acid concentrations, 2745
The effect of feed intake level on splanchnic metabolism in growing beef steers, 1084
The effect of time of artificial insemination on fertilization status and embryo quality in superovulated cows, 2081
The relationship between reaction to sudden, intermittent movements and sounds and temperament, 1467
The strategic use of estradiol to enhance fertility and submission rates of progestin-based estrus synchronization programs in dairy herds, 523
Use of a small dose of estradiol benzoate during diestrus to synchronize development of the ovulatory follicle in cattle, 145
Using receiver operating characteristic analysis to evaluate the accuracy in predicting future quality grade from ultrasound marbling estimates on beef calves, 2263
Using serial ultrasound measures to generate models of marbling and backfat thickness changes in feedlot cattle, 2055

Cattle Breeds
Effect of tropically adapted sire breeds on preweaning growth of F_1 Angus calves and reproductive performance of their Angus dams, 1111
Ovarian and endocrine characteristics during an estrous cycle in Angus, Brahman, and Senepol cows in a subtropical environment, 1291
Physiological responses of Brahman and Hereford steers to an acute ergotamine challenge, 124

cDNA
Rapid communication: nucleotide sequence of the river buffalo beta-casein cDNA, 1390
Rapid communication: nucleotide sequence of the river buffalo kappa-casein cDNA, 1389

Cecum
Effects of dietary calcium:phosphorus ratios on apparent absorption of calcium and phosphorus in the small intestine, cecum, and colon of pigs, 106

Cell Cultures
Expression of the porcine β_2-adrenergic receptor in Chinese hamster ovary cells, 2329
Morphology of luminal and glandular epithelial cells from pig endometrium grown on plastic or extracellular matrices, 131
Production of insulin-like growth factor-I by granulosa cells but not thecal cells is hormonally responsive in cattle, 2919

Cells
Effects of diet forage:concentrate ratio and metabolizable energy intake on visceral organ growth and in vitro oxidative capacity of gut tissues in sheep, 760
Response of C_2C_{12} mouse and turkey skeletal muscle cells to the β-adrenergic agonist ractopamine, 699

Cellulase
Intake, digestibility, and composition of orchardgrass and alfalfa silages treated with cellulase, inoculant, and formic acid fed to lambs, 2980

Cervus elaphus
Technical note: The ability of mathematical models to describe the shape of lactation curves, 3010

Chemical Analysis
Variability among sources and laboratories in analyses of wheat middlings, 2652

Chicken
Genetic analysis of growth curve parameters for male and female chickens resulting from selection on shape of growth curve, 2515

Chick Production
Chemical characteristics and relative bioavailability of supplemental organic zinc sources for poultry and ruminants, 2039

Chicks
Limiting order of amino acids and the effects of phytase on protein quality in corn gluten meal fed to young chicks, 2150
The effects of citric acid on phytate-phosphorus utilization in young chicks and pigs, 682

Chlortetracycline
Influence of chlortetracycline and dietary protein level on visceral organ mass of growing beef steers, 3169
Performance and carcass merit of growing beef steers with chlortetracycline-modified sensitivity to pituitary releasing hormones and fed two dietary protein levels, 2765

Cholesterol
Dietary copper effects on lipid metabolism and circulating catecholamine concentrations in finishing steers, 2737
Dietary copper effects on lipid metabolism, performance, and ruminal fermentation in finishing steers, 2452
Effects of dietary copper source and concentration on carcass characteristics and lipid and cholesterol metabolism in growing and finishing steers, 1053
Effects of soybean oil and dietary copper on ruminal and tissue lipid metabolism in finishing steers, 2713

Cholesterol Hydroxylase
Developmental changes in cholesterol 7α- and 27-hydroxylases in the piglet, 943

Choline
Effects of ruminally protected choline and dietary fat on performance and blood metabolites of finishing heifers, 2497

Chorionic Gonadotropin
Effect of subcutaneous vs intramuscular administration of P.G. 600 on estrual and ovulatory responses of prepubertal gilts, 1732

Chromic Oxide
The effect of texturized vegetable protein containing soy carbohydrate on oroileal transit of chromic oxide in cannulated dogs, 2633

Chromium
Chromium supplementation does not influence glucose metabolism or insulin action in response to cold exposure in mature sheep, 2950
Effect of dietary chromium-L-methionine on glucose metabolism of beef steers, 3177

Chromosomes
Rapid communication: Twenty-six new porcine microsatellites from a microsatellite enriched microdissected chromosome 8 library, 3191

Ciliates
Ruminal fermentation and duodenal flow following progressive inoculations of fauna-free wethers with major individual species of ciliate protozoa or total fauna, 750

Circadian Rhythm
Assessment of hypothalamic-pituitary-adrenal axis and sympathetic nervous system activity in pregnant sows through the measurement of glucocorticoids and catecholamines in urine, 420
Citric Acid
The effects of citric acid on phytate-phosphorus utilization in young chicks and pigs, 682
Classification
Relationship of beef longissimus tenderness classes to tenderness of gluteus medius, semimembranosus, and biceps femoris, 2856
Clenbuterol
Differential effects of dexamethasone and clenbuterol on rat growth and on β_2-adrenoceptors in lung and skeletal muscle, 604
Total radioactive residues and clenbuterol residues in swine after dietary administration of [^{14}C]clenbuterol for seven days and preslaughter withdrawal periods of zero, three, or seven days, 2903
Cloning
Fetal development of in vitro-produced embryos: Possible association with uterine function, E15
CNCPS
Accounting for the effects of a ruminal nitrogen deficiency within the structure of the Cornell Net Carbohydrate and Protein System, 1648
Cold Stress
Chromium supplementation does not influence glucose metabolism or insulin action in response to cold exposure in mature sheep, 2950
Collagen
Bovine placental protease specificity toward muscle connective tissue proteins, 1861
Variation in proteolysis, sarcomere length, collagen content, and tenderness among major pork muscles, 958
Collagenase
Bovine placental protease specificity toward muscle connective tissue proteins, 1861
College Students
Transfer student and gender issues within the Department of Animal Science at Texas A&M University, 3184
Color
Assessment of fresh pork color with color machine vision, 3078
Using measurements of muscle color, pH, and electrical impedance to augment the current USDA beef quality grading standards and improve the accuracy and precision of sorting carcasses into palatability groups, 2595
Colostrum
Growth performance, metabolic and endocrine traits, and absorptive capacity in neonatal calves fed either colostrum or milk replacer at two levels, 609
Influence of feeding different amounts of first colostrum on metabolic, endocrine, and health status and on growth performance in neonatal calves, 896
Complementary cDNA
Rapid communication: Nucleotide sequence of the ovine lipoprotein lipase cDNA, 2994
Complementary DNA
Rapid communication: Cloning of bovine serum amyloid A3 cDNA, 2756
Rapid Communication: Nucleotide sequence of red seabream, *Pagrus major*, β-actin cDNA, 2990
Composition
Intake, digestibility, and composition of orchardgrass and alfalfa silages treated with cellulase, inoculant, and formic acid fed to lambs, 2980
Composts
Health and environmental implications of using composted household and yard waste bedding in a cattle feedlot, 495
Concentrates
Effects of protein concentration and degradability on performance, ruminal fermentation, and nitrogen metabolism in rapidly growing heifers fed high-concentrate diets from 100 to 230 kg body weight, 1667
Conjugated Linoleic Acid
Biosynthesis of conjugated linoleic acid in ruminants, E28
Conjugated linoleic acid (CLA): A ruminant fatty acid with beneficial effects on human health, E29
Fatty acid composition, including conjugated linoleic acid, of intramuscular fat from steers offered grazed grass, grass silage, or concentrate-based diets, 2849
Consumer Attitudes
Consumer reactions, popular fancies, and scientific facts related to the healthfulness of meat products, E10
Consumer Panels
National Beef Tenderness Survey–1998, 1852
Copper
Assessment of trace mineral status of ruminants: A review, E20
Dietary copper effects on lipid metabolism and circulating catecholamine concentrations in finishing steers, 2737
Dietary copper effects on lipid metabolism, performance, and ruminal fermentation in finishing steers, 2452
Effects of dietary copper concentration and source on performance and copper status of growing and finishing steers, 2446
Effects of dietary copper source and concentration on carcass characteristics and lipid and cholesterol metabolism in growing and finishing steers, 1053
Effects of soybean oil and dietary copper on ruminal and tissue lipid metabolism in finishing steers, 2713
Growth promotion effects and plasma changes from feeding high dietary concentrations of zinc and copper to weanling pigs (regional study), 1010
High dietary copper improves odor characteristics of swine waste, 859
Corn
Effect of high-oil corn on growth performance, diet digestibility, and energy content of finishing diets fed to beef cattle, 2257
Effects of graded levels of potato by-products in barley- and corn-based beef feedlot diets: I. Feedlot performance, carcass traits, meat composition, and appearance, 1829
Effects of graded levels of potato by-products in barley- and corn-based beef feedlot diets: II. Palatability, 1837
Corpus Luteum
Ability of induced corpora lutea to maintain pregnancy in beef cows, 2942
Single daily intramuscular injections of low quantities of recombinant ovine interferon-τ extends luteal life-span in Angora goats, 2966
Correlation
Relationship between a bull's parental genetic merit difference and subsequent progeny trait variability in Angus, Gelbvieh, and Limousin cattle, 2540
Corticotropin
Administration of ACTH to restrained, pregnant sows alters their pigs' hypothalamic-pituitary-adrenal (HPA) axis, 2399
Plasma cortisol and ACTH concentrations in the warmblood horse in response to a standardized treadmill exercise test as physiological markers for evaluation of training status, 1936
Cortisol
The effects of mutated skeletal ryanodine receptors on hypothalamic-pituitary-adrenal axis function in boars, 1319
Transportation of goats: Effects on physiological stress responses and live weight loss, 1450
Cottonseed
Effect of level of whole cottonseed on intake, digestibility, and performance of growing male goats fed hay-based diets, 1677
Covariance
Technical note: Covariance adjustment in beef cattle research, 2282
(Co)variance Components
Twinning rate in Norwegian cattle: Frequency, (co)variance components, and genetic trends, 15
Cows
Age of calf at weaning of spring-calving beef cows and the effect on cow and calf performance and production economics, 1403
Can beef heifers and young postpartum cows be physiologically and nutritionally manipulated to optimize reproductive efficiency?, E41
Physiological levels of Stat5 DNA binding activity and protein in bovine mammary gland, 3126
Relationships between human-animal interactions and productivity of commercial dairy cows, 2821
Creatine
Effects of modified tall oil and creatine monohydrate on growth performance, carcass characteristics, and meat quality of growing-finishing pigs, 2376
Ornithine alpha-ketoglutarate and creatine effects on growth and plasma metabolites of nursery pigs, 1022

Creatine Kinase
Transportation of goats: Effects on physiological stress responses and live weight loss, 1450
Crossbreeding
Effect of tropically adapted sire breeds on preweaning growth of F_1 Angus calves and reproductive performance of their Angus dams, 1111
Evaluation of crossbred calf and cow types for the coastal plain of North Carolina, 2253
Evaluation of Egyptian sheep production systems: I. Breed crosses and management systems, 283
Cystine
Evaluation of feather meal as a source of sulfur amino acids for growing steers, 207
Cytokines
Culture of porcine stromal-vascular cells in serum-free medium: Differential action of various hormonal agents on adipose conversion, 885

D

Dairy Bulls
The influence of recombinant bovine somatotropin on dietary energy level-related growth of Holstein-Friesian bull calves, 621
Dairy Cows
Current concepts in synchronization of estrus and ovulation of dairy cows, E39
Genetic, nutritional and endocrine support of milk synthesis in dairy cows, 59A
Decision Analysis
Success and failure of decision support systems: Learning as we go, E27
Defleecing
Effects of mimosine on fiber shedding, follicle activity, and fiber regrowth in Spanish goats, 1551
Dehydration
Dehydration, stress, and water consumption of horses during long-distance commercial transport, 2568
Demand
How can the beef industry recapture lost consumer demand?, E40
Density
Effects of planting density and processing method on laboratory characteristics of grain sorghum for ruminants, 2032
Deprivation
Changes in postprandial plasma and extracellular and ruminal fluid volumes in wethers fed or unfed for 72 hours, 216
Deterministic Models
Modeling selection for production traits under constant infection pressure, 2809
Development
Effect of gilt development diet on the reproductive performance of primiparous sows, 1125
Expression of two variants of growth hormone receptor messenger ribonucleic acid in porcine liver, 306
Dexamethasone
Differential effects of dexamethasone and clenbuterol on rat growth and on β_2-adrenoceptors in lung and skeletal muscle, 604
Effects of triglyceride accumulation on induction of urea synthesis by glucagon and dexamethasone in monolayer cultures of bovine hepatocytes, 1659
Diagnosis
Real-time ultrasonography and pregnancy diagnosis in swine, E34
Diet
Conjugated linoleic acid (CLA): A ruminant fatty acid with beneficial effects on human health, E29
Effect of gilt development diet on the reproductive performance of primiparous sows, 1125
Effect of magnesium mica on performance and carcass quality of growing-finishing swine, 2135
Effects of pelleting and storage of a complex nursery pig diet on lysine bioavailability, 341
Grazing methods and stocking rates for direct-seeded alfalfa pastures: II. Pasture quality and diet selection, 2202
Diet Treatment
A review of the impact of feedlot management and nutrition on carcass measurements of feedlot cattle, E30
Dietary Fat
Dietary fats as reproductive nutraceuticals in beef cattle, E14
Effects of dietary fat and sire breed on puberty, weight, and reproductive traits of F_1 beef heifers, 2244
Dietary Protein
Influence of chlortetracycline and dietary protein level on visceral organ mass of growing beef steers, 3169
Digestibility
Brown midrib-3 corn silage improves digestion but not performance of growing beef steers, 2957
Digestibility of prairie hay diets supplemented with different levels of magnesium-mica by beef heifers, 718
Effect of high-oil corn on growth performance, diet digestibility, and energy content of finishing diets fed to beef cattle, 2257
Effects of base ingredient in cooked molasses blocks on intake and digestion of prairie hay by beef steers, 167
Effects of dietary carbohydrates and buffering capacity on nutrient digestibility and manure characteristics in finishing pigs, 3096
Effects of supplemental degradable intake protein on utilization of medium- to low-quality forages, 224
Growth performance and digestive and metabolic responses of gilts penned individually or in groups of four, 597
Influence of feed intake fluctuation and frequency of feeding on nutrient digestion, digesta kinetics, and ruminal fermentation profiles in limit-fed steers, 2215
Intake, digestibility, and composition of orchardgrass and alfalfa silages treated with cellulase, inoculant, and formic acid fed to lambs, 2980
Intraruminal supplementation with increasing levels of exogenous polysaccharide-degrading enzymes: Effects on nutrient digestion in cattle fed a barley grain diet, 477
Nutritional value of a genetically improved high-lysine, high-oil corn for young pigs, 2144
The effect of texturized vegetable protein containing soy carbohydrate on oroileal transit of chromic oxide in cannulated dogs, 2633
The effects of calcium benzoate in diets with or without organic acids on dietary buffering capacity, apparent digestibility, retention of nutrients, and manure characteristics in swine, 2622
Digestion
Effect of fiber source on cecal fermentation and nitrogen recycled through cecotrophy in rabbits, 638
Effects of supplemental soybean oil level on in vitro digestion and performance of prepubertal beef heifers, 504
Interaction of protein nutrition and laidlomycin on feedlot growth performance and digestive function in Holstein steers, 1768
Pretanned leather shavings in a supplement mixture for steers: I. In situ and in vitro disappearance, ruminal fermentation, and organic matter, nitrogen, and fiber digestion, 726
Pretanned leather shavings in a supplement mixture for steers: II. Digesta kinetics, ruminal fermentation, and grazing behavior in steers grazing dormant wheatgrass pasture, 735
Digestive Absorption
Portal-drained visceral metabolism of 3-hydroxybutyrate in sheep, 2223
Digestive Tract
Influence of chlortetracycline and dietary protein level on visceral organ mass of growing beef steers, 3169
Subclinical infection with the nematode *Trichostrongylus colubriformis* increases gastrointestinal tract leucine metabolism and reduces availability of leucine for other tissues, 380
Disease Models
Integrated adrenal, somatotropic, and immune responses of growing pigs to treatment with lipopolysaccharide, 1892
Disease Resistance
Modeling selection for production traits under constant infection pressure, 2809
Diseases
Acute phase responses of pigs challenged orally with *Salmonella typhimurium*, 1885
Effects of preshipping vs arrival medication with tilmicosin phosphate and feeding chlortetracycline on health and performance of newly received beef cattle, 267
Distillers Grains
Review of new information on the use of wet and dry milling feed by-products in feedlot diets, E19
DNA
Decreased growth in Angus steers with a short TG-microsatellite allele in the P1 promoter of the growth hormone receptor gene, 2099

Rapid communication: A single-strand conformation polymorphism in the ovine *interleukin-II* (*IL-II*) gene, 2754
Rapid communication: Microsatellite DNA markers (BFRO010 and BFRO011) for grayling, 488
DNA Cloning
Rapid Communication: Nucleotide sequence of red seabream, *Pagrus major*, β-actin cDNA, 2990
DNA Probes
Rapid communication: Genetic linkage and physical mapping of a porcine sequence characterized amplified region (SCAR) to chromosome 6, 3196
Dogs
β-Carotene uptake and changes in ovarian steroids and uterine proteins during the estrous cycle in the canine, 1284
Breed and sex differences in growth curves for two breeds of dog guides, 27
Estimates of genetic parameters for hip and elbow dysplasia in Finnish Rottweilers, 1141
The effect of texturized vegetable protein containing soy carbohydrate on oroileal transit of chromic oxide in cannulated dogs, 2633
Double Muscling
Genetic parameters for direct and maternal calving ability over parities in Piedmontese cattle, 2532
Duodenal Fluids
Ruminal fermentation and duodenal flow following progressive inoculations of fauna-free wethers with major individual species of ciliate protozoa or total fauna, 750
Duodenum
Determination of the methionine requirement of growing double-muscled Belgian Blue bulls with a three-step method, 233
Dysplasia
Estimates of genetic parameters for hip and elbow dysplasia in Finnish Rottweilers, 1141
Dystocia
Genetic parameters for direct and maternal calving ability over parities in Piedmontese cattle, 2532

E

Early Weaning
Accounting for lactation length and weaning-to-conception interval in genetic evaluations for litter size in swine, 1796
East Friesian (Sheep Breed)
East Friesian germplasm: Effects on milk production, lamb growth, and lamb survival, E7
Economic Analysis
Grazing methods and stocking rates for direct-seeded alfalfa pastures: III. Economics of alternative stocking rates for alfalfa pastures, 2209
Economics
Economic value of characteristics in heifer development: ReproSim software, E4
EDTA
Reduced oxygen tension and EDTA improve bovine zygote development in a chemically defined medium, 152
Efficiency
Evaluation of Egyptian sheep production systems: I. Breed crosses and management systems, 283
Lactation and calf weight traits of mature crossbred cows fed varying daily levels of metabolizable energy, 7
Eggs
A sperm's perspective of fertilization, E17
Elbows
Estimates of genetic parameters for hip and elbow dysplasia in Finnish Rottweilers, 1141
Electrical Stimulation
Effects of a unique application of electrical stimulation on tenderness, color, and quality attributes of the beef longissimus muscle, 1504
Electrolytes
Dehydration, stress, and water consumption of horses during long-distance commercial transport, 2568
Electrophysiology
Effect and absorption of histamine in sheep rumen: Significance of acidotic epithelial damage, 464
Embryo Development
Fetal development of in vitro-produced embryos: Possible association with uterine function, E15
Embryo Mortality
Ability of induced corpora lutea to maintain pregnancy in beef cows, 2942
Embryonic Development
Influence of vitamin A injection before mating on oocyte development, follicular hormones, and ovulation in gilts fed high-energy diets, 1598
Embryos
Consequences of different patterns of feed intake during the estrous cycle in gilts on subsequent fertility, 1556
Dietary energy source at two feeding levels during lactation of primiparous sows: II. Effects on periestrus hormone profiles and embryonal survival, 405
Nitrogen metabolism and fertility in cattle: II. Development of oocytes recovered from heifers offered diets differing in their rate of nitrogen release in the rumen, 2670
The effect of time of artificial insemination on fertilization status and embryo quality in superovulated cows, 2081
Endometrium
Morphology of luminal and glandular epithelial cells from pig endometrium grown on plastic or extracellular matrices, 131
Rapid communication: the ovine cDNA encoding interferon-stimulated gene product 17 (ISG17), 1394
Endophytes
Influence of consumption of endophyte-infested tall fescue hay on performance of heifers and lambs, 358
Energy
Effect of high-oil corn on growth performance, diet digestibility, and energy content of finishing diets fed to beef cattle, 2257
Effects of diet forage:concentrate ratio and metabolizable energy intake on visceral organ growth and in vitro oxidative capacity of gut tissues in sheep, 760
Preferences for foods varying in macronutrients and tannins by lambs supplemented with polyethylene glycol, 1443
The influence of recombinant bovine somatotropin on dietary energy level-related growth of Holstein-Friesian bull calves, 621
Timing of realimentation of mature cows that were feed-restricted during pregnancy influences calf birth weights and growth rates, 2790
Energy Balance
Effect of dietary energy on milk production and metabolic hormones in thin, primiparous beef heifers, 530
Energy balance of lactating primiparous sows as affected by feeding level and dietary energy source, 1520
Energy Metabolism
Energy metabolism in lactating beef heifers, 2696
Energy Sources
Dietary energy source at two feeding levels during lactation of primiparous sows: I. Effects on glucose, insulin, and luteinizing hormone and on follicle development, weaning-to-estrus interval, and ovulation rate, 396
Dietary energy source at two feeding levels during lactation of primiparous sows: II. Effects on periestrus hormone profiles and embryonal survival, 405
Energy balance of lactating primiparous sows as affected by feeding level and dietary energy source, 1520
Environment
Genotype × environment interactions in Angus, Brahman, and reciprocal-cross cows and their calves grazing common bermudagrass, endophyte-infected tall fescue pastures, or both forages, 546
Immune status of PIC Camborough-15 sows, 25% Meishan sows, and their offspring kept indoors and outdoors, 2561
Environment Interaction
Parameter estimates for number of lambs born at different ages and for 18-month body weight of Rambouillet sheep, 2086
Environmental Temperature
Acetyl-CoA carboxylase and fatty acid synthase activity and immunodetectable protein in adipose tissues of ruminants: Effect of temperature and feeding level, 2383
Effect of dietary lysine level and environmental temperature during the finishing phase on the intramuscular fat content of pork, 1272
Enzymes
Bovine placental protease specificity toward muscle connective tissue proteins, 1861

Intraruminal supplementation with increasing levels of exogenous polysaccharide-degrading enzymes: Effects on nutrient digestion in cattle fed a barley grain diet, 477
Ovine adipose tissue monounsaturated fat content is correlated to depot-specific expression of the stearoyl-CoA desaturase gene, 62
Epidemiology
Heritabilities of and genetic relationships between salmonella resistance traits in broilers, 2287
Epithelium
Effects of diet forage:concentrate ratio and metabolizable energy intake on isolated rumen epithelial cell metabolism in vitro, 771
Preparation of an epithelium-free mammary fat pad and subsequent mammogenesis in ewes, 2177
Ergot Alkaloids
Ergotamine alters plasma concentrations of glucagon, insulin, cortisol, and triiodothyronine in cows, 690
Physiological responses of Brahman and Hereford steers to an acute ergotamine challenge, 124
Estradiol
Endocrine studies in ivermectin-treated heifers from birth to puberty, 817
Interestrous interval of cyclic gilts is decreased by systemic but not intrauterine administration of exogenous oxytocin, 2393
Serum concentrations of IGF-I, estradiol-17β, testosterone, and relative amounts of IGF binding proteins (IGFBP) in growing boars, barrows, and gilts, 2581
Serum concentrations of luteinizing hormone, growth hormone, testosterone, estradiol, and leptin in boars treated with n-methyl-D,L-aspartate, 365
The strategic use of estradiol to enhance fertility and submission rates of progestin-based estrus synchronization programs in dairy herds, 523
Use of a small dose of estradiol benzoate during diestrus to synchronize development of the ovulatory follicle in cattle, 145
Estrogens
Influence of castration and estrogen replacement on sexual behavior of female-oriented, male-oriented, and asexual rams, 1947
Estrous
β-Carotene uptake and changes in ovarian steroids and uterine proteins during the estrous cycle in the canine, 1284
Estrous Cycle
Interestrous interval of cyclic gilts is decreased by systemic but not intrauterine administration of exogenous oxytocin, 2393
Estrus
Current concepts in synchronization of estrus and ovulation of dairy cows, E39
Current concepts in estrus synchronization in swine, E35
Development of an estrus synchronization protocol for beef cattle with short-term feeding of melengestrol acetate: 7-11 synch, 2186
Effect of subcutaneous vs intramuscular administration of P.G. 600 on estrual and ovulatory responses of prepubertal gilts, 732
Effects of boar contact and housing conditions on estrus expression in weaned sows, 871
Management and financial considerations affecting the decision to synchronize estrus in beef females, E37
Responsiveness to boar stimuli and change in vulvar reddening in relation to ovulation in weaned sows, 3019
Synchronizing estrus and(or) ovulation in beef cows after combinations of GnRH, norgestomet, and prostaglandin $F_{2\alpha}$ with or without timed insemination, 1747
The effect of time of artificial insemination on fertilization status and embryo quality in superovulated cows, 2081
Use of a small dose of estradiol benzoate during diestrus to synchronize development of the ovulatory follicle in cattle, 145
Estrus Synchronization
Current concepts in synchronization of estrus: Sheep and goats, E36
Ethics
Definition of animal breeding goals for sustainable production systems, 570
Ethyl Benzoate
Effect of dietary glycine and benzoate level on benzoate metabolism in mink (*Mustela vison*), blue fox (*Alopex lagopus*), and raccoon dog (*Nyctereutes procyonoides*), 976
Ewe Productivity
Evaluation of Dorset, Finnsheep, Romanov, Texel, and Montadale breeds of sheep: I. Effects of ram breed on productivity of ewes of two crossbred populations, 1422
Excitatory Amino Acid Derivatives
Neuroendocrine regulation of reproduction in male domestic animal species: Role of excitatory amino acids, E16
Experimental Design
Defining the experimental unit in grazing trials, E6
Designing and conducting experiments for range beef cows, E42
Exports
Quantification of pork belly and Boston butt quality attribute preferences of South Korean customers, 2608

F

Farrowing
Farrowing hut design and sow genotype (Camborough-15 vs 25% Meishan) effects on outdoor sow and litter productivity, 2832
Farming Systems Research
Success and failure of decision support systems: Learning as we go, E27
Fat
A QTL on pig chromosome 4 affects fatty acid metabolism: Evidence from an Iberian by Landrace intercross, 2525
Body weight and tissue gain in lambs fed an all-concentrate diet and implanted with trenbolone acetate or grazed on alfalfa, 1117
Effect of dietary lysine level and environmental temperature during the finishing phase on the intramuscular fat content of pork, 1272
Effects of on-farm diets for organic pig production on performance and carcass quality, 1199
Effects of ruminally protected choline and dietary fat on performance and blood metabolites of finishing heifers, 2497
Influence of ruminal biohydrogenation on the feeding value of fat in finishing diets for feedlot cattle, 1738
Interaction of dietary magnesium level on the feeding value of supplemental fat in finishing diets for feedlot steers, 2072
Near infrared spectrosocopy for biomonitoring: Cow milk composition measurement in a spectral region from 1,100 to 2,400 nanometers, 515
Fat Metabolism
The effect of adipocyte and heart fatty acid-binding protein genes on intramuscular fat and backfat content in Meishan crossbred pigs, 552
Fat Thickness
Growth performance and adipose tissue deposition in barrows fed n-methyl-D,L-aspartate, 2504
Fats
Biosynthesis of conjugated linoleic acid in ruminants, E28
Conjugated linoleic acid (CLA): A ruminant fatty acid with beneficial effects on human health, E29
Fattening
Effect of degree of corn processing on urinary nitrogen composition, serum metabolite and insulin profiles, and performance by finishing steers, 2464
Fatty-Acid Synthase
Acetyl-CoA carboxylase and fatty acid synthase activity and immunodetectable protein in adipose tissues of ruminants: Effect of temperature and feeding level, 2383
Expression of porcine transcription factors and genes related to fatty acid metabolism in different tissues and genetic populations, 2127
Fatty Acids
Adaptations of glucose metabolism in multiparous sows: Effects of pregnancy and feeding level, 2933
A QTL on pig chromosome 4 affects fatty acid metabolism: Evidence from an Iberian by Landrace intercross, 2525
Characteristics of Lacha and Rasa Aragonesa lambs slaughtered at three live weights, 3070
Dietary copper effects on lipid metabolism and circulating catecholamine concentrations in finishing steers, 2737
Dietary copper effects on lipid metabolism, performance, and ruminal fermentation in finishing steers, 2452
Effects of dietary copper source and concentration on carcass characteristics and lipid and cholesterol metabolism in growing and finishing steers, 1053

Effects of soybean oil and dietary copper on ruminal and tissue lipid metabolism in finishing steers, 2713
Effects of supplemental soybean oil level on in vitro digestion and performance of prepubertal beef heifers, 504
Fatty acid composition, including conjugated linoleic acid, of intramuscular fat from steers offered grazed grass, grass silage, or concentrate-based diets, 2849
Plasma fatty acids, prostaglandin $F_{2\alpha}$ metabolite, and reproductive response in postpartum heifers fed rumen bypass fat, 139
Site of administration and duration of feeding oleamide to cattle on feed intake and ruminal fatty acid concentrations, 2745

Fatty Liver
Effects of triglyceride accumulation on induction of urea synthesis by glucagon and dexamethasone in monolayer cultures of bovine hepatocytes, 1659

Fearfulness
Reducing veal calves' reactivity to people by providing additional human contact, 1213

Feather Meal
Effect of feather meal as a source of valine for lactating sows, 120
Evaluation of feather meal as a source of sulfur amino acids for growing steers, 207

Feed Additives
Effects of pelleting and pellet conditioning temperatures on weanling pig performance, 3014

Feed Dispensers
Effects of eating space and availability of water in feeders on productivity and eating behavior of grower/finisher pigs, 865

Feed Intake
Characteristics of Line 1 Hereford females resulting from selection by independent culling levels for below-average birth weight and high yearling weight or by mass selection for high yearling weight, 2292
Effects of crude protein concentration in diets of feedlot steers fed to achieve stepwise increases in rate of gain, 3036
Effects of temperature and plane of nutrition on beta-adrenergic receptors in heart, kidney, and liver of lambs, 1907
Genetic, nutritional and endocrine support of milk synthesis in dairy cows, 59A
Lactational and subsequent reproductive responses of lactating sows to dietary lysine (protein) concentration, 348
Lactation and calf weight traits of mature crossbred cows fed varying daily levels of metabolizable energy, 7
Nitrogen metabolism and fertility in cattle: I. Adaptive changes in intake and metabolism to diets differing in their rate of energy and nitrogen release in the rumen, 2659
Site of administration and duration of feeding oleamide to cattle on feed intake and ruminal fatty acid concentrations, 2745
The effect of feed intake level on splanchnic metabolism in growing beef steers, 1084

Feed Rations
Effect of starter feeding program on growth performance and gains of body components from weaning to market weight in swine, 2885
Using genetic evaluations for growth and maternal gain from birth to weaning to predict energy requirements of Line 1 Hereford beef cows, 2299

Feed Supplements
Designing mineral supplementation of forage programs for beef cattle, E13
Effects of base ingredient in cooked molasses blocks on intake and digestion of prairie hay by beef steers, 167
Effects of supplemental zinc concentration and source on performance, carcass characteristics, and serum values in finishing beef steers, 2801
Effects of supplementing prairie hay with corn and soybean meal on intake, digestion, and ruminal measurements by beef steers, 3144

Feeding
Dietary energy source at two feeding levels during lactation of primiparous sows: I. Effects on glucose, insulin, and luteinizing hormone and on follicle development, weaning-to-estrus interval, and ovulation rate, 396
Dietary energy source at two feeding levels during lactation of primiparous sows: II. Effects on periestrus hormone profiles and embryonal survival, 405
Effect of short-term feed restriction and calorie source on hormonal and metabolic responses in geldings receiving a small meal, 3107
Energy balance of lactating primiparous sows as affected by feeding level and dietary energy source, 1520
The effects of corn milling coproducts on growth performance and diet digestibility by beef cattle, 1

Feeding Behavior
Effect of a trainer cow on health, behavior, and performance of newly weaned beef calves, 1716
Intake and chewing behavior of steers consuming switchgrass preserved as hay or silage, 1983

Feeding Frequency
Effects of degree of fat saturation on fiber digestion and microbial protein synthesis when diets are fed twelve times daily, 2412

Feeding Preferences
Roles of novelty, generalization, and postingestive feedback in the recognition of foods by lambs, 3060

Feedlots
A review of the impact of feedlot management and nutrition on carcass measurements of feedlot cattle, E30
Effect of a trainer cow on health, behavior, and performance of newly weaned beef calves, 1716
Effects of crude protein concentration in diets of feedlot steers fed to achieve stepwise increases in rate of gain, 3036
Effects of energy intake, implantation, and subcutaneous fat end point on feedlot steer performance and carcass composition, 825
Grazing methods and stocking rates for direct-seeded alfalfa pastures: I. Plant productivity and animal performance, 2192
Growth-Promoting systems for heifer calves and yearlings finished in the feedlot, 2485
Influence of *Bos indicus* crossbreeding and cattle age on apparent utilization of a high-grain diet, 1641
Use of trainer animals to improve performance and health of newly arrived feedlot calves, 539

Feeds
Performance and meat quality of beef steers fed corn-based or bread by-product-based diets, 784

Female Fertility
Current concepts in estrus synchronization in swine, E35

Fertility
Additive genetic parameter estimates for heifer pregnancy and subsequent reproduction in Angus females, 2091
Artificial insemination outcomes in beef females using bovine sperm with a detectable fertility-associated antigen, 795
A sperm's perspective of fertilization, E17
Duration of the seasonal anestrus in sheep selected for fertility in a fall-lambing system, 1149
The importance of seminal plasma on the fertility of subsequent artificial inseminations in swine, 443

Fertilizers
Effects of pasture applied biosolids on performance and mineral status of grazing beef heifers, 1331

Festuca
Alterations in hemograms and serum biochemical analytes of steers after prolonged consumption of endophyte-infected tall fescue, 1029
Impacts of an endophyte-infected fescue seed diet on traits of mouse lines divergently selected for response to that same diet, 1191

Festuca arundinacea
Influence of consumption of endophyte-infested tall fescue hay on performance of heifers and lambs, 358
Pretanned leather shavings in a supplement mixture for steers: I. In situ and in vitro disappearance, ruminal fermentation, and organic matter, nitrogen, and fiber digestion, 726

Festuca Poisoning
Ergotamine alters plasma concentrations of glucagon, insulin, cortisol, and triiodothyronine in cows, 690
Physiological responses of Brahman and Hereford steers to an acute ergotamine challenge, 124

Fetus
Fetal development of in vitro-produced embryos: Possible association with uterine function, E15
Nutritional regulation of the genes encoding the acid-labile subunit and other components of the circulating insulin-like growth factor system in the sheep, 2681

Fiber
Brown midrib-3 corn silage improves digestion but not performance of growing beef steers, 2957
Effect of fiber source on cecal fermentation and nitrogen recycled through cecotrophy in rabbits, 638

Protein kinetics in callipyge lambs, 78
Finishing
Palatability of wethers fed an 80% barley diet processed at different ages and of yearling wethers grazed on native range, 1779
Fishes
Rapid communication: Microsatellite DNA markers (BFRO010 and BFRO011) for grayling, 488
Fitness
Plasma cortisol and ACTH concentrations in the warmblood horse in response to a standardized treadmill exercise test as physiological markers for evaluation of training status, 1936
Flaking
Net absorption and hepatic metabolism of glucose, L-lactate, and volatile fatty acids by steers fed diets containing sorghum grain processed as dry-rolled or steam-flaked at different densities, 1364
Splanchnic nitrogen metabolism by growing beef steers fed diets containing sorghum grain flaked at different densities, 1355
Flavor
Palatability of wethers fed an 80% barley diet processed at different ages and of yearling wethers grazed on native range, 1779
Roles of novelty, generalization, and postingestive feedback in the recognition of foods by lambs, 3060
Floor Space
Group size and floor-space allowance can affect weanling-pig performance, 2062
Flounder
Rapid communication: *Poli-RC35-TUF*, a highly polymorphic microsatellite marker in the Japanese flounder, *Paralichthys olivaceus*, 1690
Flow Cytometry
Factors regulating apoptosis during folliculogenesis in pigs, E24
Fluctuations
Influence of feed intake fluctuation and frequency of feeding on nutrient digestion, digesta kinetics, and ruminal fermentation profiles in limit-fed steers, 2215
Folic Acid
Genetic, nutritional and endocrine support of milk synthesis in dairy cows, 59A
Follicle Activity
Effects of mimosine on fiber shedding, follicle activity, and fiber regrowth in Spanish goats, 1551
Follicles
Evaluation of numbers of microscopic and macroscopic follicles in cattle selected for twinning, 1564
Impact of dietary lysine intake during lactation on follicular development and oocyte maturation after weaning in primiparous sows, 993
Influence of vitamin A injection before mating on oocyte development, follicular hormones, and ovulation in gilts fed high-energy diets, 1598
Ovarian and endocrine characteristics during an estrous cycle in Angus, Brahman, and Senepol cows in a subtropical environment, 1291
The effect of acute nutritional change on follicle wave turnover, gonadotropin, and steroid concentration in beef heifers, 429
Folliculogenesis
Evaluation of numbers of microscopic and macroscopic follicles in cattle selected for twinning, 1564
Food
Behavioral reactivity of cattle toward novel food: Effects of testing time and food type of neighbors, 2323
Total radioactive residues and clenbuterol residues in swine after dietary administration of [^{14}C]clenbuterol for seven days and preslaughter withdrawal periods of zero, three, or seven days, 2903
Food Acceptability
Roles of novelty, generalization, and postingestive feedback in the recognition of foods by lambs, 3060
Food Preferences
Effect of individual terpenes on consumption of alfalfa pellets by sheep, 1636
Roles of novelty, generalization, and postingestive feedback in the recognition of foods by lambs, 3060
Food Prices
How can the beef industry recapture lost consumer demand?, E40
Food Restriction
Acetyl-CoA carboxylase and fatty acid synthase activity and immunodetectable protein in adipose tissues of ruminants: Effect of temperature and feeding level, 2383
Brown midrib-3 corn silage improves digestion but not performance of growing beef steers, 2957
Effect of feed restriction on adipose tissue transcript concentrations in genetically lean and obese pigs, 934
Effect of short-term feed restriction and calorie source on hormonal and metabolic responses in geldings receiving a small meal, 3107
Influence of feed intake fluctuation and frequency of feeding on nutrient digestion, digesta kinetics, and ruminal fermentation profiles in limit-fed steers, 2215
Food Safety
Consumer reactions, popular fancies, and scientific facts related to the healthfulness of meat products, E10
Forages
Designing mineral supplementation of forage programs for beef cattle, E13
Effects of base ingredient in cooked molasses blocks on intake and digestion of prairie hay by beef steers, 167
Effects of supplemental degradable intake protein on utilization of medium- to low-quality forages, 224
Forage systems for production of stocker steers in the upper south, 1973
Genotype × environment interactions in Angus, Brahman, and reciprocal-cross cows and their calves grazing common bermudagrass, endophyte-infected tall fescue pastures, or both forages, 546
Foraging
Undegraded intake protein supplementation: I. Effects on forage utilization and performance of periparturient beef cows fed low-quality hay, 449
Formate
Effect of dietary formates on growth performance, carcass traits, sensory quality, intestinal microflora, and stomach alterations in growing-finishing pigs, 1875
Frequency
Influence of feed intake fluctuation and frequency of feeding on nutrient digestion, digesta kinetics, and ruminal fermentation profiles in limit-fed steers, 2215
FSH
Comparison of plasma FSH concentration in boars and gilts from lines selected for ovulation rate and embryonal survival, and litter size and estimation of (co)variance components for FSH and ovulation rate, 1430
Ovarian and endocrine characteristics during an estrous cycle in Angus, Brahman, and Senepol cows in a subtropical environment, 1291
The effect of acute nutritional change on follicle wave turnover, gonadotropin, and steroid concentration in beef heifers, 429
Fur Animals
Effect of dietary glycine and benzoate level on benzoate metabolism in mink (*Mustela vison*), blue fox (*Alopex lagopus*), and raccoon dog (*Nyctereutes procyonoides*), 976
Fur Quality
Silkiness in brown mink pelts characterized with optical methods, 1697

G

Gelbvieh
Evaluation of crossbred calf and cow types for the coastal plain of North Carolina, 2253
Gender Relations
Transfer student and gender issues within the Department of Animal Science at Texas A&M University, 3184
Gene Expression
ARPP-16 mRNA is up-regulated in the longissimus muscle of pigs possessing an elevated growth rate, 1475
Insulin regulation of leptin expression in streptozotocin diabetic pigs, 1497
Messenger ribonucleic acid expression of the MyoD gene family in muscle tissue at slaughter in relation to selection for porcine growth rate, 69
Gene Mapping
Initial results of genomic scans for ovulation rate in a cattle population selected for increased twinning rate, 3053

Rapid communication: Genetic linkage and physical mapping of a porcine sequence characterized amplified region (SCAR) to chromosome 6, 3196
Rapid communication: Linkage and physical mapping of the porcine *melanocortin-4 receptor* (*MC4R*) gene, 791
Rapid communication: Linkage mapping of the porcine *Agouti* gene, 1395
Rapid Communication: Mapping of the *Mannose-Binding Lectin 2* (*MBL2*) gene to pig chromosome 14, 2992
Rapid communication: Mapping of the *Myeloperoxidase* (*MPO*) gene to pig chromosome 12, 3189
Rapid communication: physical and genetic mapping of the *Peroxisome Proliferator Activated Receptor* γ (*PPAR*γ) gene to porcine chromosome 13, 1392
Rapid communication: Porcine vitamin D-25-hydroxylase maps to chromosome 5, 3193
Gene Transfer
Plasmid transfection and retroviral transduction of porcine muscle cells for cell-mediated gene transfer, 909
Genes
Decreased growth in Angus steers with a short TG-microsatellite allele in the P1 promoter of the growth hormone receptor gene, 2099
Rapid communication: Localization of POU1F1 to bovine, ovine, and caprine 1q21-22, 242
Rapid communication: Mapping of the *Mannose-Binding Lectin 2* (*MBL2*) gene to pig chromosome 14, 2992
Rapid communication: Single nucleotide polymorphisms detected in exon 10 of the bovine *growth hormone receptor* gene, 2230
Genetic Analysis
Genetic differentiation among geographically isolated populations of Criollo cattle and their divergence from other *Bos taurus* breeds, 2314
Genetic Correlations
Genetic analysis of litter size in Targhee, Suffolk, and Polypay sheep, 2113
Genetic and environmental parameters for traits derived from the Brody growth curve and their relationships with weaning weight in Angus cattle, 1436
Genetic parameters among weight, prolificacy, and wool traits of Columbia, Polypay, Rambouillet, and Targhee sheep, 846
Parameter estimates for genetic effects on carcass traits of Korean Native Cattle, 1181
Parameter estimates for greasy fleece weight of Rambouillet sheep at different ages, 2108
Parameter estimates for number of lambs born at different ages and for 18-month body weight of Rambouillet sheep, 2086
Using genetic evaluations for growth and maternal gain from birth to weaning to predict energy requirements of Line 1 Hereford beef cows, 2299
Genetic Improvement
Evaluation of calpastatin activity measures in ante- and postmortem muscle from half-sib bulls and steers, 804
Genetic Mapping
Bovine *CAPN1* maps to a region of BTA29 containing a quantitative trait locus for meat tenderness, 2589
Linkage mapping of the Mahogany (attractin) locus in cattle and pigs, 2480
Genetic Markers
Quantitative trait loci affecting growth and carcass composition of cattle segregating alternate forms of myostatin, 560
The effect of adipocyte and heart fatty acid-binding protein genes on intramuscular fat and backfat content in Meishan crossbred pigs, 552
Genetic Parameters
Additive genetic parameter estimates for heifer pregnancy and subsequent reproduction in Angus females, 2091
Characteristics of Line 1 Hereford females resulting from selection by independent culling levels for below-average birth weight and high yearling weight or by mass selection for high yearling weight, 2292
Estimates of genetic parameters for hip and elbow dysplasia in Finnish Rottweilers, 1141
Genetic analyses of live-animal ultrasound and abattoir carcass traits in Australian Angus and Hereford cattle, 1786
Genetic analysis of growth curve parameters for male and female chickens resulting from selection on shape of growth curve, 2515
Genetic parameter estimates for serum insulin-like growth factor-I concentration and carcass traits in Angus beef cattle, 2305
Genetic parameters and relationships between hip height and weight in Brahman cattle, 3045
Genetic parameters for direct and maternal calving ability over parities in Piedmontese cattle, 2532
Parameter estimates for direct and maternal genetic effects on yearling, eighteen-month, and slaughter weights of Korean native cattle, 1414
Variance and covariance components for weaning weight for Herefords in three countries, 33
Genetic Polymorphism
Rapid communication: A single-strand conformation polymorphism in the ovine *interleukin-2* (*IL-2*) gene, 2754
Rapid Communication: Mapping of the *Mannose-Binding Lectin 2* (*MBL2*) gene to pig chromosome 14, 2992
Genetic Resistance
Sporidesmin-Induced mortality and histological lesions in mouse lines divergently selected for response to toxins in endophyte-infected fescue, 2157
Genetic Trend
Twinning rate in Norwegian cattle: Frequency, (co)variance components, and genetic trends, 15
Genetic Variation
Genetic differentiation among geographically isolated populations of Criollo cattle and their divergence from other *Bos taurus* breeds, 2314
Maternal birth weight breeding value as an additional factor to predict calf birth weight in beef cattle, 21
Preweaning growth curves in Brown Swiss and Pirenaica calves with emphasis on individual variability, 1132
Genetics
Effect of the callipyge gene on muscle growth, calpastatin activity, and tenderness of three muscles across the growth curve, 2836
Effects of genetic type and protein levels on growth of swine, E32
Genetic aspects of replacement heifers in current and future production systems, E3
Genetic correlations for daily gain between ram and ewe lambs fed in feedlot conditions and ram lambs fed in Pinpointer units, 1155
Heritabilities of and genetic relationships between salmonella resistance traits in broilers, 2287
Modeling selection for production traits under constant infection pressure, 2809
Simple example illustrating adjustment for merit of mates in a national cattle evaluation program, 2475
Genome Analysis
Identification of quantitative trait loci affecting birth characters and accumulation of backfat and weight in a Meishan-White Composite resource population, 2547
Genotypes
Genotype × environment interactions in Angus, Brahman, and reciprocal-cross cows and their calves grazing common bermudagrass, endophyte-infected tall fescue pastures, or both forages, 546
Immune status of PIC Camborough-15 sows, 25% Meishan sows, and their offspring kept indoors and outdoors, 2561
Parameter estimates for number of lambs born at different ages and for 18-month body weight of Rambouillet sheep, 2086
Genotype Environment Interaction
Investigation of genotype × environment interactions for weaning weight for Herefords in three countries, 2121
Parameter estimates for greasy fleece weight of Rambouillet sheep at different ages, 2108
Genotype Mixtures
Technical note: Constrained optimization of breed composition in composite populations to balance net merit and risk, 2105
Gibbs Sampling
Genetic analysis of growth curve parameters for male and female chickens resulting from selection on shape of growth curve, 2515
Gilts
Consequences of different patterns of feed intake during the estrous cycle in gilts on subsequent fertility, 1556
Current concepts in estrus synchronization in swine, E35
Effect of gilt development diet on the reproductive performance of primiparous sows, 1125
Effect of subcutaneous vs intramuscular administration of P.G. 600 on estrual and ovulatory responses of prepubertal gilts, 1732

Further assessment of the dietary lysine requirement of finishing gilts, 987
Growth performance and digestive and metabolic responses of gilts penned individually or in groups of four, 597
Glucagon
Effects of triglyceride accumulation on induction of urea synthesis by glucagon and dexamethasone in monolayer cultures of bovine hepatocytes, 1659
Ergotamine alters plasma concentrations of glucagon, insulin, cortisol, and triiodothyronine in cows, 690
The effect of feed intake level on splanchnic metabolism in growing beef steers, 1084
Glucocorticoid Receptor
The effects of mutated skeletal ryanodine receptors on hypothalamic-pituitary-adrenal axis function in boars, 1319
Glucocorticoids
Modulation of porcine adipocyte β-adrenergic receptors by hormones and butyrate, 927
The influence of dexamethasone and insulin on expression of CCAAT/enhancer binding protein isoforms during preadipocyte differentiation in porcine stromal-vascular cell cultures: Evidence for very early expression of C/EBPα, 1227
Glucose
Chromium supplementation does not influence glucose metabolism or insulin action in response to cold exposure in mature sheep, 2950
Effects of dietary lysine intake during lactation on blood metabolites, hormones, and reproductive performance in primiparous sows, 1001
The effect of the plasma glucose level on the abomasal function in dairy cows, 1930
Glucose Tolerance
Adaptations of glucose metabolism in multiparous sows: Effects of pregnancy and feeding level, 2933
Effect of dietary chromium-L-methionine on glucose metabolism of beef steers, 3177
Glutathione Transferase
Impacts of an endophyte-infected fescue seed diet on traits of mouse lines divergently selected for response to that same diet, 1191
Glycolysis
Frequency of the Rendement Napole RN$^-$ allele in a population of American Hampshire pigs, 1811
GnRH
Gonadal function, sexual behavior, feedlot performance, and carcass traits of ram lambs actively immunized against GnRH, 2237
Relationships of gonadotropins, testosterone, and cortisol in response to GnRH and GnRH antagonist in boars selected for high and low follicle-stimulating hormone levels, 1577
Synchronizing estrus and(or) ovulation in beef cows after combinations of GnRH, norgestomet, and prostaglandin F_2 with or without timed insemination, 1747
The effects of active immunization against GnRH on testicular development, feedlot performance, and carcass characteristics of beef bulls, 2778
Goat
Carcass traits and retail display-life of chops from different goat breed types, 1262
Rapid communication: Polymorphism in the goat *β-lactoglobulin* proximal promoter region, 1101
Goat Breeds
Carcass traits and retail display-life of chops from different goat breed types, 1262
Goat Feeding
Carcass traits and retail display-life of chops from different goat breed types, 1262
Goat Meat
Carcass traits and retail display-life of chops from different goat breed types, 1262
Goats
Adrenal function in Angora goats: A comparative study of adrenal steroidogenesis in Angora goats, Boer goats, and Merino sheep, 1036
A kinetic model of phosphorus metabolism in growing goats, 2706
Current concepts in synchronization of estrus: Sheep and goats, E36
Effect of level of whole cottonseed on intake, digestibility, and performance of growing male goats fed hay-based diets, 1677
Effects of dietary protein concentration on postweaning growth of Boer crossbred and Spanish goat wethers, 2275
Investigation of the primary cause of hypoadrenocorticism in South African Angora goats (*Capra aegagrus*): A comparison with Boer goats (*Capra hircus*) and Merino sheep (*Ovis aries*), 371
Rapid communication: Genetic linkage mapping of a caprine microsatellite derived from a genomic clone containing the *INHA* gene, 2482
Rapid communication: Localization of POU1F1 to bovine, ovine, and caprine 1q21-22, 242
Transportation of goats: Effects on physiological stress responses and live weight loss, 1450
Gonadotropins
Endocrine studies in ivermectin-treated heifers from birth to puberty, 817
Endocrinology of increased ovarian folliculogenesis in cattle selected for twin births, E26
Gossypol
Effect of level of whole cottonseed on intake, digestibility, and performance of growing male goats fed hay-based diets, 1677
Graafian Follicles
Use of a small dose of estradiol benzoate during diestrus to synchronize development of the ovulatory follicle in cattle, 145
Grains
Effect of degree of corn processing on urinary nitrogen composition, serum metabolite and insulin profiles, and performance by finishing steers, 2464
Effects of planting density and processing method on laboratory characteristics of grain sorghum for ruminants, 2032
Effects of supplementing prairie hay with corn and soybean meal on intake, digestion, and ruminal measurements by beef steers, 3144
Review of new information on the use of wet and dry milling feed by-products in feedlot diets, E19
Granulosa Cells
Production of insulin-like growth factor-I by granulosa cells but not thecal cells is hormonally responsive in cattle, 2919
Grasses
Fatty acid composition, including conjugated linoleic acid, of intramuscular fat from steers offered grazed grass, grass silage, or concentrate-based diets, 2849
Feasibility of using lignin isolated from forages by solubilization in acetyl bromide as a standard for lignin analyses, 3135
Grazing
Designing and conducting experiments for range beef cows, E42
Grazing Behavior
Digesta kinetics, energy intake, grazing behavior, and body temperature of grazing beef cattle differing in adaptation to heat, 1608
Grazing Systems
Forage systems for production of stocker steers in the upper south, 1973
Grazing methods and stocking rates for direct-seeded alfalfa pastures: I. Plant productivity and animal performance, 2192
Grazing methods and stocking rates for direct-seeded alfalfa pastures: II. Pasture quality and diet selection, 2202
Group Behavior
Social behavior of grazing beef cattle: Implications for management, E18
Group Size
Feeder location did not affect performance of weanling pigs in large groups, 2784
Group size and floor-space allowance can affect weanling-pig performance, 2062
Growth performance and digestive and metabolic responses of gilts penned individually or in groups of four, 597
Growing Pig
Influence of dietary lysine and energy intakes on body protein deposition and lysine utilization in the growing pig, 1510
Growth
Added dietary pyridoxine, but not thiamin, improves weanling pig growth performance, 88
A generalized Michaelis-Menten equation for the analysis of growth, 1816
Decreased growth in Angus steers with a short TG-microsatellite allele in the P1 promoter of the growth hormone receptor gene, 2099
Differential effects of dexamethasone and clenbuterol on rat growth and on β_2-adrenoceptors in lung and skeletal muscle, 604

East Friesian germplasm: Effects on milk production, lamb growth, and lamb survival, E7
Effects of dietary protein concentration on postweaning growth of Boer crossbred and Spanish goat wethers, 2275
Effects of genetic type and protein levels on growth of swine, E32
Effects of modified tall oil versus a commercial source of conjugated linoleic acid and increasing levels of modified tall oil on growth performance and carcass characteristics of growing-finishing pigs, 2359
Effects of muscle type, castration, age, and compensatory growth rate on androgen receptor mRNA expression in bovine skeletal muscle, 629
Effects of on-farm diets for organic pig production on performance and carcass quality, 1199
Effects of supplemental zinc concentration and source on performance, carcass characteristics, and serum values in finishing beef steers, 2801
Enzyme supplementation and particle size of wheat in diets for nursery and finishing pigs, 3086
Fetal development of in vitro-produced embryos: Possible association with uterine function, E15
Genetic analysis of growth curve parameters for male and female chickens resulting from selection on shape of growth curve, 2515
Genetic analysis of litter size in Targhee, Suffolk, and Polypay sheep, 2113
Genetic correlations for daily gain between ram and ewe lambs fed in feedlot conditions and ram lambs fed in Pinpointer units, 1155
Genetic parameters among weight, prolificacy, and wool traits of Columbia, Polypay, Rambouillet, and Targhee sheep, 846
Growth- and breed-related changes of muscle fiber characteristics in cattle, 1485
Growth performance and adipose tissue deposition in barrows fed n-methyl-D,L-aspartate, 2504
Growth performance and digestive and metabolic responses of gilts penned individually or in groups of four, 597
Identification of quantitative trait loci affecting birth characters and accumulation of backfat and weight in a Meishan-White Composite resource population, 2547
Limiting amino acids for growing Holstein steers limit-fed soybean hull-based diets, 1997
Muscle fiber plasticity in farm animals, E2
Nutritional value of a genetically improved high-lysine, high-oil corn for young pigs, 2144
Parameter estimates for direct and maternal genetic effects on yearling, eighteen-month, and slaughter weights of Korean native cattle, 1414
Potential for Hair Sheep in the United States, E8

Growth Curves
A generalized Michaelis-Menten equation for the analysis of growth, 1816
Breed and sex differences in growth curves for two breeds of dog guides, 27
Characteristics of Line 1 Hereford females resulting from selection by independent culling levels for below-average birth weight and high yearling weight or by mass selection for high yearling weight, 2292
Genetic and environmental parameters for traits derived from the Brody growth curve and their relationships with weaning weight in Angus cattle, 1436

Growth Factors
Culture of porcine stromal-vascular cells in serum-free medium: Differential action of various hormonal agents on adipose conversion, 885

Growth Hormone
Response to 13 generations of selection for increased 8-week body weight in lines of mice carrying a sheep growth hormone-based transgene, 832

Growth Performance
Effect of dietary formates on growth performance, carcass traits, sensory quality, intestinal microflora, and stomach alterations in growing-finishing pigs, 1875
Effect of high-oil corn on growth performance, diet digestibility, and energy content of finishing diets fed to beef cattle, 2257
Effects of graded levels of potato by-products in barley- and corn-based beef feedlot diets: I. Feedlot performance, carcass traits, meat composition, and appearance, 1829

Growth Promoters
Implant strategies during feeding: Impact on carcass grades and consumer acceptability, 1867
Total radioactive residues and clenbuterol residues in swine after dietary administration of [^{14}C]clenbuterol for seven days and preslaughter withdrawal periods of zero, three, or seven days, 2903

Growth Rate
Effect of starter feeding program on growth performance and gains of body components from weaning to market weight in swine, 2885
Messenger ribonucleic acid expression of the MyoD gene family in muscle tissue at slaughter in relation to selection for porcine growth rate, 69
Quantitative relationship of systemic virus concentration on growth and immune response in pigs, 2690
The effects of selection of pigs on growth rate vs leanness on histochemical characteristics of different muscles, 1247

H

Hair
Potential for Hair Sheep in the United States, E8

Halothane Susceptibility
The effect of the Halothane and Rendement Napole genes on carcass and meat quality characteristics of pigs, 2862

Handling
Reducing veal calves' reactivity to people by providing additional human contact, 1213
The impact of gentle contacts on ease of handling, welfare, and growth of calves and on quality of veal meat, 1219

Hay
Digestibility of prairie hay diets supplemented with different levels of magnesium-mica by beef heifers, 718
Intake and chewing behavior of steers consuming switchgrass preserved as hay or silage, 1983

Health
Conjugated linoleic acid (CLA): A ruminant fatty acid with beneficial effects on human health, E29
Consumer reactions, popular fancies, and scientific facts related to the healthfulness of meat products, E10
Effect of a trainer cow on health, behavior, and performance of newly weaned beef calves, 1716

Heat Regulation
Investigation of the primary cause of hypoadrenocorticism in South African Angora goats (*Capra aegagrus*): A comparison with Boer goats (*Capra hircus*) and Merino sheep (*Ovis aries*), 371
The effect of thermal environment and age on neonatal pig behavior, 583

Heat Stress
Physiological responses of Brahman and Hereford steers to an acute ergotamine challenge, 124

Heifers
Administration of recombinant bovine tumor necrosis factor-α affects intermediary metabolism and insulin and growth hormone secretion in dairy heifers, 2164
Can beef heifers and young postpartum cows be physiologically and nutritionally manipulated to optimize reproductive efficiency?, E41
Economic value of characteristics in heifer development: Repro-Sim software, E4
Effect of day of the estrous cycle at the initiation of a timed artificial insemination protocol on reproductive responses in dairy heifers, 1568
Effects of protein concentration and degradability on performance, ruminal fermentation, and nitrogen metabolism in rapidly growing heifers fed high-concentrate diets from 100 to 230 kg body weight, 1667
Effects of supplemental soybean oil level on in vitro digestion and performance of prepubertal beef heifers, 504
Endocrine studies in ivermectin-treated heifers from birth to puberty, 817
Growth-Promoting systems for heifer calves and yearlings finished in the feedlot, 2485
Local regulation of pubertal mammary growth in heifers, 36A
Plasma fatty acids, prostaglandin $F_{2\alpha}$ metabolite, and reproductive response in postpartum heifers fed rumen bypass fat, 139

Procedures that support reproductive management of replacement beef heifers, E5
Technical note: Recombinant LHRH fusion protein suppresses estrus in heifers, 1310
The effect of acute nutritional change on follicle wave turnover, gonadotropin, and steroid concentration in beef heifers, 429
Height
Genetic parameters and relationships between hip height and weight in Brahman cattle, 3045
Herbage
Effect of supplements on growth and forage intake by stocker steers grazing wheat pasture, 1625
Herd Structure
Social behavior of grazing beef cattle: Implications for management, E18
Heritability
Additive genetic parameter estimates for heifer pregnancy and subsequent reproduction in Angus females, 2091
Genetic analysis of litter size in Targhee, Suffolk, and Polypay sheep, 2113
Genetic parameters among weight, prolificacy, and wool traits of Columbia, Polypay, Rambouillet, and Targhee sheep, 846
Parameter estimates for genetic effects on carcass traits of Korean Native Cattle, 1181
Parameter estimates for greasy fleece weight of Rambouillet sheep at different ages, 2108
Parameter estimates for number of lambs born at different ages and for 18-month body weight of Rambouillet sheep, 2086
Heterosis
Genotype × environment interactions in Angus, Brahman, and reciprocal-cross cows and their calves grazing common bermudagrass, endophyte-infected tall fescue pastures, or both forages, 546
Hippuric Acid
Effect of dietary glycine and benzoate level on benzoate metabolism in mink (*Mustela vison*), blue fox (*Alopex lagopus*), and raccoon dog (*Nyctereutes procyonoides*), 976
Hips
Estimates of genetic parameters for hip and elbow dysplasia in Finnish Rottweilers, 1141
Histamine
Effect and absorption of histamine in sheep rumen: Significance of acidotic epithelial damage, 464
Histidine
Influence of abomasal infusion of high levels of lysine or methionine, or both, on ruminal fermentation, eating behavior, and performance of lactating dairy cows, 1067
Histochemistry
The effects of selection of pigs on growth rate vs leanness on histochemical characteristics of different muscles, 1247
Holstein
Interaction of protein nutrition and laidlomycin on feedlot growth performance and digestive function in Holstein steers, 1768
Hormone Receptors
Expression of two variants of growth hormone receptor messenger ribonucleic acid in porcine liver, 306
Hormones
Consumer reactions, popular fancies, and scientific facts related to the healthfulness of meat products, E10
Culture of porcine stromal-vascular cells in serum-free medium: Differential action of various hormonal agents on adipose conversion, 885
Current concepts in estrus synchronization in swine, E35
Dietary fats as reproductive nutraceuticals in beef cattle, E14
Effect of short-term feed restriction and calorie source on hormonal and metabolic responses in geldings receiving a small meal, 3107
Effects of supplemental soybean oil level on in vitro digestion and performance of prepubertal beef heifers, 504
Hormonal therapy for sows weaned during fall and winter, 2068
Influence of feeding different amounts of first colostrum on metabolic, endocrine, and health status and on growth performance in neonatal calves, 896
Horses
Dehydration, stress, and water consumption of horses during long-distance commercial transport, 2568
Effect of short-term feed restriction and calorie source on hormonal and metabolic responses in geldings receiving a small meal, 3107
Physiological responses of horses to 24 hours of transportation using a commercial van during summer conditions, 1458
Plasma cortisol and ACTH concentrations in the warmblood horse in response to a standardized treadmill exercise test as physiological markers for evaluation of training status, 1936
The effect of initiation of exercise training in young horses on vitamin K status, 2353
Housing
Effects of boar contact and housing conditions on estrus expression in weaned sows, 871
Human Behavior
Relationships between human-animal interactions and productivity of commercial dairy cows, 2821
Humans
Conjugated linoleic acid (CLA): A ruminant fatty acid with beneficial effects on human health, E29
Hybridization
Rapid communication: Localization of POU1F1 to bovine, ovine, and caprine 1q21-22, 242
Hydrocortisone
Acute phase responses of pigs challenged orally with *Salmonella typhimurium*, 1885
Adrenal function in Angora goats: A comparative study of adrenal steroidogenesis in Angora goats, Boer goats, and Merino sheep, 1036
Assessment of hypothalamic-pituitary-adrenal axis and sympathetic nervous system activity in pregnant sows through the measurement of glucocorticoids and catecholamines in urine, 420
Evaluation of models of acute and subacute acidosis on dry matter intake, ruminal fermentation, blood chemistry, and endocrine profiles of beef steers, 3155
Integrated adrenal, somatotropic, and immune responses of growing pigs to treatment with lipopolysaccharide, 1892
Plasma cortisol and ACTH concentrations in the warmblood horse in response to a standardized treadmill exercise test as physiological markers for evaluation of training status, 1936
Relationships of gonadotropins, testosterone, and cortisol in response to GnRH and GnRH antagonist in boars selected for high and low follicle-stimulating hormone levels, 1577
Hydrogenation
Influence of ruminal biohydrogenation on the feeding value of fat in finishing diets for feedlot cattle, 1738
3-Hydroxybutyric Acid
Portal-drained visceral metabolism of 3-hydroxybutyrate in sheep, 2223

I

Ideal Protein
Research paradigms behind amino acid requirements of the lactating sow: Theory and future application, 48A
Identification
Effects of injection position and transponder size on the performances of passive injectable transponders used for the electronic identification of cattle, 3001
Imagery
Prediction of crude fat content of longissimus muscle of beef using the ratio of fat area calculated from computer image analysis: Comparison of regression equations for prediction using different input devices at different stations, 799
Imbalance
Methionine imbalance and toxicity in calves, 2722
Immunity
Immune status of PIC Camborough-15 sows, 25% Meishan sows, and their offspring kept indoors and outdoors, 2561
Role of supplemental vitamin E in lamb survival and production: A review, E23
Immunization
Gonadal function, sexual behavior, feedlot performance, and carcass traits of ram lambs actively immunized against GnRH, 2237
Immunological Techniques
The effects of active immunization against GnRH on testicular development, feedlot performance, and carcass characteristics of beef bulls, 2778

Immunosuppression
A porcine intrauterine 4-MDa component with transforming growth factor-β activity suppresses natural killer cell responses, 1900
Suppressor activity of bone marrow cells and localization of fluorescent-labeled bone marrow cells within ovine endometrial tissue, 709
Impedance
Using measurements of muscle color, pH, and electrical impedance to augment the current USDA beef quality grading standards and improve the accuracy and precision of sorting carcasses into palatability groups, 2595
Implantation
Effects of energy intake, implantation, and subcutaneous fat end point on feedlot steer performance and carcass composition, 825
Growth-Promoting systems for heifer calves and yearlings finished in the feedlot, 2485
Inactivation
Ionic strength-induced inactivation of μ-calpain in postmortem muscle, 2336
Infection
Effects of intramammary infection and parity on calf weaning weight and milk quality in beef cows, 2508
Information Systems
Success and failure of decision support systems: Learning as we go, E27
Injection
Effects of injection position and transponder size on the performances of passive injectable transponders used for the electronic identification of cattle, 3001
Injection of beef strip loins with solutions containing sodium tripolyphosphate, sodium lactate, and sodium chloride to enhance palatability, 952
Insulin
Adaptations of glucose metabolism in multiparous sows: Effects of pregnancy and feeding level, 2933
Administration of recombinant bovine tumor necrosis factor-α affects intermediary metabolism and insulin and growth hormone secretion in dairy heifers, 2164
Chromium supplementation does not influence glucose metabolism or insulin action in response to cold exposure in mature sheep, 2950
Dietary energy source at two feeding levels during lactation of primiparous sows: I. Effects on glucose, insulin, and luteinizing hormone and on follicle development, weaning-to-estrus interval, and ovulation rate, 396
Dietary energy source at two feeding levels during lactation of primiparous sows: II. Effects on periestrus hormone profiles and embryonal survival, 405
Effect of degree of corn processing on urinary nitrogen composition, serum metabolite and insulin profiles, and performance by finishing steers, 2464
Effect of dietary chromium-L-methionine on glucose metabolism of beef steers, 3177
Effects of dietary lysine intake during lactation on blood metabolites, hormones, and reproductive performance in primiparous sows, 1001
Ergotamine alters plasma concentrations of glucagon, insulin, cortisol, and triiodothyronine in cows, 690
Genetic, nutritional and endocrine support of milk synthesis in dairy cows, 59A
Insulin regulation of leptin expression in streptozotocin diabetic pigs, 1497
Modulation of porcine adipocyte β-adrenergic receptors by hormones and butyrate, 927
The effect of feed intake level on splanchnic metabolism in growing beef steers, 1084
The effect of the plasma glucose level on the abomasal function in dairy cows, 1930
Undegraded intake protein supplementation: II. Effects on plasma hormone and metabolite concentrations in periparturient beef cows fed low-quality hay during gestation and lactation, 456
Insulin-like Growth Factors
Acute phase responses of pigs challenged orally with *Salmonella typhimurium*, 1885
Endocrine studies in ivermectin-treated heifers from birth to puberty, 817
Endocrinology of increased ovarian folliculogenesis in cattle selected for twin births, E26
Fetal development of in vitro-produced embryos: Possible association with uterine function, E15
Genetic parameter estimates for serum insulin-like growth factor-I concentration and carcass traits in Angus beef cattle, 2305
Integrated adrenal, somatotropic, and immune responses of growing pigs to treatment with lipopolysaccharide, 1892
Local regulation of pubertal mammary growth in heifers, 36A
Nutritional regulation of the genes encoding the acid-labile subunit and other components of the circulating insulin-like growth factor system in the sheep, 2681
Ovarian and endocrine characteristics during an estrous cycle in Angus, Brahman, and Senepol cows in a subtropical environment, 1291
Predicting growth in Angus bulls: The use of GHRH challenge, insulin-like growth factor-I, and insulin-like growth factor binding proteins, 2913
Production of insulin-like growth factor-I by granulosa cells but not thecal cells is hormonally responsive in cattle, 2919
Serum concentrations of IGF-I, estradiol-17β, testosterone, and relative amounts of IGF binding proteins (IGFBP) in growing boars, barrows, and gilts, 2581
The activity of transcription factor Stat5 responds to prolactin, growth hormone, and IGF-I in rat and bovine mammary explant culture, 3114
Intake
Effect of individual terpenes on consumption of alfalfa pellets by sheep, 1636
Effect of supplements on growth and forage intake by stocker steers grazing wheat pasture, 1625
Effects of base ingredient in cooked molasses blocks on intake and digestion of prairie hay by beef steers, 167
Effects of supplemental degradable intake protein on utilization of medium- to low-quality forages, 224
Influence of consumption of endophyte-infested tall fescue hay on performance of heifers and lambs, 358
Intake, digestibility, and composition of orchardgrass and alfalfa silages treated with cellulase, inoculant, and formic acid fed to lambs, 2980
Self-regulation of intake of polyethylene glycol by sheep fed diets varying in tannin concentrations, 1206
Interferon
Single daily intramuscular injections of low quantities of recombinant ovine interferon-τ extends luteal life-span in Angora goats, 2966
Interferon-Stimulated Gene
Rapid communication: The ovine cDNA encoding interferon-stimulated gene product 17 (ISG17), 1394
Interleukin 2
Rapid communication: A single-strand conformation polymorphism in the ovine *interleukin-2* (*IL-2*) gene, 2754
International Comparisons
Investigation of genotype × environment interactions for weaning weight for Herefords in three countries, 2121
Intramuscular Injection
Effect of subcutaneous vs intramuscular administration of P.G. 600 on estrual and ovulatory responses of prepubertal gilts, 1732
In Vitro
Influence of the novel urease inhibitor N-(n-butyl) thiophosphoric triamide on ruminant nitrogen metabolism: I. In vitro urea kinetics and substrate digestion, 181
Reduced oxygen tension and EDTA improve bovine zygote development in a chemically defined medium, 152
In Vitro Digestibility
Feasibility of using lignin isolated from forages by solubilization in acetyl bromide as a standard for lignin analyses, 3135
Ionophores
Efficacy of laidlomycin propionate in low-protein diets fed to growing beef steers: Effects on steer performance and ruminal nitrogen metabolism, 173
Ions
Ionic strength-induced inactivation of μ-calpain in postmortem muscle, 2336
Iron
Growth promotion effects and plasma changes from feeding high dietary concentrations of zinc and copper to weanling pigs (regional study), 1010

Isoleucine
Influence of abomasal infusion of high levels of lysine or methionine, or both, on ruminal fermentation, eating behavior, and performance of lactating dairy cows, 1067
Ivermectin
Endocrine studies in ivermectin-treated heifers from birth to puberty, 817

J

Japanese Black Cattle
Differences among Wagyu sires for USDA carcass traits and palatability attributes of cooked ribeye steaks, 1710

K

Kappa-casein
Rapid communication: nucleotide sequence of the river buffalo kappa-casein cDNA, 1389
Ketogenesis
Sheep rumen metabolic development in response to age and dietary treatments, 1990
Kinetics
Digesta kinetics, energy intake, grazing behavior, and body temperature of grazing beef cattle differing in adaptation to heat, 1608
Korea Republic
Quantification of pork belly and Boston butt quality attribute preferences of South Korean customers, 2608

L

Lactates
Injection of beef strip loins with solutions containing sodium tripolyphosphate, sodium lactate, and sodium chloride to enhance palatability, 952
Lactation
Cellular uptake of valine by lactating porcine mammary tissue, 2927
Dietary energy source at two feeding levels during lactation of primiparous sows: I. Effects on glucose, insulin, and luteinizing hormone and on follicle development, weaning-to-estrus interval, and ovulation rate, 396
Effect of feather meal as a source of valine for lactating sows, 120
Effects of dietary lysine intake during lactation on blood metabolites, hormones, and reproductive performance in primiparous sows, 1001
Effects of dietary valine concentration on lactational performance of sows nursing large litters, 2879
Energy balance of lactating primiparous sows as affected by feeding level and dietary energy source, 1520
Energy metabolism in lactating beef heifers, 2696
Factors that influence milk production in well-fed sows, 19A
Growth of nursing pigs related to the characteristics of nursed mammary glands, 1313
Impact of dietary lysine intake during lactation on follicular development and oocyte maturation after weaning in primiparous sows, 993
Lactational and subsequent reproductive responses of lactating sows to dietary lysine (protein) concentration, 348
Lysine uptake by mammary gland tissue from lactating sows, 391
Physiological levels of Stat5 DNA binding activity and protein in bovine mammary gland, 3126
Progress in transgenic production of human plasma proteins in mammary bioreactors, 1A
Research paradigms behind amino acid requirements of the lactating sow: Theory and future application, 48A
The effects of branched-chain amino acids on sow and litter performance, 658
Undegraded intake protein supplementation: II. Effects on plasma hormone and metabolite concentrations in periparturient beef cows fed low-quality hay during gestation and lactation, 456
Lactation Curves
Milk production and composition in captive Iberian red deer (*Cervus elaphus hispanicus*): Effect of birth date, 2771
Technical note: The ability of mathematical models to describe the shape of lactation curves, 3010
Lactation Duration
Accounting for lactation length and weaning-to-conception interval in genetic evaluations for litter size in swine, 1796
Hormonal therapy for sows weaned during fall and winter, 2068
Lactoferrin
Lactoferrin secretion into milk: Comparison between ruminant, murine, and human milk, 26A
Lactose
Near infrared spectrosocopy for biomonitoring: Cow milk composition measurement in a spectral region from 1,100 to 2,400 nanometers, 515
Laidlomycin Propionate
Efficacy of laidlomycin propionate in low-protein diets fed to growing beef steers: Effects on steer performance and ruminal nitrogen metabolism, 173
Lamb (meat)
Palatability of wethers fed an 80% barley diet processed at different ages and of yearling wethers grazed on native range, 1779
Lambs
Body weight and tissue gain in lambs fed an all-concentrate diet and implanted with trenbolone acetate or grazed on alfalfa, 1117
Characteristics of Lacha and Rasa Aragonesa lambs slaughtered at three live weights, 3070
Chemical characteristics and relative bioavailability of supplemental organic zinc sources for poultry and ruminants, 2039
Effects of birth weight and postnatal nutrition on neonatal sheep: II. Skeletal muscle growth and development, 50
Effects of diet forage:concentrate ratio and metabolizable energy intake on visceral organ growth and in vitro oxidative capacity of gut tissues in sheep, 760
Role of supplemental vitamin E in lamb survival and production: A review, E23
Landrace
A QTL on pig chromosome 4 affects fatty acid metabolism: Evidence from an Iberian by Landrace intercross, 2525
Lean
Body weight and tissue gain in lambs fed an all-concentrate diet and implanted with trenbolone acetate or grazed on alfalfa, 1117
Lean Color
Effects of a unique application of electrical stimulation on tenderness, color, and quality attributes of the beef longissimus muscle, 1504
Lean Percentage
The effects of selection of pigs on growth rate vs leanness on histochemical characteristics of different muscles, 1247
Least Squares
Technical note: Covariance adjustment in beef cattle research, 2282
Leptin
Insulin regulation of leptin expression in streptozotocin diabetic pigs, 1497
Serum concentrations of luteinizing hormone, growth hormone, testosterone, estradiol, and leptin in boars treated with n-methyl-D,L-aspartate, 365
Lethal Dose
Sporidesmin-Induced mortality and histological lesions in mouse lines divergently selected for response to toxins in endophyte-infected fescue, 2157
Leukocytes
Transportation of goats: Effects on physiological stress responses and live weight loss, 1450
LH
The effect of acute nutritional change on follicle wave turnover, gonadotropin, 429
Dietary energy source at two feeding levels during lactation of primiparous sows: I. Effects on glucose, insulin, and luteinizing hormone and on follicle development, weaning-to-estrus interval, and ovulation rate, 396
Effects of dietary lysine intake during lactation on blood metabolites, hormones, and reproductive performance in primiparous sows, 1001
Serum concentrations of luteinizing hormone, growth hormone, testosterone, estradiol, and leptin in boars treated with n-methyl-D,L-aspartate, 365
LHRH

Technical note: Recombinant LHRH fusion protein suppresses estrus in heifers, 1310
Lignin
Brown midrib-3 corn silage improves digestion but not performance of growing beef steers, 2957
Feasibility of using lignin isolated from forages by solubilization in acetyl bromide as a standard for lignin analyses, 3135
Limiting Amino Acids
Limiting order of amino acids and the effects of phytase on protein quality in corn gluten meal fed to young chicks, 2150
Linkage
Rapid communication: physical and genetic mapping of the *Peroxisome Proliferator Activated Receptor* γ (*PPAR*γ) gene to porcine chromosome 13, 1392
Linkage Groups
Rapid communication: Genetic linkage mapping of a caprine microsatellite derived from a genomic clone containing the *INHA* gene, 2482
Linoleic Acid
Effects of modified tall oil versus a commercial source of conjugated linoleic acid and increasing levels of modified tall oil on growth performance and carcass characteristics of growing-finishing pigs, 2359
Lipid Metabolism
Somatotropin and adipose tissue metabolism: Substrate and temporal effects, 1236
Lipogenesis
Ovine adipose tissue monounsaturated fat content is correlated to depot-specific expression of the stearoyl-CoA desaturase gene, 62
Lipoprotein Lipase
Influence of bovine growth hormone and growth hormone-releasing factor on messenger RNA abundance of lipoprotein lipase and stearoyl-CoA desaturase in the bovine mammary gland and adipose tissue, 412
Rapid communication: Nucleotide sequence of the ovine lipoprotein lipase cDNA, 2994
Litter
Health and environmental implications of using composted household and yard waste bedding in a cattle feedlot, 495
Litter Size
Accounting for lactation length and weaning-to-conception interval in genetic evaluations for litter size in swine, 1796
Effect of estradiol-17β administration during the time of conceptus elongation on placental size at term in Meishan pigs, 1047
Lactational and subsequent reproductive responses of lactating sows to dietary lysine (protein) concentration, 348
Live Estimation
Using live estimates and ultrasound measurements to predict beef carcass cutability, 1255
Liver
Effects of dietary copper concentration and source on performance and copper status of growing and finishing steers, 2446
Nutritional regulation of the genes encoding the acid-labile subunit and other components of the circulating insulin-like growth factor system in the sheep, 2681
Technical note: A technique for multiple liver biopsies in neonatal calves, 2459
The effect of feed intake level on splanchnic metabolism in growing beef steers, 1084
Liver Cells
Effects of triglyceride accumulation on induction of urea synthesis by glucagon and dexamethasone in monolayer cultures of bovine hepatocytes, 1659
Liver Failure
Sporidesmin-Induced mortality and histological lesions in mouse lines divergently selected for response to toxins in endophyte-infected fescue, 2157
Livestock
Success and failure of decision support systems: Learning as we go, E27
Live Weight
Characteristics of Lacha and Rasa Aragonesa lambs slaughtered at three live weights, 3070
Loci
The effect of adipocyte and heart fatty acid-binding protein genes on intramuscular fat and backfat content in Meishan crossbred pigs, 552
Lungs
Differential Effects of Dexamethasone and Clenbuterol on Rat Growth and on β_2-Adrenoceptors in Lung and Skeletal Muscle, 604
Luteinizing Hormone
The effect of progesterone alone or in combination with estradiol on follicular dynamics, gonadotropin profiles, and estrus in beef cows following calf isolation and restricted suckling, 1917
Lymphocytes
Physiological responses of horses to 24 hours of transportation using a commercial van during summer conditions, 1458
Lysine
Effect of dietary concentration of metabolizable lysine on finishing cattle performance, 1060
Effect of dietary lysine level and environmental temperature during the finishing phase on the intramuscular fat content of pork, 1272
Effects of dietary lysine intake during lactation on blood metabolites, hormones, and reproductive performance in primiparous sows, 1001
Effects of dietary valine concentration on lactational performance of sows nursing large litters, 2879
Effects of genetic type and protein levels on growth of swine, E32
Further assessment of the dietary lysine requirement of finishing gilts, 987
Impact of dietary lysine intake during lactation on follicular development and oocyte maturation after weaning in primiparous sows, 993
Influence of abomasal infusion of high levels of lysine or methionine, or both, on ruminal fermentation, eating behavior, and performance of lactating dairy cows, 1067
Interrelationships between dietary lysine, sex, and porcine somatotropin administration on growth performance and protein deposition in pigs between 80 and 120 kg live weight, 2639
Lactational and subsequent reproductive responses of lactating sows to dietary lysine (protein) concentration, 348
Lysine uptake by mammary gland tissue from lactating sows, 391
Metabolizable methionine and lysine requirements of growing cattle, 199
Methionine imbalance and toxicity in calves, 2722
Lysine Bioavailability
Effects of pelleting and storage of a complex nursery pig diet on lysine bioavailability, 341
Lysine Utilization
Influence of dietary lysine and energy intakes on body protein deposition and lysine utilization in the growing pig, 1510

M

Magnesium
Effect of magnesium mica on performance and carcass quality of growing-finishing swine, 2135
Interaction of dietary magnesium level on the feeding value of supplemental fat in finishing diets for feedlot steers, 2072
Magnesium-mica
Digestibility of prairie hay diets supplemented with different levels of magnesium-mica by beef heifers, 718
Maize
Growing-finishing performance and carcass characteristics of pigs fed normal and genetically modified low-phytate corn, 1529
Phosphorus bioavailability and digestibility of normal and genetically modified low-phytate corn for pigs, 675
Maize Byproducts
The effects of corn milling coproducts on growth performance and diet digestibility by beef cattle, 1
Maize Gluten
Review of new information on the use of wet and dry milling feed by-products in feedlot diets, E19
Maize Gluten Meal
Limiting order of amino acids and the effects of phytase on protein quality in corn gluten meal fed to young chicks, 2150
Maize Oil
Nutritional value of a genetically improved high-lysine, high-oil corn for young pigs, 2144
Maize Protein
Nutritional value of a genetically improved high-lysine, high-oil corn for young pigs, 2144

Maize Silage
Brown midrib-3 corn silage improves digestion but not performance of growing beef steers, 2957
Mammary Development
Inhibition of prolactin in the last trimester of gestation decreases mammary gland development in gilts, 1303
Preparation of an epithelium-free mammary fat pad and subsequent mammogenesis in ewes, 2177
Mammary Glands
Cellular uptake of valine by lactating porcine mammary tissue, 2927
Growth of nursing pigs related to the characteristics of nursed mammary glands, 1313
Inhibition of prolactin in the last trimester of gestation decreases mammary gland development in gilts, 1303
Lactoferrin secretion into milk: Comparison between ruminant, murine, and human milk, 26A
Lysine uptake by mammary gland tissue from lactating sows, 391
Rapid communication: Cloning of bovine serum amyloid A3 cDNA, 2756
The activity of transcription factor Stat5 responds to prolactin, growth hormone, and IGF-I in rat and bovine mammary explant culture, 3114
The influence of suckling interval on milk production of sows, 2026
Transgenic protein production: Achievements using microinjection technology and the promise of nuclear transfer, 8A
Mammary Tissue
Preparation of an epithelium-free mammary fat pad and subsequent mammogenesis in ewes, 2177
Management
New approaches for improving tenderness, quality, and consistency of beef, E38
Manganese
Assessment of trace mineral status of ruminants: A review, E20
Mannose
Rapid Communication: Mapping of the *Mannose-Binding Lectin 2* (*MBL2*) gene to pig chromosome 14, 2992
Manures
The effects of calcium benzoate in diets with or without organic acids on dietary buffering capacity, apparent digestibility, retention of nutrients, and manure characteristics in swine, 2622
Male Effect
Current concepts in synchronization of estrus: Sheep and goats, E36
Males
Neuroendocrine regulation of reproduction in male domestic animal species: Role of excitatory amino acids, E16
Mapping
Rapid communication: Mapping of nine bovine microsatellite markers obtained from large insert genomic libraries, 2231
Markers
Effect of supplements on growth and forage intake by stocker steers grazing wheat pasture, 1625
Rapid communication: *Poli-RC35-TUF*, a highly polymorphic microsatellite marker in the Japanese flounder, *Paralichthys olivaceus*, 1690
The effect of physical form of orchardgrass hay on the passage of particulate matter through the rumen of sheep, 1338
Market Survey
National Beef Tenderness Survey–1998, 1852
Mastitis
Effects of intramammary infection and parity on calf weaning weight and milk quality in beef cows, 2508
Maternal Effects
Characteristics of Line 1 Hereford females resulting from selection by independent culling levels for below-average birth weight and high yearling weight or by mass selection for high yearling weight, 2292
Genetic and environmental parameters for traits derived from the Brody growth curve and their relationships with weaning weight in Angus cattle, 1436
Maternal birth weight breeding value as an additional factor to predict calf birth weight in beef cattle, 21
Mathematical Models
A dynamic model of protein digestion in the small intestine of pigs, 328
A generalized Michaelis-Menten equation for the analysis of growth, 1816
Technical note: The ability of mathematical models to describe the shape of lactation curves, 3010
Meat
Bovine *CAPN1* maps to a region of BTA29 containing a quantitative trait locus for meat tenderness, 2589
Consumer reactions, popular fancies, and scientific facts related to the healthfulness of meat products, E10
Does selenium accumulation in meat confer health benefits to consumers?, E11
Riboflavin and niacin concentrations of bison cuts, 1267
Meat Cuts
Identification of optimal ranges in ribeye area for portion cutting of beef steaks, 966
Quantification of pork belly and Boston butt quality attribute preferences of South Korean customers, 2608
Meat Quality
Characteristics of Lacha and Rasa Aragonesa lambs slaughtered at three live weights, 3070
Effect of dietary lysine level and environmental temperature during the finishing phase on the intramuscular fat content of pork, 1272
Effect of magnesium mica on performance and carcass quality of growing-finishing swine, 2135
Effects of modified tall oil and creatine monohydrate on growth performance, carcass characteristics, and meat quality of growing-finishing pigs, 2376
Effects of weaning age and diet on growth and carcass characteristics in steers, 1759
Frequency of the Rendement Napole RN^- allele in a population of American Hampshire pigs, 1811
Genetic analyses of live-animal ultrasound and abattoir carcass traits in Australian Angus and Hereford cattle, 1786
Growth- and breed-related changes of muscle fiber characteristics in cattle, 1485
Muscle fiber plasticity in farm animals, E2
Parameter estimates for genetic effects on carcass traits of Korean Native Cattle, 1181
Performance and meat quality of beef steers fed corn-based or bread by-product-based diets, 784
Polyethylene glycol as a means for reducing the impact of condensed tannins in carob pulp: Effects on lamb growth performance and meat quality, 810
Relationship of beef longissimus tenderness classes to tenderness of gluteus medius, semimembranosus, and biceps femoris, 2856
Rigor temperature and meat quality characteristics of lamb longissimus muscle, 2842
The effect of adipocyte and heart fatty acid-binding protein genes on intramuscular fat and backfat content in Meishan crossbred pigs, 552
The effect of the Halothane and Rendement Napole genes on carcass and meat quality characteristics of pigs, 2862
The impact of gentle contacts on ease of handling, welfare, and growth of calves and on quality of veal meat, 1219
Meat Tenderness
Bovine placental protease specificity toward muscle connective tissue proteins, 1861
Meat Yield
Genetic analyses of live-animal ultrasound and abattoir carcass traits in Australian Angus and Hereford cattle, 1786
Meishan
Farrowing hut design and sow genotype (Camborough-15 vs 25% Meishan) effects on outdoor sow and litter productivity, 2832
Melanocyte Stimulating Hormone Receptor
Rapid communication: Linkage and physical mapping of the porcine *melanocortin-4 receptor* (*MC4R*) gene, 791
Messenger RNA
Developmental changes in cholesterol 7α- and 27-hydroxylases in the piglet, 943
Effect of feed restriction on adipose tissue transcript concentrations in genetically lean and obese pigs, 934
Effects of muscle type, castration, age, and compensatory growth rate on androgen receptor mRNA expression in bovine skeletal muscle, 629
Messenger ribonucleic acid expression of the MyoD gene family in muscle tissue at slaughter in relation to selection for porcine growth rate, 69
Metabolism
A kinetic model of phosphorus metabolism in growing goats, 2706

Chromium supplementation does not influence glucose metabolism or insulin action in response to cold exposure in mature sheep, 2950
Dietary fats as reproductive nutraceuticals in beef cattle, E14
Effects of diet forage:concentrate ratio and metabolizable energy intake on isolated rumen epithelial cell metabolism in vitro, 771
Influence of ruminal biohydrogenation on the feeding value of fat in finishing diets for feedlot cattle, 1738
Interaction of dietary magnesium level on the feeding value of supplemental fat in finishing diets for feedlot steers, 2072
Metabolizable methionine and lysine requirements of growing cattle, 199
Net flux of nonesterified fatty acids, cholesterol, triacylglycerol, and glycerol across the portal-drained viscera and liver of pregnant ewes, 1380
Net portal appearance of volatile fatty acids in sheep intraruminally infused with mixtures of acetate, propionate, isobutyrate, butyrate, and valerate, 1372
Nitrogen metabolism and fertility in cattle: I. Adaptive changes in intake and metabolism to diets differing in their rate of energy and nitrogen release in the rumen, 2659
Response of nitrogen metabolism in preparturient dairy cows to methionine supplementation, 742
Sheep rumen metabolic development in response to age and dietary treatments, 1990

Metabolites
Effect of degree of corn processing on urinary nitrogen composition, serum metabolite and insulin profiles, and performance by finishing steers, 2464
Effect of short-term feed restriction and calorie source on hormonal and metabolic responses in geldings receiving a small meal, 3107
Effects of supplemental soybean oil level on in vitro digestion and performance of prepubertal beef heifers, 504
Evaluation of models of acute and subacute acidosis on dry matter intake, ruminal fermentation, blood chemistry, and endocrine profiles of beef steers, 3155
Growth performance and digestive and metabolic responses of gilts penned individually or in groups of four, 597
Influence of feeding different amounts of first colostrum on metabolic, endocrine, and health status and on growth performance in neonatal calves, 896

Metabolizable Energy
Influence of dietary lysine and energy intakes on body protein deposition and lysine utilization in the growing pig, 1510

Methionine
Absorption of 2-hydroxy-4-(methylthio)butanoic acid by isolated sheep ruminal and omasal epithelia, 1078
Evaluation of feather meal as a source of sulfur amino acids for growing steers, 207
Influence of abomasal infusion of high levels of lysine or methionine, or both, on ruminal fermentation, eating behavior, and performance of lactating dairy cows, 1067
Metabolizable methionine and lysine requirements of growing cattle, 199
Methionine imbalance and toxicity in calves, 2722

Methionine Hydroxy Analogue
Absorption of 2-hydroxy-4-(methylthio)butanoic acid by isolated sheep ruminal and omasal epithelia, 1078

Mice
Impacts of an endophyte-infected fescue seed diet on traits of mouse lines divergently selected for response to that same diet, 1191
Linkage mapping of the Mahogany (attractin) locus in cattle and pigs, 2480
Response to 13 generations of selection for increased 8-week body weight in lines of mice carrying a sheep growth hormone-based transgene, 832
Sporidesmin-Induced mortality and histological lesions in mouse lines divergently selected for response to toxins in endophyte-infected fescue, 2157

Microbial Growth
Accounting for the effects of a ruminal nitrogen deficiency within the structure of the Cornell Net Carbohydrate and Protein System, 1648

Microinjection
Transgenic protein production: Achievements using microinjection technology and the promise of nuclear transfer, 8A
Genetic differentiation among geographically isolated populations of Criollo cattle and their divergence from other *Bos taurus* breeds, 2314

Microsatellites
Rapid communication: Genetic linkage mapping of a caprine microsatellite derived from a genomic clone containing the *INHA* gene, 2482
Rapid communication: Mapping of nine bovine microsatellite markers obtained from large insert genomic libraries, 2231
Rapid communication: Microsatellite DNA markers (BFRO010 and BFRO011) for grayling, 488
Rapid communication: Twenty-six new porcine microsatellites from a microsatellite enriched microdissected chromosome 8 library, 3191
Rapid communication: Two highly polymorphic dinucleotide microsatellites in rainbow trout (*Oncorhynchus mykiss*): *OmyRGT1-8TUF* and *OmyRGT23TUF*, 491

Milk
East Friesian germplasm: Effects on milk production, lamb growth, and lamb survival, E7
Lactoferrin secretion into milk: Comparison between ruminant, murine, and human milk, 26A
Near infrared spectrosocopy for biomonitoring: Cow milk composition measurement in a spectral region from 1,100 to 2,400 nanometers, 515
Physiological levels of Stat5 DNA binding activity and protein in bovine mammary gland, 3126

Milk Composition
Energy balance of lactating primiparous sows as affected by feeding level and dietary energy source, 1520
Milk production and composition in captive Iberian red deer (*Cervus elaphus hispanicus*): Effect of birth date, 2771
The influence of suckling interval on milk production of sows, 2026

Milk Production
Effect of dietary energy on milk production and metabolic hormones in thin, primiparous beef heifers, 530
Lactation and calf weight traits of mature crossbred cows fed varying daily levels of metabolizable energy, 7
Milk production and composition in captive Iberian red deer (*Cervus elaphus hispanicus*): Effect of birth date, 2771
Technical note on: The ability of mathematical models to describe the shape of lactation curves, 3010
Using genetic evaluations for growth and maternal gain from birth to weaning to predict energy requirements of Line 1 Hereford beef cows, 2299

Milk Products
Biosynthesis of conjugated linoleic acid in ruminants, E28

Milk Substitutes
Growth performance, metabolic and endocrine traits, and absorptive capacity in neonatal calves fed either colostrum or milk replacer at two levels, 609

Milk Synthesis
Genetic, nutritional and endocrine support of milk synthesis in dairy cows, 59A

Milk Yield
Factors that influence milk production in well-fed sows, 19A
Relationships between human-animal interactions and productivity of commercial dairy cows, 2821
The influence of suckling interval on milk production of sows, 2026

Mimosine
Effects of mimosine on fiber shedding, follicle activity, and fiber regrowth in Spanish goats, 1551

Mineral Absorption
A kinetic model of phosphorus metabolism in growing goats, 2706

Minerals
Deletion of supplemental minerals and vitamins during the late finishing period does not affect pig weight gain and feed intake, 2797
Designing mineral supplementation of forage programs for beef cattle, E13
Effects of pasture applied biosolids on performance and mineral status of grazing beef heifers, 1331
Health and environmental implications of using composted household and yard waste bedding in a cattle feedlot, 495

Mink
Silkiness in brown mink pelts characterized with optical methods, 1697

Mitochondria

Effect of dietary selenium and vitamin E on the ultrastructure and ATP concentration of boar spermatozoa, and the efficacy of added sodium selenite in extended semen on sperm motility, 1544
Modeling
Accounting for the effects of a ruminal nitrogen deficiency within the structure of the Cornell Net Carbohydrate and Protein System, 1648
Models
Success and failure of decision support systems: Learning as we go, E27
Using serial ultrasound measures to generate models of marbling and backfat thickness changes in feedlot cattle, 2055
Mohair
Adrenal function in Angora goats: A comparative study of adrenal steroidogenesis in Angora goats, Boer goats, and Merino sheep, 1036
Muscle Fibers
Growth- and breed-related changes of muscle fiber characteristics in cattle, 1485
Messenger ribonucleic acid expression of the MyoD gene family in muscle tissue at slaughter in relation to selection for porcine growth rate, 69
Muscle fiber plasticity in farm animals, E2
Muscles
Effect of the callipyge gene on muscle growth, calpastatin activity, and tenderness of three muscles across the growth curve, 2836
Plasmid transfection and retroviral transduction of porcine muscle cells for cell-mediated gene transfer, 909
Relationship of beef longissimus tenderness classes to tenderness of gluteus medius, semimembranosus, and biceps femoris, 2856
Response of C_2C_{12} mouse and turkey skeletal muscle cells to the β-adrenergic agonist ractopamine, 699
Variation in proteolysis, sarcomere length, collagen content, and tenderness among major pork muscles, 958
Myeloperoxidase
Rapid communication: Mapping of the *Myeloperoxidase* (*MPO*) gene to pig chromosome 12, 3189
Myofibril
Building the perfect beast: Mechanisms of myofibril assembly, E1
Effects of birth weight and postnatal nutrition on neonatal sheep: II. Skeletal muscle growth and development, 50
Myogenesis
Building the perfect beast: Mechanisms of myofibril assembly, E1

N

Nematoda
Subclinical infection with the nematode *Trichostrongylus colubriformis* increases gastrointestinal tract leucine metabolism and reduces availability of leucine for other tissues, 380
Neonatal Mortality
Role of supplemental vitamin E in lamb survival and production: A review, E23
Net Energy
Performance and meat quality of beef steers fed corn-based or bread by-product-based diets, 784
Neurohormones
Neuroendocrine regulation of reproduction in male domestic animal species: Role of excitatory amino acids, E16
Newborn Animals
Growth performance, metabolic and endocrine traits, and absorptive capacity in neonatal calves fed either colostrum or milk replacer at two levels, 609
Influence of feeding different amounts of first colostrum on metabolic, endocrine, and health status and on growth performance in neonatal calves, 896
Niacin
Riboflavin and niacin concentrations of bison cuts, 1267
Nitric Oxide
Postnatal changes of plasma amino acids in suckling pigs, 2369
Nitrogen
Application of nutritional knowledge for developing econutrition feeding programs on commercial swine farms, E22
Determination of the methionine requirement of growing double-muscled Belgian Blue bulls with a three-step method, 233
Practical aspects of urea and ammonia metabolism in ruminants, E21
Nitrogen Balance
Compartmental modeling with nitrogen-15 to determine effects of degree of fat saturation on intraruminal N recycling, 2421
Effects of protozoa on bacterial nitrogen recycling in the rumen, 2431
Influence of the novel urease inhibitor N-(n-butyl) thiophosphoric triamide on ruminant nitrogen metabolism: II. Ruminal nitrogen metabolism, diet digestibility, and nitrogen balance in lambs, 188
Nitrogen Metabolism
Effects of protein concentration and degradability on performance, ruminal fermentation, and nitrogen metabolism in rapidly growing heifers fed high-concentrate diets from 100 to 230 kg body weight, 1667
Splanchnic nitrogen metabolism by growing beef steers fed diets containing sorghum grain flaked at different densities, 1355
Nonlinear Equations
A generalized Michaelis-Menten equation for the analysis of growth, 1816
Norwegian Cattle
Twinning rate in Norwegian cattle: Frequency, (co)variance components, and genetic trends, 15
Novel Foods
Behavioral reactivity of cattle toward novel food: Effects of testing time and food type of neighbors, 2323
Roles of novelty, generalization, and postingestive feedback in the recognition of foods by lambs, 3060
Nuclear Transfer
Transgenic protein production: Achievements using microinjection technology and the promise of nuclear transfer, 8A
Nucleic Acids
Effects of birth weight and postnatal nutrition on neonatal sheep: II. Skeletal muscle growth and development, 50
The influence of suckling interval on milk production of sows, 2026
Nucleotide Sequences
Rapid communication: Nucleotide sequences of the bovine, caprine, and ovine *β_3-adrenergic receptor* genes, 1398
Nursery
Evaluation of site and age of weaning on pig growth performance, 1726
Growth-promoting efficacy in young pigs of two sources of zinc oxide having either a high or a low bioavailability of zinc, 2896
Nursery Management
Growth promotion effects and plasma changes from feeding high dietary concentrations of zinc and copper to weanling pigs (regional study), 1010
Nursing Demand
Factors that influence milk production in well-fed sows, 19A
Nursing Pigs
Growth of nursing pigs related to the characteristics of nursed mammary glands, 1313
Nutrient Availability
Growth-promoting efficacy in young pigs of two sources of zinc oxide having either a high or a low bioavailability of zinc, 2896
Nutrient Balance
Application of nutritional knowledge for developing econutrition feeding programs on commercial swine farms, E22
Nutrient Improvement
Designing supplementation programs for beef cattle fed forage-based diets, E12
Nutrition
Consequences of different patterns of feed intake during the estrous cycle in gilts on subsequent fertility, 1556
Effects of birth weight and postnatal nutrition on neonatal sheep: II. Skeletal muscle growth and development, 50
The effect of acute nutritional change on follicle wave turnover, gonadotropin, and steroid concentration in beef heifers, 429

O

Obesity
Effect of feed restriction on adipose tissue transcript concentrations in genetically lean and obese pigs, 934
Energy intake regulates ovarian function in beef cattle, E25
Linkage mapping of the Mahogany (attractin) locus in cattle and pigs, 2480

Odors
Application of nutritional knowledge for developing econutrition feeding programs on commercial swine farms, E22
High dietary copper improves odor characteristics of swine waste, 859
Oil
Effect of high-oil corn on growth performance, diet digestibility, and energy content of finishing diets fed to beef cattle, 2257
Oleic Acid
Site of administration and duration of feeding oleamide to cattle on feed intake and ruminal fatty acid concentrations, 2745
Omasum
Absorption of 2-hydroxy-4-(methylthio)butanoic acid by isolated sheep ruminal and omasal epithelia, 1078
Ontogeny
Preparation of an epithelium-free mammary fat pad and subsequent mammogenesis in ewes, 2177
Oocyte Maturation
Effect of ovarian phase and follicle quality on morphology and developmental capacity of the bovine cumulus-oocyte complex, 1277
Oocytes
A sperm's perspective of fertilization, E17
Impact of dietary lysine intake during lactation on follicular development and oocyte maturation after weaning in primiparous sows, 993
Influence of vitamin A injection before mating on oocyte development, follicular hormones, and ovulation in gilts fed high-energy diets, 1598
Nitrogen metabolism and fertility in cattle: II. Development of oocytes recovered from heifers offered diets differing in their rate of nitrogen release in the rumen, 2670
Optical Properties
Silkiness in brown mink pelts characterized with optical methods, 1697
Optimization Methods
Technical note: Constrained optimization of breed composition in composite populations to balance net merit and risk, 2105
Organic Acids
The effects of calcium benzoate in diets with or without organic acids on dietary buffering capacity, apparent digestibility, retention of nutrients, and manure characteristics in swine, 2622
Organic Farming
Effects of on-farm diets for organic pig production on performance and carcass quality, 1199
Organs
Effects of diet forage:concentrate ratio and metabolizable energy intake on visceral organ growth and in vitro oxidative capacity of gut tissues in sheep, 760
Ornithine
Ornithine alpha-ketoglutarate and creatine effects on growth and plasma metabolites of nursery pigs, 1022
Osteocalcin
The effect of initiation of exercise training in young horses on vitamin K status, 2353
Ovarian Cysts
Real-time diagnosis of ovulation and ovarian cysts in sows and its imact on artificial insemination efficiency, E33
Ovarian Development
Growth-Promoting systems for heifer calves and yearlings finished in the feedlot, 2485
Ovarian Follicles
Effect of ovarian phase and follicle quality on morphology and developmental capacity of the bovine cumulus-oocyte complex, 1277
Ovary
Energy intake regulates ovarian function in beef cattle, E25
Ovidae
Rapid communication: The ovine cDNA encoding interferon-stimulated gene product 17 (ISG17), 1394
Ovine
Rapid communication: Nucleotide sequences of the bovine, caprine, and ovine *β_3-adrenergic receptor* genes, 1398
Ovulation
Current concepts in synchronization of estrus and ovulation of dayr cows, E39
Effect of subcutaneous vs intramuscular administration of P.G. 600 on estrual and ovulatory responses of prepubertal gilts, 1732
Effect of the previously gravid uterine horn and postpartum interval on follicular diameter and conception rate in beef cows treated with estradiol benzoate and progesterone, 2172
Effects of boar contact and housing conditions on estrus expression in weaned sows, 871
Energy intake regulates ovarian function in beef cattle, E25
Initial results of genomic scans for ovulation rate in a cattle population selected for increased twinning rate, 3053
Real-time diagnosis of ovulation and ovarian cysts in sows and its impact on artificial insemination efficiency, E33
Responsiveness to boar stimuli and change in vulvar reddening in relation to ovulation in weaned sows, 3019
Ovulation Rate
Comparison of plasma FSH concentration in boars and gilts from lines selected for ovulation rate and embryonal survival, and litter size and estimation of (co)variance components for FSH and ovulation rate, 1430
Endocrinology of increased ovarian folliculogenesis in cattle selected for twin births, E26
Oxidation
Effects of diet forage:concentrate ratio and metabolizable energy intake on isolated rumen epithelial cell metabolism in vitro, 771
Oxygenases
Rapid communication: Porcine vitamin D-25-hydroxylase maps to chromosome 5, 3194
Oxygen
Effects of diet forage:concentrate ratio and metabolizable energy intake on visceral organ growth and in vitro oxidative capacity of gut tissues in sheep, 760
Reduced oxygen tension and EDTA improve bovine zygote development in a chemically defined medium, 152
Oxytocin
Ergotamine alters plasma concentrations of glucagon, insulin, cortisol, and triiodothyronine in cows, 690
Influence of castration and estrogen replacement on sexual behavior of female-oriented, male-oriented, and asexual rams, 1947
Interestrous interval of cyclic gilts is decreased by systemic but not intrauterine administration of exogenous oxytocin, 2393

P

Palatability
Differences among Wagyu sires for USDA carcass traits and palatability attributes of cooked ribeye steaks, 1710
Effects of backgrounding and growing programs on beef carcass quality and yield, E31
Effects of graded levels of potato by-products in barley- and corn-based beef feedlot diets: II. Palatability, 1837
Implant strategies during feeding: Impact on carcass grades and consumer acceptability, 1867
Using measurements of muscle color, pH, and electrical impedance to augment the current USDA beef quality grading standards and improve the accuracy and precision of sorting carcasses into palatability groups, 2595
Panicum virgatum
Intake and chewing behavior of steers consuming switchgrass preserved as hay or silage, 1983
Parainfluenza 3 Virus
Evaluation of ewe and lamb immune response when ewes were supplemented with vitamin E, 2731
Parotid Gland
Determination of parotid urea secretion in sheep by means of ultrasonic flow probes and a multifactorial regression analysis, 471
Particle Size
Enzyme supplementation and particle size of wheat in diets for nursery and finishing pigs, 3086
The effect of physical form of orchardgrass hay on the passage of particulate matter through the rumen of sheep, 1338
Passive Immunity
Evaluation of ewe and lamb immune response when ewes were supplemented with vitamin E, 2731
Pastures
Effects of pasture applied biosolids on performance and mineral status of grazing beef heifers, 1331
Grazing methods and stocking rates for direct-seeded alfalfa pastures: III. Economics of alternative stocking rates for alfalfa pastures, 2209

Grazing methods and stocking rates for direct-seeded alfalfa pastures: II. Pasture quality and diet selection, 2202
Grazing methods and stocking rates for direct-seeded alfalfa pastures: I. Plant productivity and animal performance, 2192
Pathogen Elimination
Quantitative relationship of systemic virus concentration on growth and immune response in pigs, 2690
Pelleting
Effects of pelleting and storage of a complex nursery pig diet on lysine bioavailability, 341
Peptides
Amino acid flux in ruminal and gastric veins of sheep: Effects of ruminal and omasal injections of free amino acids and carnosine, 158
Free and peptide amino acid net flux across the rumen and the mesenteric- and portal-drained viscera of sheep, 1960
Performance
Body weight and tissue gain in lambs fed an all-concentrate diet and implanted with trenbolone acetate or grazed on alfalfa, 1117
Deletion of supplemental minerals and vitamins during the late finishing period does not affect pig weight gain and feed intake, 2797
Dietary copper effects on lipid metabolism, performance, and ruminal fermentation in finishing steers, 2452
Effect of a trainer cow on health, behavior, and performance of newly weaned beef calves, 1716
Effect of consumption of potato chip scraps on the performance of pigs, 2021
Effect of degree of corn processing on urinary nitrogen composition, serum metabolite and insulin profiles, and performance by finishing steers, 2464
Effect of level of whole cottonseed on intake, digestibility, and performance of growing male goats fed hay-based diets, 1677
Effects of dietary copper concentration and source on performance and copper status of growing and finishing steers, 2446
Effects of ruminally protected choline and dietary fat on performance and blood metabolites of finishing heifers, 2497
Feeding value of an enzymatically digested protein for early-weaned pigs, 318
Growing-finishing performance and carcass characteristics of pigs fed normal and genetically modified low-phytate corn, 1529
Influence of consumption of endophyte-infested tall fescue hay on performance of heifers and lambs, 358
Influence of ruminal biohydrogenation on the feeding value of fat in finishing diets for feedlot cattle, 1738
Interaction of dietary magnesium level on the feeding value of supplemental fat in finishing diets for feedlot steers, 2072
Interaction of protein nutrition and laidlomycin on feedlot growth performance and digestive function in Holstein steers, 1768
Performance and carcass merit of growing beef steers with chlortetracycline-modified sensitivity to pituitary releasing hormones and fed two dietary protein levels, 2765
Plasma cortisol and ACTH concentrations in the warmblood horse in response to a standardized treadmill exercise test as physiological markers for evaluation of training status, 1936
Use of trainer animals to improve performance and health of newly arrived feedlot calves, 539
Peroxisome Proliferator Activated Receptor
Expression of porcine transcription factors and genes related to fatty acid metabolism in different tissues and genetic populations, 2127
Peroxisome Proliferator Activated Receptor Gamma
Rapid communication: physical and genetic mapping of the *Peroxisome Proliferator Activated Receptor* γ (*PPAR*γ) gene to porcine chromosome 13, 1392
Pest Resistance
Potential for Hair Sheep in the United States, E8
pH
Effects of rate of pH fall, time of deboning, aging period, and their interaction on veal quality characteristics, 1845
Using measurements of muscle color, pH, and electrical impedance to augment the current USDA beef quality grading standards and improve the accuracy and precision of sorting carcasses into palatability groups, 2595
Phenolic Compounds
Feasibility of using lignin isolated from forages by solubilization in acetyl bromide as a standard for lignin analyses, 3135
Phosphates
Injection of beef strip loins with solutions containing sodium tripolyphosphate, sodium lactate, and sodium chloride to enhance palatability, 952
Phosphorus
A kinetic model of phosphorus metabolism in growing goats, 2706
A new phytase expressed in yeast effectively improves the bioavailability of phytate phosphorus to weanling pigs, 668
Application of nutritional knowledge for developing econutrition feeding programs on commercial swine farms, E22
Comparison of phytase from genetically engineered *Aspergillus* and canola in weanling pig diets, 2868
Effects of dietary calcium:phosphorus ratios on apparent absorption of calcium and phosphorus in the small intestine, cecum, and colon of pigs, 106
Efficacy of yeast phytase in improving phosphorus bioavailability in a corn-soybean meal-based diet for growing pigs, 94
Growing-finishing performance and carcass characteristics of pigs fed normal and genetically modified low-phytate corn, 1529
Phosphorus bioavailability and digestibility of normal and genetically modified low-phytate corn for pigs, 675
Phosphorus Bioavailability
The effects of citric acid on phytate-phosphorus utilization in young chicks and pigs, 682
Photometry
Silkiness in brown mink pelts characterized with optical methods, 1697
Physical Properties
The effect of physical form of orchardgrass hay on the passage of particulate matter through the rumen of sheep, 1338
Physiology
Few differences found between early- and late-weaned pigs raised in the same environment, 38
Phytase
A new phytase expressed in yeast effectively improves the bioavailability of phytate phosphorus to weanling pigs, 668
Comparison of phytase from genetically engineered *Aspergillus* and canola in weanling pig diets, 2868
Efficacy of yeast phytase in improving phosphorus bioavailability in a corn-soybean meal-based diet for growing pigs, 94
Limiting order of amino acids and the effects of phytase on protein quality in corn gluten meal fed to young chicks, 2150
The effects of citric acid on phytate-phosphorus utilization in young chicks and pigs, 682
Phytic Acid
Growing-finishing performance and carcass characteristics of pigs fed normal and genetically modified low-phytate corn, 1529
Phosphorus bioavailability and digestibility of normal and genetically modified low-phytate corn for pigs, 675
Pig Breeds
A QTL on pig chromosome 4 affects fatty acid metabolism: Evidence from an Iberian by Landrace intercross, 2525
Pig Manures
Phosphorus bioavailability and digestibility of normal and genetically modified low-phytate corn for pigs, 675
Piglets
Developmental changes in cholesterol 7α- and 27-hydroxylases in the piglet, 943
Effects of pelleting and pellet conditioning temperatures on weanling pig performance, 3014
Postnatal changes of plasma amino acids in suckling pigs, 2369
The effect of thermal environment and age on neonatal pig behavior, 583
Pigs
Accounting for lactation length and weaning-to-conception interval in genetic evaluations for litter size in swine, 1796
Acute phase responses of pigs challenged orally with *Salmonella typhimurium*, 1885
Added dietary pyridoxine, but not thiamin, improves weanling pig growth performance, 88
Administration of ACTH to restrained, pregnant sows alters their pigs' hypothalamic-pituitary-adrenal (HPA) axis, 2399
A dynamic model of protein digestion in the small intestine of pigs, 328
A new phytase expressed in yeast effectively improves the bioavailability of phytate phosphorus to weanling pigs, 668
A porcine intrauterine 4-MDa component with transforming growth factor-β activity suppresses natural killer cell responses, 1900

ARPP-16 mRNA is up-regulated in the longissimus muscle of pigs possessing an elevated growth rate, 1475
Assessment of hypothalamic-pituitary-adrenal axis and sympathetic nervous system activity in pregnant sows through the measurement of glucocorticoids and catecholamines in urine, 420
Comparison of phytase from genetically engineered Aspergillus and canola in weanling pig diets, 2868
Comparison of plasma FSH concentration in boars and gilts from lines selected for ovulation rate and embryonal survival, and litter size and estimation of (co)variance components for FSH and ovulation rate, 1430
Culture of porcine stromal-vascular cells in serum-free medium: Differential action of various hormonal agents on adipose conversion, 885
Deletion of supplemental minerals and vitamins during the late finishing period does not affect pig weight gain and feed intake, 2797
Effect of consumption of potato chip scraps on the performance of pigs, 2021
Effect of dietary formates on growth performance, carcass traits, sensory quality, intestinal microflora, and stomach alterations in growing-finishing pigs, 1875
Effect of dietary lysine level and environmental temperature during the finishing phase on the intramuscular fat content of pork, 1272
Effect of dietary selenium and vitamin E on spermatogenic development in boars, 1537
Effect of dietary selenium and vitamin E on the ultrastructure and ATP concentration of boar spermatozoa, and the efficacy of added sodium selenite in extended semen on sperm motility, 1544
Effect of estradiol-17β administration during the time of conceptus elongation on placental size at term in Meishan pigs, 1047
Effect of feed restriction on adipose tissue transcript concentrations in genetically lean and obese pigs, 934
Effect of magnesium mica on performance and carcass quality of growing-finishing swine, 2135
Effect of organic and inorganic selenium sources and levels on sow colostrum and milk selenium content, 100
Effect of sensory stimuli on huddling behavior of pigs, 592
Effect of starter feeding program on growth performance and gains of body components from weaning to market weight in swine, 2885
Effect of vitamin E sources (RRR- or all-*rac*-α-tocopheryl acetate) and levels on sow reproductive performance, serum, tissue, and milk α-tocopherol contents over a five-parity period, and the effects on the progeny, 110
Effects of a whey protein product and spray-dried animal plasma on growth performance of weanling pigs, 647
Effects of dietary calcium:phosphorus ratios on apparent absorption of calcium and phosphorus in the small intestine, cecum, and colon of pigs, 106
Effects of dietary carbohydrates and buffering capacity on nutrient digestibility and manure characteristics in finishing pigs, 3096
Effects of eating space and availability of water in feeders on productivity and eating behavior of grower/finisher pigs, 865
Effects of feed physical form and buffering solutes on water disappearance and proximal stomach pH in swine, 2344
Effects of genetic type and protein levels on growth of swine, E32
Effects of on-farm diets for organic pig production on performance and carcass quality, 1199
Efficacy of yeast phytase in improving phosphorus bioavailability in a corn-soybean meal-based diet for growing pigs, 94
Enzyme supplementation and particle size of wheat in diets for nursery and finishing pigs, 3086
Expression of porcine transcription factors and genes related to fatty acid metabolism in different tissues and genetic populations, 2127
Expression of the porcine β_2-adrenergic receptor in Chinese hamster ovary cells, 2329
Expression of two variants of growth hormone receptor messenger ribonucleic acid in porcine liver, 306
Farrowing hut design and sow genotype (Camborough-15 vs 25% Meishan) effects on outdoor sow and litter productivity, 2832
Feeder location did not affect performance of weanling pigs in large groups, 2784
Feeding value of an enzymatically digested protein for early-weaned pigs, 318
Few differences found between early- and late-weaned pigs raised in the same environment, 38
Frequency of the Rendement Napole RN$^-$ allele in a population of American Hampshire pigs, 1811
Further assessment of the dietary lysine requirement of finishing gilts, 987
Group size and floor-space allowance can affect weanling-pig performance, 2062
Growing-finishing performance and carcass characteristics of pigs fed normal and genetically modified low-phytate corn, 1529
Growth performance and adipose tissue deposition in barrows fed n-methyl-D,L-aspartate, 2504
Growth-promoting efficacy in young pigs of two sources of zinc oxide having either a high or a low bioavailability of zinc, 2896
Growth promotion effects and plasma changes from feeding high dietary concentrations of zinc and copper to weanling pigs (regional study), 1010
High dietary copper improves odor characteristics of swine waste, 859
Hormonal therapy for sows weaned during fall and winter, 2068
Identification of quantitative trait loci affecting birth characters and accumulation of backfat and weight in a Meishan-White Composite resource population, 2547
Immune status of PIC Camborough-15 sows, 25% Meishan sows, and their offspring kept indoors and outdoors, 2561
Influence of vitamin A injection before mating on oocyte development, follicular hormones, and ovulation in gilts fed high-energy diets, 1598
Insulin regulation of leptin expression in streptozotocin diabetic pigs, 1497
Integrated adrenal, somatotropic, and immune responses of growing pigs to treatment with lipopolysaccharide, 1892
Interestrous interval of cyclic gilts is decreased by systemic but not intrauterine administration of exogenous oxytocin, 2393
Interrelationships between dietary lysine, sex, and porcine somatotropin administration on growth performance and protein deposition in pigs between 80 and 120 kg live weight, 2639
Linkage mapping of the Mahogany (attractin) locus in cattle and pigs, 2480
Messenger ribonucleic acid expression of the MyoD gene family in muscle tissue at slaughter in relation to selection for porcine growth rate, 69
Modulation of porcine adipocyte β-adrenergic receptors by a β-adrenergic agonist, 919
Modulation of porcine adipocyte β-adrenergic receptors by hormones and butyrate, 927
Morphology of luminal and glandular epithelial cells from pig endometrium grown on plastic or extracellular matrices, 131
Ornithine alpha-ketoglutarate and creatine effects on growth and plasma metabolites of nursery pigs, 1022
Phosphorus bioavailability and digestibility of normal and genetically modified low-phytate corn for pigs, 675
Plasmid transfection and retroviral transduction of porcine muscle cells for cell-mediated gene transfer, 909
Rapid communication: Genetic linkage and physical mapping of a porcine sequence characterized amplified region (SCAR) to chromosome 6, 3195
Rapid communication: Linkage and physical mapping of the porcine *melanocortin-4 receptor* (*MC4R*) gene, 791
Rapid communication: Linkage mapping of the porcine *Agouti* gene, 1396
Rapid Communication: Mapping of the *Mannose-Binding Lectin 2* (*MBL2*) gene to pig chromosome 14, 2992
Rapid communication: Mapping of the *Myeloperoxidase* (*MPO*) gene to pig chromosome 12, 3189
Rapid communication: Porcine vitamin D-25-hydroxylase maps to chromosome 5, 3193
Rapid communication: Twenty-six new porcine microsatellites from a microsatellite enriched microdissected chromosome 8 library, 3191
Real-time diagnosis of ovulation and ovarian cysts in sows and its impact on artificial insemination efficiency, E33
Real-time ultrasonography and pregnancy diagnosis in swine, E34
Serum concentrations of IGF-I, estradiol-17β, testosterone, and relative amounts of IGF binding proteins (IGFBP) in growing boars, barrows, and gilts, 2581
Social effects and boar taint: Significance for production of slaughter boars (*Sus scrofa*), 296

Somatotropin and adipose tissue metabolism: Substrate and temporal effects, 1236
The effect of adipocyte and heart fatty acid-binding protein genes on intramuscular fat and backfat content in Meishan crossbred pigs, 552
The effects of calcium benzoate in diets with or without organic acids on dietary buffering capacity, apparent digestibility, retention of nutrients, and manure characteristics in swine, 2622
The effects of citric acid on phytate-phosphorus utilization in young chicks and pigs, 682
The effects of mutated skeletal ryanodine receptors on hypothalamic-pituitary-adrenal axis function in boars, 1319
The effects of selection of pigs on growth rate vs leanness on histochemical characteristics of different muscles, 1247
The importance of seminal plasma on the fertility of subsequent artificial inseminations in swine, 443
The influence of dexamethasone and insulin on expression of CCAAT/enhancer binding protein isoforms during preadipocyte differentiation in porcine stromal-vascular cell cultures: Evidence for very early expression of C/EBPα, 1227
Total radioactive residues and clenbuterol residues in swine after dietary administration of [^{14}C]clenbuterol for seven days and preslaughter withdrawal periods of zero, three, or seven days, 2903

Pituitary
GnRH antagonist inhibition of gonadotropin and steroid secretion in boars in vivo and steroid production in vitro, 1591
Neuroendocrine regulation of reproduction in male domestic animal species: Role of excitatory amino acids, E16

Placenta
Effect of estradiol-17β administration during the time of conceptus elongation on placental size at term in Meishan pigs, 1047

Planting
Effects of planting density and processing method on laboratory characteristics of grain sorghum for ruminants, 2032

Plasma
Adaptations of glucose metabolism in multiparous sows: Effects of pregnancy and feeding level, 2933
Determination of the methionine requirement of growing double-muscled Belgian Blue bulls with a three-step method, 233
Effect of level of whole cottonseed on intake, digestibility, and performance of growing male goats fed hay-based diets, 1677
Effects of pelleting and pellet conditioning temperatures on weanling pig performance, 3014
Progress in transgenic production of human plasma proteins in mammary bioreactors, 1A

Plasma Flow
Net flux of nonesterified fatty acids, cholesterol, triacylglycerol, and glycerol across the portal-drained viscera and liver of pregnant ewes, 1380

Plasticity
Muscle fiber plasticity in farm mammals, E2

Poisoning
Alterations in hemograms and serum biochemical analytes of steers after prolonged consumption of endophyte-infected tall fescue, 1029
Impacts of an endophyte-infected fescue seed diet on traits of mouse lines divergently selected for response to that same diet, 1191

Pollution
Application of nutritional knowledge for developing econutrition feeding programs on commercial swine farms, E22

Polyethylene Glycol
Polyethylene glycol as a means for reducing the impact of condensed tannins in carob pulp: Effects on lamb growth performance and meat quality, 810
Preferences for foods varying in macronutrients and tannins by lambs supplemented with polyethylene glycol, 1443
Self-regulation of intake of polyethylene glycol by sheep fed diets varying in tannin concentrations, 1206

Polymerase Chain Reaction
ARPP-16 mRNA is up-regulated in the longissimus muscle of pigs possessing an elevated growth rate, 1475
Effects of muscle type, castration, age, and compensatory growth rate on androgen receptor mRNA expression in bovine skeletal muscle, 629
Rapid communication: Two highly polymorphic dinucleotide microsatellites in rainbow trout (*Oncorhynchus mykiss*): *OmyRGT1-8TUF* and *OmyRGT23TUF*, 490

Polymorphism
Rapid communication: Mapping of the *Myeloperoxidase* (*MPO*) gene to pig chromosome 12, 3190
Rapid communication: Polymorphism in the goat *β-lactoglobulin* proximal promoter region, 1101
Rapid communication: Single nucleotide polymorphisms detected in exon 10 of the bovine *growth hormone receptor* gene, 2230
Rapid communication: Two highly polymorphic dinucleotide microsatellites in rainbow trout (*Oncorhynchus mykiss*): *OmyRGT1-8TUF* and *OmyRGT23TUF*, 490

Porcine
GnRH antagonist inhibition of gonadotropin and steroid secretion in boars in vivo and steroid production in vitro, 1591
Rapid communication: physical and genetic mapping of the *Peroxisome Proliferator Activated Receptor* γ (*PPAR*γ) gene to porcine chromosome 13, 1392

Pork
Assessment of fresh pork color with color machine vision, 3078
Quantification of pork belly and Boston butt quality attribute preferences of South Korean customers, 2608
Variation in proteolysis, sarcomere length, collagen content, and tenderness among major pork muscles, 958

Portion Size
Identification of optimal ranges in ribeye area for portion cutting of beef steaks, 966

Postmortem Changes
Ionic strength-induced inactivation of μ-calpain in postmortem muscle, 2336
Rigor temperature and meat quality characteristics of lamb longissimus muscle, 2842

Postnatal Development
Nutritional regulation of the genes encoding the acid-labile subunit and other components of the circulating insulin-like growth factor system in the sheep, 2681

Postpartum Interval
Effect of dietary energy on milk production and metabolic hormones in thin, primiparous beef heifers, 530
Effect of the previously gravid uterine horn and postpartum interval on follicular diameter and conception rate in beef cows treated with estradiol benzoate and progesterone, 2172
Effect of tropically adapted sire breeds on preweaning growth of F_1 Angus calves and reproductive performance of their Angus dams, 1111
The effect of progesterone alone or in combination with estradiol on follicular dynamics, gonadotropin profiles, and estrus in beef cows following calf isolation and restricted suckling, 1917

Postpartum Period
Plasma fatty acids, prostaglandin $F_{2\alpha}$ metabolite, and reproductive response in postpartum heifers fed rumen bypass fat, 139

Postweaning Interval
Accounting for lactation length and weaning-to-conception interval in genetic evaluations for litter size in swine, 1796
Growth-Promoting systems for heifer calves and yearlings finished in the feedlot, 2485

Potassium Permanganate
Feasibility of using lignin isolated from forages by solubilization in acetyl bromide as a standard for lignin analyses, 3135

Potato
Effects of graded levels of potato by-products in barley- and corn-based beef feedlot diets: I.Feedlot performance, carcass traits, meat composition, and appearance, 1829
Effects of graded levels of potato by-products in barley- and corn-based beef feedlot diets: II. Palatability, 1837

Potato Chips
Effect of consumption of potato chip scraps on the performance of pigs, 2021

PPARγ
Rapid communication: Physical and genetic mapping of the *Peroxisome Proliferator Activated Receptor* γ (*PPAR*γ) gene to porcine chromosome 13, 1392

Predicted Difference
Comparison of restricted maximum likelihood and method $\mathfrak{R}$ for estimating heritability and predicting breeding value under selection, 2554

Pregnancy
Ability of induced corpora lutea to maintain pregnancy in beef cows, 2942
Adaptations of glucose metabolism in multiparous sows: Effects of pregnancy and feeding level, 2933

Additive genetic parameter estimates for heifer pregnancy and subsequent reproduction in Angus females, 2091
Assessment of hypothalamic-pituitary-adrenal axis and sympathetic nervous system activity in pregnant sows through the measurement of glucocorticoids and catecholamines in urine, 420
Effect of the previously gravid uterine horn and postpartum interval on follicular diameter and conception rate in beef cows treated with estradiol benzoate and progesterone, 2172
Inhibition of prolactin in the last trimester of gestation decreases mammary gland development in gilts, 1303
Real-time ultrasonography and pregnancy diagnosis in swine, E34
Response of nitrogen metabolism in preparturient dairy cows to methionine supplementation 742
Single daily intramuscular injections of low quantities of recombinant ovine interferon-τ extends luteal life-span in Angora goats, 2966
Undegraded intake protein supplementation: II. Effects on plasma hormone and metabolite concentrations in periparturient beef cows fed low-quality hay during gestation and lactation, 456

Preweaning Period
Preweaning growth curves in Brown Swiss and Pirenaica calves with emphasis on individual variability, 1132

Processing
Effect of degree of corn processing on urinary nitrogen composition, serum metabolite and insulin profiles, and performance by finishing steers, 2464

Production
Effects of eating space and availability of water in feeders on productivity and eating behavior of grower/finisher pigs, 865
Farrowing hut design and sow genotype (Camborough-15 vs 25% Meishan) effects on outdoor sow and litter productivity, 2832
Modeling selection for production traits under constant infection pressure, 2809

Production Economics
Age of calf at weaning of spring-calving beef cows and the effect on cow and calf performance and production economics, 1403

Profitability
Evaluation of Egyptian sheep production systems: I. Breed crosses and management systems, 283
Management and financial considerations affecting the decision to cynchronize estrus in beef females, E37

Progeny Testing
Relationship between a bull's parental genetic merit difference and subsequent progeny trait variability in Angus, Gelbvieh, and Limousin cattle, 2540

Progestagen
Current concepts in synchronization of estrus: Sheep and goats, E36

Progesterone
Consequences of different patterns of feed intake during the estrous cycle in gilts on subsequent fertility, 1556
Dietary energy source at two feeding levels during lactation of primiparous sows: II. Effects on periestrus hormone profiles and embryonal survival, 405
The effect of progesterone alone or in combination with estradiol on follicular dynamics, gonadotropin profiles, and estrus in beef cows following calf isolation and restricted suckling, 1917
The strategic use of estradiol to enhance fertility and submission rates of progestin-based estrus synchronization programs in dairy herds, 523

Progestogens
Synchronizing estrus and(or) ovulation in beef cows after combinations of GnRH, norgestomet, and prostaglandin $F_{2\alpha}$ with or without timed insemination, 1747

Prolactin
Inhibition of prolactin in the last trimester of gestation decreases mammary gland development in gilts, 1303
The activity of transcription factor Stat5 responds to prolactin, growth hormone, and IGF-I in rat and bovine mammary explant culture, 3114

Promoter
Rapid communication: Polymorphism in the goat *β-lactoglobulin* proximal promoter region, 1101

Propionic Acid
Effects of supplemental zinc and manganese on ruminal fermentation, forage intake, and digestion by cattle fed prairie hay and urea, 2972

Prostaglandins
Ability of induced corpora lutea to maintain pregnancy in beef cows, 2942
Acute phase responses of pigs challenged orally with *Salmonella typhimurium*, 1885
Current concepts in synchronization of estrus: Sheep and goats, E36
Effect of dietary selenium and vitamin E on spermatogenic development in boars, 1537
Integrated adrenal, somatotropic, and immune responses of growing pigs to treatment with lipopolysaccharide, 1892
Plasma fatty acids, prostaglandin $F_{2\alpha}$ metabolite, and reproductive response in postpartum heifers fed rumen bypass fat, 139
Synchronizing estrus and(or) ovulation in beef cows after combinations of GnRH, norgestomet, and prostaglandin $F_{2\alpha}$ with or without timed insemination, 1747

Protein
Effect of dietary concentration of metabolizable lysine on finishing cattle performance, 1060
Effects of crude protein concentration in diets of feedlot steers fed to achieve stepwise increases in rate of gain, 3036
Effects of dietary protein concentration on postweaning growth of Boer crossbred and Spanish goat wethers, 2275
Effects of protein concentration and degradability on performance, ruminal fermentation, and nitrogen metabolism in rapidly growing heifers fed high-concentrate diets from 100 to 230 kg body weight, 1667
Effects of supplemental degradable intake protein on utilization of medium- to low-quality forages, 224
Efficacy of laidlomycin propionate in low-protein diets fed to growing beef steers: Effects on steer performance and ruminal nitrogen metabolism, 173
Impact of dietary lysine intake during lactation on follicular development and oocyte maturation after weaning in primiparous sows, 993
Interaction of protein nutrition and laidlomycin on feedlot growth performance and digestive function in Holstein steers, 1768
Interrelationships between dietary lysine, sex, and porcine somatotropin administration on growth performance and protein deposition in pigs between 80 and 120 kg live weight, 2639
Lactational and subsequent reproductive responses of lactating sows to dietary lysine (protein) concentration, 348
Near infrared spectrosocopy for biomonitoring: Cow milk composition measurement in a spectral region from 1,100 to 2,400 nanometers, 515
Physiological levels of Stat5 DNA binding activity and protein in bovine mammary gland, 3126
Preferences for foods varying in macronutrients and tannins by lambs supplemented with polyethylene glycol, 1443
Progress in transgenic production of human plasma proteins in mammary bioreactors, 1A

Protein Degradation
Effects of supplemental protein type on productivity of primiparous beef cows, 3027
Protein kinetics in callipyge lambs, 78

Protein Deposition
Influence of dietary lysine and energy intakes on body protein deposition and lysine utilization in the growing pig, 1510

Protein Digestion
A dynamic model of protein digestion in the small intestine of pigs, 328

Protein Intake
Effects of supplemental protein type on productivity of primiparous beef cows, 3027
Effects of supplementing prairie hay with corn and soybean meal on intake, digestion, and ruminal measurements by beef steers, 3144
Performance and carcass merit of growing beef steers with chlortetracycline-modified sensitivity to pituitary releasing hormones and fed two dietary protein levels, 2765

Protein Sources
Feeding value of an enzymatically digested protein for early-weaned pigs, 318

Protein Supplements
Pretanned leather shavings in a supplement mixture for steers: I. In situ and in vitro disappearance, ruminal fermentation, and organic matter, nitrogen, and fiber digestion, 726

Pretanned leather shavings in a supplement mixture for steers: II. Digesta kinetics, ruminal fermentation, and grazing behavior in steers grazing dormant wheatgrass pasture, 735
Undegraded intake protein supplementation: I. Effects on forage utilization and performance of periparturient beef cows fed low-quality hay, 449
Undegraded intake protein supplementation: II. Effects on plasma hormone and metabolite concentrations in periparturient beef cows fed low-quality hay during gestation and lactation, 456
Protein Synthesis
Compartmental modeling with nitrogen-15 to determine effects of degree of fat saturation on intraruminal N recycling, 2421
Effects of degree of fat saturation on fiber digestion and microbial protein synthesis when diets are fed twelve times daily, 2412
Protein kinetics in callipyge lambs, 78
Proteinases
Bovine *CAPN1* maps to a region of BTA29 containing a quantitative trait locus for meat tenderness, 2589
Ionic strength-induced inactivation of μ- calpain in postmortem muscle, 2336
Proteolysis
Effect of the callipyge gene on muscle growth, calpastatin activity, and tenderness of three muscles across the growth curve, 2836
Ionic strength-induced inactivation of μ-calpain in postmortem muscle, 2336
Rigor temperature and meat quality characteristics of lamb longissimus muscle, 2842
The use of vitamin D_3 to improve beef tenderness, 2615
Variation in proteolysis, sarcomere length, collagen content, and tenderness among major pork muscles, 958
Protozoa
Actual and potential applications of *Yucca shidigera* and *Quillaja saponaria* saponins in human and animal nutrition, E9
Effects of degree of fat saturation on fiber digestion and microbial protein synthesis when diets are fed twelve times daily, 2412
Effects of protozoa on bacterial nitrogen recycling in the rumen, 2431
Pubertal Mammary Growth
Local regulation of pubertal mammary growth in heifers, 36A
Puberty
Effects of dietary fat and sire breed on puberty, weight, and reproductive traits of F_1 beef heifers, 2244
Endocrine studies in ivermectin-treated heifers from birth to puberty, 817
Purchasing Habits
How can the beef industry recapture lost consumer demand?, E40
Purge
Effects of a unique application of electrical stimulation on tenderness, color, and quality attributes of the beef longissimus muscle, 1504
Pyridoxine
Added dietary pyridoxine, but not thiamin, improves weanling pig growth performance, 88

Q

Quality
Assessment of fresh pork color with color machine vision, 3078
Grazing methods and stocking rates for direct-seeded alfalfa pastures: II. Pasture quality and diet selection, 2202
New approaches for improving tenderness, quality, and consistency of beef, E38
Quantitative Trait Loci
A QTL on pig chromosome 4 affects fatty acid metabolism: Evidence from an Iberian by Landrace intercross, 2525
Bovine *CAPN1* maps to a region of BTA29 containing a quantitative trait locus for meat tenderness, 2589
Identification of quantitative trait loci affecting birth characters and accumulation of backfat and weight in a Meishan-White Composite resource population, 2547
Quantitative Traits
Quantitative trait loci affecting growth and carcass composition of cattle segregating alternate forms of myostatin, 560
Quillaja saponaria
Actual and potential applications of *Yucca shidigera* and *Quillaja saponaria* saponins in human and animal nutrition, E9

R

Rabbits
Effect of fiber source on cecal fermentation and nitrogen recycled through cecotrophy in rabbits, 638
Ractopamine
Response of C_2C_{12} mouse and turkey skeletal muscle cells to the β-adrenergic agonist ractopamine, 699
Rainbow Trout
Rapid communication: Two highly polymorphic dinucleotide microsatellites in rainbow trout (*oncorhynchus mykiss*): *OmyRGT18TUF* and *OmyRGT23TUF*, 490
Ram Breeds
Evaluation of Dorset, Finnsheep, Romanov, Texel, and Montadale breeds of sheep: I. Effects of ram breed on productivity of ewes of two crossbred populations, 1422
Rams
Gonadal function, sexual behavior, feedlot performance, and carcass traits of ram lambs actively immunized against GnRH, 2237
Influence of castration and estrogen replacement on sexual behavior of female-oriented, male-oriented, and asexual rams, 1947
Range Management
Designing and conducting experiments for range beef cows, E42
Rates
The effect of physical form of orchardgrass hay on the passage of particulate matter through the rumen of sheep, 1338
Receptors
Modulation of porcine adipocyte β-adrenergic receptors by a β-adrenergic agonist, 919
Modulation of porcine adipocyte β-adrenergic receptors by hormones and butyrate, 927
Rapid communication: Single nucleotide polymorphisms detected in exon 10 of the bovine *growth hormone receptor* gene, 2230
Receptor Stimulation
Modulation of porcine adipocyte β-adrenergic receptors by a β-adrenergic agonist, 919
Recombinant
Progress in transgenic production of human plasma proteins in mammary bioreactors, 1A
Red Deer
Milk production and composition in captive Iberian red deer (*Cervus elaphus hispanicus*): Effect of birth date, 2771
Technical note: The ability of mathematical models to describe the shape of lactation curves, 3010
Red Seabream
Rapid Communication: Nucleotide sequence of red seabream, *Pagrus major*, β-actin cDNA, 2990
Refeeding
Timing of realimentation of mature cows that were feed-restricted during pregnancy influences calf birth weights and growth rates, 2790
Reflectance
Silkiness in brown mink pelts characterized with optical methods, 1697
Rendement Napole
The effect of the Halothane and Rendement Napole genes on carcass and meat quality characteristics of pigs, 2862
Reproduction
Consequences of different patterns of feed intake during the estrous cycle in gilts on subsequent fertility, 1556
Dietary fats as reproductive nutraceuticals in beef cattle, E14
Economic value of characteristics in heifer development: ReproSim software, E4
Effect of crambe meal on performance, reproduction, and thyroid hormone levels in gestating and lactating beef cows, 2269
Effect of organic and inorganic selenium sources and levels on sow colostrum and milk selenium content, 100
Effect of vitamin E sources (RRR- or all-*rac*-α-tocopheryl acetate) and levels on sow reproductive performance, serum, tissue, and milk α-tocopherol contents over a five-parity period, and the effects on the progeny, 110
Energy intake regulates ovarian function in beef cattle, E25
Genetic analysis of litter size in Targhee, Suffolk, and Polypay sheep, 2113
Genetic parameters among weight, prolificacy, and wool traits of Columbia, Polypay, Rambouillet, and Targhee sheep, 846
Impacts of an endophyte-infected fescue seed diet on traits of mouse lines divergently selected for response to that same diet, 1191

Nitrogen metabolism and fertility in cattle: II. Development of oocytes recovered from heifers offered diets differing in their rate of nitrogen release in the rumen, 2670
Relationships between human-animal interactions and productivity of commercial dairy cows, 2821
Response to 13 generations of selection for increased 8-week body weight in lines of mice carrying a sheep growth hormone-based transgene, 832
Suppressor activity of bone marrow cells and localization of fluorescent-labeled bone marrow cells within ovine endometrial tissue, 709
Timing of realimentation of mature cows that were feed-restricted during pregnancy influences calf birth weights and growth rates, 2790
Reproductive Efficiency
Can beef heifers and young postpartum cows be physiologically and nutritionally manipulated to optimize reproductive efficiency?, E41
Reproductive Performance
Effect of gilt development diet on the reproductive performance of primiparous sows, 1125
Procedures that support reproductive management of replacement beef heifers, E5
Reproductive Traits
Evaluation of Dorset, Finnsheep, Romanov, Texel, and Montadale breeds of sheep: I. Effects of ram breed on productivity of ewes of two crossbred populations, 1422
Requirements
Determination of the methionine requirement of growing double-muscled Belgian Blue bulls with a three-step method, 233
Limiting amino acids for growing Holstein steers limit-fed soybean hull-based diets, 1997
Metabolizable methionine and lysine requirements of growing cattle, 199
Research paradigms behind amino acid requirements of the lactating sow: Theory and future application, 48A
Residues
Total radioactive residues and clenbuterol residues in swine after dietary administration of [^{14}C]clenbuterol for seven days and preslaughter withdrawal periods of zero, three, or seven days, 2903
Resistance
Heritabilities of and genetic relationships between salmonella resistance traits in broilers, 2287
Responses
The relationship between reaction to sudden, intermittent movements and sounds and temperament, 1467
Response Surface Model
Research paradigms behind amino acid requirements of the lactating sow: Theory and future application, 48A
Restricted Feeding
Effects of energy intake, implantation, and subcutaneous fat end point on feedlot steer performance and carcass composition, 825
Retention
The effects of calcium benzoate in diets with or without organic acids on dietary buffering capacity, apparent digestibility, retention of nutrients, and manure characteristics in swine, 2622
Retroviridae
Plasmid transfection and retroviral transduction of porcine muscle cells for cell-mediated gene transfer, 909
Reverse Transcription
ARPP-16 mRNA is up-regulated in the longissimus muscle of pigs possessing an elevated growth rate, 1475
Riboflavin
Riboflavin and niacin concentrations of bison cuts, 1267
Risk Assessment
Technical note: Constrained optimization of breed composition in composite populations to balance net merit and risk, 2105
Rumen
Absorption of 2-hydroxy-4-(methylthio)butanoic acid by isolated sheep ruminal and omasal epithelia, 1078
Effects of diet forage:concentrate ratio and metabolizable energy intake on isolated rumen epithelial cell metabolism in vitro, 771
Effects of protein concentration and degradability on performance, ruminal fermentation, and nitrogen metabolism in rapidly growing heifers fed high-concentrate diets from 100 to 230 kg body weight, 1667
Effects of supplemental zinc and manganese on ruminal fermentation, forage intake, and digestion by cattle fed prairie hay and urea, 2972
Sheep rumen metabolic development in response to age and dietary treatments, 1990
Site of administration and duration of feeding oleamide to cattle on feed intake and ruminal fatty acid concentrations, 2745
The effect of physical form of orchardgrass hay on the passage of particulate matter through the rumen of sheep, 1338
Rumen Digestion
Compartmental modeling with nitrogen-15 to determine effects of degree of fat saturation on intraruminal N recycling, 2421
Rumen Fermentation
Intraruminal supplementation with increasing levels of exogenous polysaccharide-degrading enzymes: Effects on nutrient digestion in cattle fed a barley grain diet, 477
Ruminal fermentation and duodenal flow following progressive inoculations of fauna-free wethers with major individual species of ciliate protozoa or total fauna, 750
Ruminal Nitrogen Deficiency
Accounting for the effects of a ruminal nitrogen deficiency within the structure of the Cornell Net Carbohydrate and Protein System, 1648
Ruminant Flora
Effects of protozoa on bacterial nitrogen recycling in the rumen, 2431
Ruminants
Determination of the methionine requirement of growing double-muscled Belgian Blue bulls with a three-step method, 233
Effects of planting density and processing method on laboratory characteristics of grain sorghum for ruminants, 2032
Net flux of nonesterified fatty acids, cholesterol, triacylglycerol, and glycerol across the portal-drained viscera and liver of pregnant ewes, 1380
Practical aspects of urea and ammonia metabolism in ruminants, E21
Single daily intramuscular injections of low quantities of recombinant ovine interferon-τ extends luteal life-span in Angora goats, 2966
Rumination
Effects of supplementing prairie hay with corn and soybean meal on intake, digestion, and ruminal measurements by beef steers, 3144
Ryanodine Receptor
The effects of mutated skeletal ryanodine receptors on hypothalamic-pituitary-adrenal axis function in boars, 1319

S

Safety
Total radioactive residues and clenbuterol residues in swine after dietary administration of [^{14}C]clenbuterol for seven days and preslaughter withdrawal periods of zero, three, or seven days, 2903
Safflower
Effects of dietary fat and sire breed on puberty, weight, and reproductive traits of F_1 beef heifers, 2244
Salers
Evaluation of crossbred calf and cow types for the coastal plain of North Carolina, 2253
Salmonella
Heritabilities of and genetic relationships between salmonella resistance traits in broilers, 2287
Saponins
Actual and potential applications of *Yucca shidigera* and *Quillaja saponaria* saponins in human and animal nutrition, E9
Sarcomere
Building the perfect beast: Mechanisms of myofibril assembly, E1
Sarcomere Length
Variation in proteolysis, sarcomere length, collagen content, and tenderness among major pork muscles, 958
Scrotum
Comparison of models for genetic evaluation of scrotal circumference in crossbred bulls, 275
Seasonal Behavior
Duration of the seasonal anestrus in sheep selected for fertility in a fall-lambing system, 1149

Seasons
Hormonal therapy for sows weaned during fall and winter, 2068
Segregated Early Weaning
Evaluation of site and age of weaning on pig growth performance, 1726
Selection
Comparison of plasma FSH concentration in boars and gilts from lines selected for ovulation rate and embryonal survival, and litter size and estimation of (co)variance components for FSH and ovulation rate, 1430
Comparison of restricted maximum likelihood and method ℜ for estimating heritability and predicting breeding value under selection, 2554
Duration of the seasonal anestrus in sheep selected for fertility in a fall-lambing system, 1149
Evaluation of Egyptian sheep production systems: II. Breeding objectives for purebred and composite breeds, 288
Genetic aspects of replacement heifers in current and future production systems, E3
Genetic parameter estimates for serum insulin- like growth factor-I concentration and carcass traits in Angus beef cattle, 2305
Modeling selection for production traits under constant infection pressure, 2809
Predicting growth in Angus bulls: The use of GHRH challenge, insulin-like growth factor-I, and insulin-like growth factor binding proteins, 2913
Response to 13 generations of selection for increased 8-week body weight in lines of mice carrying a sheep growth hormone-based transgene, 832
The effects of selection of pigs on growth rate vs leanness on histochemical characteristics of different muscles, 1247
Selection Criteria
A two-sample method for assessing growth hormone response to growth hormone-releasing hormone challenge: Use as a predictor of gain in beef bulls, 1954
Selection Methods
Comparison of restricted maximum likelihood and method ℜ for estimating heritability and predicting breeding value under selection, 2554
Selective Grazing
Social behavior of grazing beef cattle: Implications for management, E18
Selenium
Assessment of trace mineral status of ruminants: A review, E20
Does selenium accumulation in meat confer health benefits to consumers?, E11
Effect of dietary selenium and vitamin E on spermatogenic development in boars, 1537
Effect of dietary selenium and vitamin E on the ultrastructure and ATP concentration of boar spermatozoa, and the efficacy of added sodium selenite in extended semen on sperm motility, 1544
Effect of organic and inorganic selenium sources and levels on sow colostrum and milk selenium content, 100
Seleno Amino Acids
Does selenium accumulation in meat confer health benefits to consumers?, E11
Selenomethionine
Does selenium accumulation in meat confer health benefits to consumers?, E11
Semen
The importance of seminal plasma on the fertility of subsequent artificial inseminations in swine, 443
Seminal Plasma
The importance of seminal plasma on the fertility of subsequent artificial inseminations in swine, 443
Sensory Quality
Effect of dietary formates on growth performance, carcass traits, sensory quality, intestinal microflora, and stomach alterations in growing-finishing pigs, 1875
Sexual Behavior
Influence of castration and estrogen replacement on sexual behavior of female-oriented, male-oriented, and asexual rams, 1947
Sexual Dimorphism
Genetic analysis of growth curve parameters for male and female chickens resulting from selection on shape of growth curve, 2515
Sexual Maturity
Social effects and boar taint: Significance for production of slaughter boars (*Sus scrofa*), 296
Shear
Effects of rate of pH fall, time of deboning, aging period, and their interaction on veal quality characteristics, 1845
Sheep
Acetyl-CoA carboxylase and fatty acid synthase activity and immunodetectable protein in adipose tissues of ruminants: Effect of temperature and feeding level, 2383
Adrenal function in Angora goats: A comparative study of adrenal steroidogenesis in Angora goats, Boer goats, and Merino sheep, 1036
Amino acid flux in ruminal and gastric veins of sheep: Effects of ruminal and omasal injections of free amino acids and carnosine, 158
Assessment of trace mineral status of ruminants: A review, E20
Changes in postprandial plasma and extracellular and ruminal fluid volumes in wethers fed or unfed for 72 hours, 216
Chromium supplementation does not influence glucose metabolism or insulin action in response to cold exposure in mature sheep, 2950
Current concepts in synchronization of estrus: Sheep and goats, E36
Determination of parotid urea secretion in sheep by means of ultrasonic flow probes and a multifactorial regression analysis, 471
Duration of the seasonal anestrus in sheep selected for fertility in a fall-lambing system, 1149
East Friesian germplasm: Effects on milk production, lamb growth, and lamb survival, E7
Effect and absorption of histamine in sheep rumen: Significance of acidotic epithelial damage, 464
Effect of individual terpenes on consumption of alfalfa pellets by sheep, 1636
Effects of protozoa on bacterial nitrogen recycling in the rumen, 2431
Effects of temperature and plane of nutrition on beta-adrenergic receptors in heart, kidney, and liver of lambs, 1907
Evaluation of Dorset, Finnsheep, Romanov, Texel, and Montadale breeds of sheep: I. Effects of ram breed on productivity of ewes of two crossbred populations, 1422
Evaluation of Egyptian sheep production systems: I. Breed crosses and management systems, 283
Evaluation of Egyptian sheep production systems: II. Breeding objectives for purebred and composite breeds, 288
Evaluation of ewe and lamb immune response when ewes were supplemented with vitamin E, 2731
Free and peptide amino acid net flux across the rumen and the mesenteric- and portal-drained viscera of sheep, 1960
Genetic analysis of litter size in Targhee, Suffolk, and Polypay sheep, 2113
Genetic correlations for daily gain between ram and ewe lambs fed in feedlot conditions and ram lambs fed in Pinpointer units, 1155
Hand-feeding and gentling influence early-weaned lambs' attachment responses to their stockperson, 879
Influence of the novel urease inhibitor N-(n-butyl) thiophosphoric triamide on ruminant nitrogen metabolism: II. Ruminal nitrogen metabolism, diet digestibility, and nitrogen balance in lambs, 188
Investigation of the primary cause of hypoadrenocorticism in South African Angora goats (*Capra aegagrus*): A comparison with Boer goats (*Capra hircus*) and Merino sheep (*Ovis aries*), 371
Net flux of nonesterified fatty acids, cholesterol, triacylglycerol, and glycerol across the portal-drained viscera and liver of pregnant ewes, 1380
Net portal appearance of volatile fatty acids in sheep intraruminally infused with mixtures of acetate, propionate, isobutyrate, butyrate, and valerate, 1372
Ovine adipose tissue monounsaturated fat content is correlated to depot-specific expression of the stearoyl-CoA desaturase gene, 62
Polyethylene glycol as a means for reducing the impact of condensed tannins in carob pulp: Effects on lamb growth performance and meat quality, 810
Portal-drained visceral metabolism of 3-hydroxybutyrate in sheep, 2223
Potential for Hair Sheep in the United States, E8
Preferences for foods varying in macronutrients and tannins by lambs supplemented with polyethylene glycol, 1443

Preparation of an epithelium-free mammary fat pad and subsequent mammogenesis in ewes, 2177
Protein kinetics in callipyge lambs, 78
Rapid communication: A single-strand conformation polymorphism in the ovine *interleukin-2* (*IL-2*) gene, 2754
Rapid communication: Localization of POU1F1 to bovine, ovine, and caprine 1q21-22, 242
Rapid communication: Nucleotide sequence of the ovine lipoprotein lipase cDNA, 2994
Roles of novelty, generalization, and postingestive feedback in the recognition of foods by lambs, 3060
Self-regulation of intake of polyethylene glycol by sheep fed diets varying in tannin concentrations, 1206
Sheep rumen metabolic development in response to age and dietary treatments, 1990
Subclinical infection with the nematode *Trichostrongylus colubriformis* increases gastrointestinal tract leucine metabolism and reduces availability of leucine for other tissues, 380
Suppressor activity of bone marrow cells and localization of fluorescent-labeled bone marrow cells within ovine endometrial tissue, 709
The effect of physical form of orchardgrass hay on the passage of particulate matter through the rumen of sheep, 1338

Sheep Breeds
Characteristics of Lacha and Rasa Aragonesa lambs slaughtered at three live weights, 3070

Sigmoidal Functions
A generalized Michaelis-Menten equation for the analysis of growth, 1816

Signal Transduction
The activity of transcription factor Stat5 responds to prolactin, growth hormone, and IGF-I in rat and bovine mammary explant culture, 3114

Silage
Intake and chewing behavior of steers consuming switchgrass preserved as hay or silage, 1983
Intake, digestibility, and composition of orchardgrass and alfalfa silages treated with cellulase, inoculant, and formic acid fed to lambs, 2980

Simmental
Evaluation of crossbred calf and cow types for the coastal plain of North Carolina, 2253

Simulation
Simulation of cow-calf production systems in a range environment: I. Model development, 1159
Simulation of cow-calf production systems in a range environment: II. Model evaluation, 1170

Simulation Models
A kinetic model of phosphorus metabolism in growing goats, 2706

Sire Evaluation
Effect of tropically adapted sire breeds on preweaning growth of F_1 Angus calves and reproductive performance of their Angus dams, 1111

Sires
Differences among Wagyu sires for USDA carcass traits and palatability attributes of cooked ribeye steaks, 1710

Skeletal Muscle
Differential effects of dexamethasone and clenbuterol on rat growth and on β-2-adrenoceptors in lung and skeletal muscle, 604
Effects of birth weight and postnatal nutrition on neonatal sheep: II. Skeletal muscle growth and development, 50
Effects of muscle type, castration, age, and compensatory growth rate on androgen receptor mRNA expression in bovine skeletal muscle, 629
The effects of selection of pigs on growth rate vs leanness on histochemical characteristics of different muscles, 1247

Skins
Silkiness in brown mink pelts characterized with optical methods, 1697

Small Intestine
Effects of dietary calcium:phosphorus ratios on apparent absorption of calcium and phosphorus in the small intestine, cecum, and colon of pigs, 106

Social Dominance
Social behavior of grazing beef cattle: Implications for management, E18

Sodium Benzoate
Effect of dietary glycine and benzoate level on benzoate metabolism in mink (*Mustela vison*), blue fox (*Alopex lagopus*), and raccoon dog (*Nyctereutes procyonoides*), 976

Solubility
Chemical characteristics and relative bioavailability of supplemental organic zinc sources for poultry and ruminants, 2039

Somatic Cell Counts
Effects of intramammary infection and parity on calf weaning weight and milk quality in beef cows, 2508

Somatotropin
Administration of recombinant bovine tumor necrosis factor-α affects intermediary metabolism and insulin and growth hormone secretion in dairy heifers, 2164
A two-sample method for assessing growth hormone response to growth hormone-releasing hormone challenge: Use as a predictor of gain in beef bulls, 1954
Decreased growth in Angus steers with a short TG-microsatellite allele in the P1 promoter of the growth hormone receptor gene, 2099
Evaluation of models of acute and subacute acidosis on dry matter intake, ruminal fermentation, blood chemistry, and endocrine profiles of beef steers, 3155
Expression of two variants of growth hormone receptor messenger ribonucleic acid in porcine liver, 306
Influence of bovine growth hormone and growth hormone-releasing factor on messenger RNA abundance of lipoprotein lipase and stearoyl-CoA desaturase in the bovine mammary gland and adipose tissue, 412
Interrelationships between dietary lysine, sex, and porcine somatotropin administration on growth performance and protein deposition in pigs between 80 and 120 kg live weight, 2639
Nutritional regulation of the genes encoding the acid-labile subunit and other components of the circulating insulin-like growth factor system in the sheep, 2681
Physiological levels of Stat5 DNA binding activity and protein in bovine mammary gland, 3126
Rapid communication: Single nucleotide polymorphisms detected in exon 10 of the bovine *growth hormone receptor* gene, 2230
Serum concentrations of luteinizing hormone, growth hormone, testosterone, estradiol, and leptin in boars treated with n-methyl-D,L-aspartate, 365
Somatotropin and adipose tissue metabolism: Substrate and temporal effects, 1236
The activity of transcription factor Stat5 responds to prolactin, growth hormone, and IGF-I in rat and bovine mammary explant culture, 3114
The influence of recombinant bovine somatotropin on dietary energy level-related growth of Holstein-Friesian bull calves, 621
Undegraded intake protein supplementation: II. Effects on plasma hormone and metabolite concentrations in periparturient beef cows fed low-quality hay during gestation and lactation, 456

Sorghum
Effects of planting density and processing method on laboratory characteristics of grain sorghum for ruminants, 2032

Sounds
The relationship between reaction to sudden, intermittent movements and sounds and temperament, 1467

Sow
Research paradigms behind amino acid requirements of the lactating sow: Theory and future application, 48A

Sows
Adaptations of glucose metabolism in multiparous sows: Effects of pregnancy and feeding level, 2933
Cellular uptake of valine by lactating porcine mammary tissue, 2927
Current concepts in estrus synchronization in swine, E35
Dietary energy source at two feeding levels during lactation of primiparous sows: I. Effects on glucose, insulin, and luteinizing hormone and on follicle development, weaning-to-estrus interval, and ovulation rate, 396
Dietary energy source at two feeding levels during lactation of primiparous sows: II. Effects on periestrus hormone profiles and embryonal survival, 405
Effect of feather meal as a source of valine for lactating sows, 120
Effects of boar contact and housing conditions on estrus expression in weaned sows, 871
Effects of dietary lysine intake during lactation on blood metabolites, hormones, and reproductive performance in primiparous sows, 1001

Effects of dietary valine concentration on lactational performance of sows nursing large litters, 2879
Energy balance of lactating primiparous sows as affected by feeding level and dietary energy source, 1520
Factors that influence milk production in well-fed sows, 19A
Impact of dietary lysine intake during lactation on follicular development and oocyte maturation after weaning in primiparous sows, 993
Inhibition of prolactin in the last trimester of gestation decreases mammary gland development in gilts, 1303
Lactational and subsequent reproductive responses of lactating sows to dietary lysine (protein) concentration, 348
Lysine uptake by mammary gland tissue from lactating sows, 391
Responsiveness to boar stimuli and change in vulvar reddening in relation to ovulation in weaned sows, 3019
The effects of branched-chain amino acids on sow and litter performance, 658
The influence of suckling interval on milk production of sows, 2026
Soya Protein
The effect of texturized vegetable protein containing soy carbohydrate on oroileal transit of chromic oxide in cannulated dogs, 2633
Soybean Oilmeal
Zinc bioavailability in soybean meal, 1017
Spanish Goats
Effects of mimosine on fiber shedding, follicle activity, and fiber regrowth in Spanish goats, 1551
Species Comparison
Lactoferrin secretion into milk: Comparison between ruminant, murine, and human milk, 26A
Spectroscopy
Near infrared spectrosocopy for biomonitoring: Cow milk composition measurement in a spectral region from 1,100 to 2,400 nanometers, 515
Spermatogenesis
Effect of dietary selenium and vitamin E on spermatogenic development in boars, 1537
Spermatozoa
A sperm's perspective of fertilization, E17
Effect of dietary selenium and vitamin E on the ultrastructure and ATP concentration of boar spermatozoa, and the efficacy of added sodium selenite in extended semen on sperm motility, 1544
Sporidesmins
Sporidesmin-Induced mortality and histological lesions in mouse lines divergently selected for response to toxins in endophyte-infected fescue, 2157
Stable Isotopes
Subclinical infection with the nematode *Trichostrongylus colubriformis* increases gastrointestinal tract leucine metabolism and reduces availability of leucine for other tissues, 380
Statistics
Defining the experimental unit in grazing trials, E6
Stearoyl-CoA Desaturase
Biosynthesis of conjugated linoleic acid in ruminants, E28
Influence of bovine growth hormone and growth hormone-releasing factor on messenger RNA abundance of lipoprotein lipase and stearoyl-CoA desaturase in the bovine mammary gland and adipose tissue, 412
Steers
A review of the impact of feedlot management and nutrition on carcass measurements of feedlot cattle, E30
Alterations in hemograms and serum biochemical analytes of steers after prolonged consumption of endophyte-infected tall fescue, 1029
Dietary copper effects on lipid metabolism, performance, and ruminal fermentation in finishing steers, 2452
Effect of supplements on growth and forage intake by stocker steers grazing wheat pasture, 1625
Effects of base ingredient in cooked molasses blocks on intake and digestion of prairie hay by beef steers, 167
Effects of crude protein concentration in diets of feedlot steers fed to achieve stepwise increases in rate of gain, 3036
Effects of dietary copper concentration and source on performance and copper status of growing and finishing steers, 2446
Effects of dietary copper source and concentration on carcass characteristics and lipid and cholesterol metabolism in growing and finishing steers, 1053
Effects of soybean oil and dietary copper on ruminal and tissue lipid metabolism in finishing steers, 2713
Efficacy of laidlomycin propionate in low-protein diets fed to growing beef steers: Effects on steer performance and ruminal nitrogen metabolism, 173
Fatty acid composition, including conjugated linoleic acid, of intramuscular fat from steers offered grazed grass, grass silage, or concentrate-based diets, 2849
Forage systems for production of stocker steers in the upper south, 1973
Grazing methods and stocking rates for direct-seeded alfalfa pastures: III. Economics of alternative stocking rates for alfalfa pastures, 2209
Grazing methods and stocking rates for direct-seeded alfalfa pastures: II. Pasture quality and diet selection, 2202
Grazing methods and stocking rates for direct-seeded alfalfa pastures: I. Plant productivity and animal performance, 2192
Influence of chlortetracycline and dietary protein level on visceral organ mass of growing beef steers, 3169
Intake and chewing behavior of steers consuming switchgrass preserved as hay or silage, 1983
Limiting amino acids for growing Holstein steers limit-fed soybean hull-based diets, 1997
Sterilization
Technical note: Recombinant LHRH fusion protein suppresses estrus in heifers, 1310
Steroids
β-Carotene uptake and changes in ovarian steroids and uterine proteins during the estrous cycle in the canine, 1284
The effect of acute nutritional change on follicle wave turnover, gonadotropin, and steroid concentration in beef heifers, 429
Stochastic Models
Modeling selection for production traits under constant infection pressure, 2809
Stocking Density
Grazing methods and stocking rates for direct-seeded alfalfa pastures: III. Economics of alternative stocking rates for alfalfa pastures, 2209
Grazing methods and stocking rates for direct-seeded alfalfa pastures: I. Plant productivity and animal performance, 2192
Stomach
Amino acid flux in ruminal and gastric veins of sheep: Effects of ruminal and omasal injections of free amino acids and carnosine, 158
Storage
Effects of pelleting and storage of a complex nursery pig diet on lysine bioavailability, 341
Striated Muscle
Building the perfect beast: Mechanisms of myofibril assembly, E1
Stress
Administration of ACTH to restrained, pregnant sows alters their pigs' hypothalamic-pituitary-adrenal (HPA) axis, 2399
Adrenal function in Angora goats: A comparative study of adrenal steroidogenesis in Angora goats, Boer goats, and Merino sheep, 1036
Changes in postprandial plasma and extracellular and ruminal fluid volumes in wethers fed or unfed for 72 hours, 216
Few differences found between early- and late-weaned pigs raised in the same environment, 38
Investigation of the primary cause of hypoadrenocorticism in South African Angora goats (*Capra aegagrus*): A comparison with Boer goats (*Capra hircus*) and Merino sheep (*Ovis aries*), 371
Physiological responses of horses to 24 hours of transportation using a commercial van during summer conditions, 1458
Relationships between human-animal interactions and productivity of commercial dairy cows, 2821
Transportation of goats: Effects on physiological stress responses and live weight loss, 1450
Subcutaneous Injection
Effect of subcutaneous vs intramuscular administration of P.G. 600 on estrual and ovulatory responses of prepubertal gilts, 1732
Substrates
Sheep rumen metabolic development in response to age and dietary treatments, 1990
Suckling
Developmental changes in cholesterol 7α- and 27-hydroxylases in the piglet, 943
Postnatal changes of plasma amino acids in suckling pigs, 2369

The effect of progesterone alone or in combination with estradiol on follicular dynamics, gonadotropin profiles, and estrus in beef cows following calf isolation and restricted suckling, 1917
The influence of suckling interval on milk production of sows, 2026
Superovulation
The effect of time of artificial insemination on fertilization status and embryo quality in superovulated cows, 2081
Supplementary Feeding
Can beef heifers and young postpartum cows be physiologically and nutritionally manipulated to optimize reproductive efficiency?, E41
Effect of crambe meal on performance, reproduction, and thyroid hormone levels in gestating and lactating beef cows, 2269
Effects of supplemental protein type on productivity of primiparous beef cows, 3027
Supplementary Feeds
Designing supplementation programs for beef cattle fed forage-based diets, E12
Supplements
Designing supplementation programs for beef cattle fed forage-based diets, E12
Social behavior of grazing beef cattle: Implications for management, E18
Surfactants
Actual and potential applications of *Yucca shidigera* and *Quillaja saponaria* saponins in human and animal nutrition, E9
Surveys
Transfer student and gender issues within the Department of Animal Science at Texas A&M University, 3184
Survival
Role of supplemental vitamin E in lamb survival and production: A review, E23
Sustainability
Definition of animal breeding goals for sustainable production systems, 570
Swine Diseases
Quantitative relationship of systemic virus concentration on growth and immune response in pigs, 2690
Synchronization
Current concepts in estrus synchronization in swine, E35
Development of an estrus synchronization protocol for beef cattle with short-term feeding of melengestrol acetate: 7-11 synch, 2186
The strategic use of estradiol to enhance fertility and submission rates of progestin-based estrus synchronization programs in dairy herds, 523
Use of a small dose of estradiol benzoate during diestrus to synchronize development of the ovulatory follicle in cattle, 145
Systems Analysis
Evaluation of Egyptian sheep production systems: I. Breed crosses and management systems, 283
Evaluation of Egyptian sheep production systems: II. Breeding objectives for purebred and composite breeds, 288
Systems
Effects of backgrounding and growing programs on beef carcass quality and yield, E31
Genetic aspects of replacement heifers in current and future production systems, E3
Simulation of cow-calf production systems in a range environment: II. Model evaluation, 1170
Simulation of cow-calf production systems in a range environment: I. Model development, 1159

T

Tall Oil
Effects of modified tall oil and creatine monohydrate on growth performance, carcass characteristics, and meat quality of growing-finishing pigs, 2376
Effects of modified tall oil versus a commercial source of conjugated linoleic acid and increasing levels of modified tall oil on growth performance and carcass characteristics of growing-finishing pigs, 2359
Tannin
Preferences for foods varying in macronutrients and tannins by lambs supplemented with polyethylene glycol, 1443
Tannins
Polyethylene glycol as a means for reducing the impact of condensed tannins in carob pulp: Effects on lamb growth performance and meat quality, 810
Self-regulation of intake of polyethylene glycol by sheep fed diets varying in tannin concentrations, 1206
Teaching
Simple example illustrating adjustment for merit of mates in a national cattle evaluation program, 2475
Teat Order
Growth of nursing pigs related to the characteristics of nursed mammary glands, 1313
Temperament
The relationship between reaction to sudden, intermittent movements and sounds and temperament, 1467
Temperature
Digesta kinetics, energy intake, grazing behavior, and body temperature of grazing beef cattle differing in adaptation to heat, 1608
Effects of pelleting and pellet conditioning temperatures on weanling pig performance, 3014
Effects of temperature and plane of nutrition on beta-adrenergic receptors in heart, kidney, and liver of lambs, 1907
Rigor temperature and meat quality characteristics of lamb longissimus muscle, 2842
Tenderness
Bovine *CAPN1* maps to a region of BTA29 containing a quantitative trait locus for meat tenderness, 2589
Effect of the callipyge gene on muscle growth, calpastatin activity, and tenderness of three muscles across the growth curve, 2836
Effects of a unique application of electrical stimulation on tenderness, color, and quality attributes of the beef longissimus muscle, 1504
Effects of backgrounding and growing programs on beef carcass quality and yield, E31
Evaluation of calpastatin activity measures in ante- and postmortem muscle from half-sib bulls and steers, 804
Identification of optimal ranges in ribeye area for portion cutting of beef steaks, 966
Injection of beef strip loins with solutions containing sodium tripolyphosphate, sodium lactate, and sodium chloride to enhance palatability, 952
National Beef Tenderness Survey–1998, 1852
New approaches for improving tenderness, quality, and consistency of beef, E38
Palatability of wethers fed an 80% barley diet processed at different ages and of yearling wethers grazed on native range, 1779
Relationship of beef longissimus tenderness classes to tenderness of gluteus medius, semimembranosus, and biceps femoris, 2856
The use of vitamin D_3 to improve beef tenderness, 2615
Using measurements of muscle color, pH, and electrical impedance to augment the current USDA beef quality grading standards and improve the accuracy and precision of sorting carcasses into palatability groups, 2595
Variation in proteolysis, sarcomere length, collagen content, and tenderness among major pork muscles, 958
Terpenoids
Effect of individual terpenes on consumption of alfalfa pellets by sheep, 1636
Testes
GnRH antagonist inhibition of gonadotropin and steroid secretion in boars in vivo and steroid production in vitro, 1591
Relationships of gonadotropins, testosterone, and cortisol in response to GnRH and GnRH antagonist in boars selected for high and low follicle-stimulating hormone levels, 1577
Testosterone
GnRH antagonist inhibition of gonadotropin and steroid secretion in boars in vivo and steroid production in vitro, 1591
Neuroendocrine regulation of reproduction in male domestic animal species: Role of excitatory amino acids, E16
Relationships of gonadotropins, testosterone, and cortisol in response to GnRH and GnRH antagonist in boars selected for high and low follicle-stimulating hormone levels, 1577
Serum concentrations of IGF-I, estradiol-17 β, testosterone, and relative amounts of IGF binding proteins (IGFBP) in growing boars, barrows, and gilts, 2581
Serum concentrations of luteinizing hormone, growth hormone, testosterone, estradiol, and leptin in boars treated with n-methyl-D,L-aspartate, 365

The effects of active immunization against GnRH on testicular development, feedlot performance, and carcass characteristics of beef bulls, 2778
Thecal Cells
Production of insulin-like growth factor-I by granulosa cells but not thecal cells is hormonally responsive in cattle, 2919
Therapy
Hormonal therapy for sows weaned during fall and winter, 2068
Thermoregulation
Physiological responses of Brahman and Hereford steers to an acute ergotamine challenge, 124
Thiamin
Added dietary pyridoxine, but not thiamin, improves weanling pig growth performance, 88
Thymallus thymallus
Rapid communication: Microsatellite DNA markers (BFRO010 and BFRO011) for grayling, 488
Thyroid Hormones
Effect of crambe meal on performance, reproduction, and thyroid hormone levels in gestating and lactating beef cows, 2269
Modulation of porcine adipocyte β-adrenergic receptors by hormones and butyrate, 927
Titin
Building the perfect beast: Mechanisms of myofibril assembly, E1
Toxicity
Methionine imbalance and toxicity in calves, 2722
Tracking
Effects of injection position and transponder size on the performances of passive injectable transponders used for the electronic identification of cattle, 3001
Training
Plasma cortisol and ACTH concentrations in the warmblood horse in response to a standardized treadmill exercise test as physiological markers for evaluation of training status, 1936
Traits
Heritabilities of and genetic relationships between salmonella resistance traits in broilers, 2287
Transcription Factors
Effect of feed restriction on adipose tissue transcript concentrations in genetically lean and obese pigs, 934
Physiological levels of Stat5 DNA binding activity and protein in bovine mammary gland, 3126
The influence of dexamethasone and insulin on expression of CCAAT/enhancer binding protein isoforms during preadipocyte differentiation in porcine stromal-vascular cell cultures: Evidence for very early expression of C/EBPα, 1227
Transfection
Plasmid transfection and retroviral transduction of porcine muscle cells for cell-mediated gene transfer, 909
Transferase
Factors regulating apoptosis during folliculogenesis in pigs, E24
Transforming Growth Factor
A porcine intrauterine 4-MDa component with transforming growth factor-β activity suppresses natural killer cell responses, 1900
Transforming Growth Factor-β
Local regulation of pubertal mammary growth in heifers, 36A
Transgenic
Progress in transgenic production of human plasma proteins in mammary bioreactors, 1A
Transgenic protein production: Achievements using microinjection technology and the promise of nuclear transfer, 8A
Transgenics
Response to 13 generations of selection for increased 8-week body weight in lines of mice carrying a sheep growth hormone-based transgene, 832
Transit Time
The effect of texturized vegetable protein containing soy carbohydrate on oroileal transit of chromic oxide in cannulated dogs, 2633
Transponders
Effects of injection position and transponder size on the performances of passive injectable transponders used for the electronic identification of cattle, 3001
Transport
Dehydration, stress, and water consumption of horses during long-distance commercial transport, 2568
Lysine uptake by mammary gland tissue from lactating sows, 391
Physiological responses of horses to 24 hours of transportation using a commercial van during summer conditions, 1458
Transport of Animals
Transportation of goats: Effects on physiological stress responses and live weight loss, 1450
Tumor Necrosis Factor
Acute phase responses of pigs challenged orally with *Salmonella typhimurium*, 1885
Administration of recombinant bovine tumor necrosis factor-α affects intermediary metabolism and insulin and growth hormone secretion in dairy heifers, 2164
Integrated adrenal, somatotropic, and immune responses of growing pigs to treatment with lipopolysaccharide, 1892
Turkey
Response of C_2C_{12} mouse and turkey skeletal muscle cells to the β-adrenergic agonist ractopamine, 699
Twinning
Endocrinology of increased ovarian folliculogenesis in cattle selected for twin births, E26
Evaluation of numbers of microscopic and macroscopic follicles in cattle selected for twinning, 1564
Initial results of genomic scans for ovulation rate in a cattle population selected for increased twinning rate, 3053
Twinning rate in Norwegian cattle: Frequency, (co)variance components, and genetic trends, 15

U

Ubiquitin
Rapid communication: The ovine cDNA encoding interferon-stimulated gene product 17 (ISG17), 1394
UDP
Impacts of an endophyte-infected fescue seed diet on traits of mouse lines divergently selected for response to that same diet, 1191
Ulcers
Effects of feed physical form and buffering solutes on water disappearance and proximal stomach pH in swine, 2344
Enzyme supplementation and particle size of wheat in diets for nursery and finishing pigs, 3086
Ultrasonic Devices
Determination of parotid urea secretion in sheep by means of ultrasonic flow probes and a multifactorial regression analysis, 471
Ultrasound
Genetic analyses of live-animal ultrasound and abattoir carcass traits in Australian Angus and Hereford cattle, 1786
Real-time diagnosis of ovulation and ovarian cysts in sows and its impact on artificial insemination efficiency, E33
Real-time ultrasonography and pregnancy diagnosis in swine, E34
Using live estimates and ultrasound measurements to predict beef carcass cutability, 1255
Using receiver operating characteristic analysis to evaluate the accuracy in predicting future quality grade from ultrasound marbling estimates on beef calves, 2263
Using serial ultrasound measures to generate models of marbling and backfat thickness changes in feedlot cattle, 2055
Unsaturated Fatty Acids
Compartmental modeling with nitrogen-15 to determine effects of degree of fat saturation on intraruminal N recycling, 2421
Effects of degree of fat saturation on fiber digestion and microbial protein synthesis when diets are fed twelve times daily, 2412
Uptake
β-Carotene uptake and changes in ovarian steroids and uterine proteins during the estrous cycle in the canine, 1284
Urea
Determination of parotid urea secretion in sheep by means of ultrasonic flow probes and a multifactorial regression analysis, 471
Effect of feather meal as a source of valine for lactating sows, 120
Effects of supplemental zinc and manganese on ruminal fermentation, forage intake, and digestion by cattle fed prairie hay and urea, 2972
Influence of the novel urease inhibitor N-(n-butyl) thiophosphoric triamide on ruminant nitrogen metabolism: I. In vitro urea kinetics and substrate digestion, 181
Influence of the novel urease inhibitor N-(n-butyl) thiophosphoric triamide on ruminant nitrogen metabolism: II. Ruminal nitrogen metabolism, diet digestibility, and nitrogen balance in lambs, 188

Nitrogen metabolism and fertility in cattle: I. Adaptive changes in intake and metabolism to diets differing in their rate of energy and nitrogen release in the rumen, 2659
Nitrogen metabolism and fertility in cattle: II. Development of oocytes recovered from heifers offered diets differing in their rate of nitrogen release in the rumen, 2670
Practical aspects of urea and ammonia metabolism in ruminants, E21
Urea Biosynthesis
Effects of triglyceride accumulation on induction of urea synthesis by glucagon and dexamethasone in monolayer cultures of bovine hepatocytes, 1659
Urease Inhibitors
Influence of the novel urease inhibitor N-(n-butyl) thiophosphoric triamide on ruminant nitrogen metabolism: I. In vitro urea kinetics and substrate digestion, 181
Influence of the novel urease inhibitor N-(n-butyl) thiophosphoric triamide on ruminant nitrogen metabolism: II. Ruminal nitrogen metabolism, diet digestibility, and nitrogen balance in lambs, 188
Urine
Assessment of hypothalamic-pituitary-adrenal axis and sympathetic nervous system activity in pregnant sows through the measurement of glucocorticoids and catecholamines in urine, 420
Uterus
A porcine intrauterine 4-MDa component with transforming growth factor-β activity suppresses natural killer cell responses, 1900
Fetal development of in vitro-produced embryos: Possible association with uterine function, E15
Interestrous interval of cyclic gilts is decreased by systemic but not intrauterine administration of exogenous oxytocin, 2393
Rapid communication: the ovine cDNA encoding interferon-stimulated gene product 17 (ISG17), 1394
Suppressor activity of bone marrow cells and localization of fluorescent-labeled bone marrow cells within ovine endometrial tissue, 709

V

Vaccines
Technical note: Recombinant LHRH fusion protein suppresses estrus in heifers, 1310
Valine
Cellular uptake of valine by lactating porcine mammary tissue, 2927
Effects of dietary valine concentration on lactational performance of sows nursing large litters, 2879
Variance Components
Comparison of models for genetic evaluation of scrotal circumference in crossbred bulls, 275
Genetic parameters and relationships between hip height and weight in Brahman cattle, 3045
Veal
Effects of rate of pH fall, time of deboning, aging period, and their interaction on veal quality characteristics, 1845
Reducing veal calves' reactivity to people by providing additional human contact, 1213
The impact of gentle contacts on ease of handling, welfare, and growth of calves and on quality of veal meat, 1219
Viscera
Body weight and tissue gain in lambs fed an all-concentrate diet and implanted with trenbolone acetate or grazed on alfalfa, 1117
Vitamin A
Influence of vitamin A injection before mating on oocyte development, follicular hormones, and ovulation in gilts fed high-energy diets, 1598
Vitamin D
Rapid communication: Porcine vitamin D-25-hydroxylase maps to chromosome 5, 3193
The use of vitamin D_3 to improve beef tenderness, 2615
Vitamin E
Effect of dietary selenium and vitamin E on spermatogenic development in boars, 1537
Effect of dietary selenium and vitamin E on the ultrastructure and ATP concentration of boar spermatozoa, and the efficacy of added sodium selenite in extended semen on sperm motility, 1544
Effect of vitamin E sources (RRR- or all-*rac*-α-tocopheryl acetate) and levels on sow reproductive performance, serum, tissue, and milk α-tocopherol contents over a five-parity period, and the effects on the progeny, 110
Evaluation of ewe and lamb immune response when ewes were supplemented with vitamin E, 2731
Role of supplemental vitamin E in lamb survival and production: A review, E23
Vitamin K
The effect of initiation of exercise training in young horses on vitamin K status, 2353
Vitamins
Added dietary pyridoxine, but not thiamin, improves weanling pig growth performance, 88
Deletion of supplemental minerals and vitamins during the late finishing period does not affect pig weight gain and feed intake, 2797
Riboflavin and niacin concentrations of bison cuts, 1267
Volatile Fatty Acids
Effect of supplements on growth and forage intake by stocker steers grazing wheat pasture, 1625
Net portal appearance of volatile fatty acids in sheep intraruminally infused with mixtures of acetate, propionate, isobutyrate, butyrate, and valerate, 1372
Portal-drained visceral metabolism of 3-hydroxybutyrate in sheep, 2223
Sheep rumen metabolic development in response to age and dietary treatments, 1990

W

Waste Utilization
Health and environmental implications of using composted household and yard waste bedding in a cattle feedlot, 495
Water
Effects of eating space and availability of water in feeders on productivity and eating behavior of grower/finisher pigs, 865
Effects of feed physical form and buffering solutes on water disappearance and proximal stomach pH in swine, 2344
Water Quality
Application of nutritional knowledge for developing econutrition feeding programs on commercial swine farms, E22
Weaning
Developmental changes in cholesterol 7α- and 27-hydroxylases in the piglet, 943
Effects of weaning age and diet on growth and carcass characteristics in steers, 1759
Few differences found between early- and late-weaned pigs raised in the same environment, 38
Weaning Age
Evaluation of site and age of weaning on pig growth performance, 1726
Weaning Weight
Effect of tropically adapted sire breeds on preweaning growth of F_1 Angus calves and reproductive performance of their Angus dams, 1111
Well-being
Physiological responses of horses to 24 hours of transportation using a commercial van during summer conditions, 1458
Wethers
Ruminal fermentation and duodenal flow following progressive inoculations of fauna-free wethers with major individual species of ciliate protozoa or total fauna, 750
Wheat
Effect of supplements on growth and forage intake by stocker steers grazing wheat pasture, 1625
Enzyme supplementation and particle size of wheat in diets for nursery and finishing pigs, 3086
Wheat Milling Residues
Variability among sources and laboratories in analyses of wheat middlings, 2652
Whey Protein
Effects of a whey protein product and spray-dried animal plasma on growth performance of weanling pigs, 647
Wool Fibers
Potential for Hair Sheep in the United States, E8

X

Xylanase
Enzyme supplementation and particle size of wheat in diets for nursery and finishing pigs, 3086

Y

Yearlings
Influence of *Bos indicus* crossbreeding and cattle age on apparent utilization of a high-grain diet, 1641
Yeasts
Efficacy of yeast phytase in improving phosphorus bioavailability in a corn-soybean meal-based diet for growing pigs, 94

Z

Zebu
Genetic parameters and relationships between hip height and weight in Brahman cattle, 3045
Yucca shidigera
Actual and potential applications of *Yucca shidigera* and *Quillaja saponaria* saponins in human and animal nutrition, E9
Zinc
Assessment of trace mineral status of ruminants: A review, E20
Chemical characteristics and relative bioavailability of supplemental organic zinc sources for poultry and ruminants, 2039
Effects of supplemental zinc and manganese on ruminal fermentation, forage intake, and digestion by cattle fed prairie hay and urea, 2972
Effects of supplemental zinc concentration and source on performance, carcass characteristics, and serum values in finishing beef steers, 2801
Growth promotion effects and plasma changes from feeding high dietary concentrations of zinc and copper to weanling pigs (regional study), 1010
Zinc bioavailability in soybean meal, 1017
Zinc Oxide
Growth-promoting efficacy in young pigs of two sources of zinc oxide having either a high or a low bioavailability of zinc, 2896
Zona Pellucida
A sperm's perspective of fertilization, E17

Subject index for Volume 78, Supplements 1 and 2 (national and sectional abstracts)[1,2]

A

α-ketoglutarate, 299A
Abortive infection, 87A, 132A
Absolute difference, 50A
Absorption, 267A, 268A
ABT starter cultures, 88A
Acacia berlandieri, 20B
Acacia mangium, 113A
Accelerated breeding, 308A
Accelerated growth, 293A
Accuracy, 69A
accuracy of evaluation, 55A
Acer rubrum, 148A
Acetaldehyde, 82A, 132A
Acetate, 167A
Acid adapted, 131A
Acid Hydrolysis, 98A
Acid Milk Gels, 98A
acid phosphatase, 83A
Acidified Cheese, 109A
Acidifiers, 173A
Acidocin 30SC, 91A
acidosis, 89B, 262A, 263A
Acid-tolerance, 92A
Across-country evaluation, 66A
ACTH, 39B
Actin Attachment Sites, 49B
Activated Carbon, 273A
Active Learning, 312A
Active sites, 86A
activin, 76B
Ad Libitum, 254A
adaptation, 151A
additive, 184A
ADG, 117A, 228A
Adipocyte, 206A
Adipose, 16A, 141A
Adipose Tissue, 16A, 141A, 156A, 206A, 255A
Adjunct cultures, 96A
Adjusted Milk yield, 54A
Adrenal Gland, 209A, 21B
Adrenomedullin, 136A
Adsorption treatments, 86A
Adult Sow, 185A
Aerobic stability, 111A
Aggression, 240A
aggressive interactions, 35B
Aging, 128A, 129A
Aging of Cheese, 109A
Agouti-related peptide, 45B
Agriculture, 102A
Agronomy, 114A
Air cell, 86A
Air quality, 33B
Alabama Master Cattle Producers, 9B
Alfalfa, 122A, 274A, 80B, 84B, 86B, 91B
Alfalfa Hay, 272A, 113B, 114B
Alfalfa silage, 119A
alkanes, 2B
Alpha lactalbumin, 10A, 84A
Alpha-Lipoic Acid, 183A
Alternative, 40B
Amino acid analysis, 192A
Amino Acid Digestibility, 178A, 54B, 73B, 108B
Amino Acid Imbalance, 169A
Amino acid metabolism, 269A
Amino Acids, 118A, 119A, 167A, 170A, 171A, 180A, 196A, 205A, 268A, 281A, 294A, 298A, 299A, 301A, 58B, 64B, 71B, 87B, 92B, 109B, 113B
Ammonia, 186A, 266A, 289A
Ammonia and hydrogen sulfide emission, 187A, 193A
Ammonia emission, 69B
Ammonia production, 65B
Anabolic, 27A
Anabolic Implants, 26A
Anabolic steroid, 140A
Analgesia, 36A
analytical testing methods, 89A
Anestrous, 74B
Anestrous Ewes, 129A
Angiogenesis, 208A
Angiopoietin, 24A
Angora goats, 301A
Angus heifers, 225A
Animal abuse investigation, 79A
Animal Agriculture, 22A, 96B
Animal Behavior Modifier, 123B
Animal Breeding, 4A, 122B
Animal drugs, 21A
Animal ethics, 79A
Animal Fat, 266A
Animal genetic resources, 64A
Animal husbandry, 79A
Animal Manure Management, 34B
